| Mode of acquisition.                                               | Fine ounces.  | Cost.          |
|--------------------------------------------------------------------|---------------|----------------|
| Purchased by Treasury Department (lots of over 10,000 ounces)..... | 11,074,042.65 | \$8,100,281.25 |
| Purchased at mints (lots of less than 10,000 ounces).....          | 770,939.94    | 562,152.58     |
| Partings, bar charges, and fractions.....                          | 72,676.19     | 53,087.49      |
| Total.....                                                         | 11,917,658.78 | 8,715,521.32   |

From 1873 to November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the Government of the United States was a large purchaser of silver.

The amount purchased, the cost thereof, the average price paid, and the acts of Congress under which the purchases were made are shown in the following statement:

| Act authorizing.       | Fine ounces. | Cost.       | Average cost per ounce. |
|------------------------|--------------|-------------|-------------------------|
| February 12, 1873..... | 5,434,282    | \$7,152,564 | \$1.314                 |
| January 14, 1875.....  | 31,603,906   | 37,571,148  | 1.189                   |
| February 28, 1878..... | 291,272,019  | 308,279,261 | 1.058                   |
| July 14, 1890.....     | 168,674,682  | 155,931,002 | .924                    |
| Total.....             | 496,984,889  | 508,933,975 | 1.024                   |

The following tables exhibit the amount and cost of silver bullion purchased each year under the acts of February 28, 1878, and July 14, 1890, the average price paid, and the bullion value of the standard silver dollar.

AMOUNT, COST, AND AVERAGE PRICE PAID FOR SILVER BULLION PURCHASED, ALSO BULLION VALUE OF THE SILVER DOLLAR COINED UNDER ACT OF FEBRUARY 28, 1878.

| Fiscal year. | Fine ounces.   | Cost.            | Average price per fine ounce. | Bullion value of a silver dollar. |
|--------------|----------------|------------------|-------------------------------|-----------------------------------|
| 1878.....    | 10,809,350.58  | \$13,023,268.96  | \$1.2048                      | \$0.9318                          |
| 1879.....    | 19,248,086.09  | 21,593,642.99    | 1.1218                        | .8676                             |
| 1880.....    | 22,057,862.64  | 25,235,081.53    | 1.1440                        | .8848                             |

## BALANCE OF SILVER PURCHASED UNDER ACT OF JULY 14, 1890, ON HAND AT EACH MINT JUNE 30, 1894.

| Mint.              | Fine ounces.     | Cost.              |
|--------------------|------------------|--------------------|
| Philadelphia.....  | 118,992, 118. 11 | \$107,702, 715. 59 |
| San Francisco..... | 11,985, 924. 81  | 10,751, 277. 59    |
| New Orleans.....   | 8,984, 898. 95   | 7,715, 082. 89     |
| Carson.....        | 735, 401. 87     | 588, 743. 30       |
| Total.....         | 140,699, 343. 74 | 126,757, 819. 37   |

The balance of silver bullion purchased under the act of July 14, 1890, on hand at each mint November 1, 1894, is exhibited in the following table:

| Mint.              | Fine ounces.     | Cost.              |
|--------------------|------------------|--------------------|
| Philadelphia.....  | 118,906, 885. 31 | \$107,625, 569. 26 |
| San Francisco..... | 11,205, 752. 93  | 10,050, 631. 19    |
| New Orleans.....   | 7,961, 641. 17   | 6,836, 439. 89     |
| Carson.....        | 735, 401. 87     | 588, 743. 30       |
| Total.....         | 138,809, 681. 28 | 125,101, 383. 64   |

Since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the silver contained in gold deposits, the small fractions of silver for return in fine bars, and the amount retained in payment of charges on silver deposits and mutilated domestic silver coin were purchased by the Mint for the subsidiary silver coinage, under the provisions of section 3526 of the Revised Statutes.

The total amount of silver purchased for the subsidiary coinage from November 1, 1893, to June 30, 1894, was 82,989.71 ounces fine, of the coining value in subsidiary coin of \$114,725.70.

The quantity and cost of silver purchased from November 1, 1893, to June 30, 1894, at each mint for the subsidiary coinage is exhibited in the following table:

| Mint.              | Fine ounces. | Cost.        |
|--------------------|--------------|--------------|
| Philadelphia.....  | 58,322. 60   | \$37,667. 54 |
| San Francisco..... | 20,228. 40   | 12,674. 81   |
| New Orleans.....   | 2,577. 91    | 1,579. 68    |
| Carson.....        | 1,860. 80    | 1,173. 81    |
| Total.....         | 82,989. 71   | 53,095. 84   |

## COURSE OF SILVER.

On the 1st of July, 1893, the London quotation for silver .925 (British standard), was  $33\frac{1}{2}$  pence, equivalent to \$0.7343 in United States money, for silver 1000 fine. The New York quotation on the same day fluctuated from 72 to 74 cents per ounce fine. After this date there was a gradual advance in the price, owing to the fact that large purchases continued to be made on Indian account, notwithstanding the mints of that country had been closed to deposits of silver for coinage on individual account, and from the further fact that for the first time China became an important buyer of bar silver and continued to purchase large amounts until near the close of the year.

The advance was uninterrupted until September 12, when the price in London for bars ready for immediate shipment was  $34\frac{1}{2}$  pence, equivalent to \$0.7562 per ounce fine. At this date the New York quotation for fine bar silver ranged from  $74\frac{1}{2}$  to 76 cents per ounce. From this point the price declined, closing October 31, 1893, in London at  $31\frac{1}{2}$  pence, equivalent to 69 cents per ounce fine.

November 1, the date of the repeal of the purchasing clause of the act of July 14, 1890, the London price was  $31\frac{1}{2}$  pence, equivalent to 69 cents per ounce fine. From this date the price advanced, until on the 18th it had risen to  $32\frac{3}{4}$  pence, equivalent to \$0.71791 per ounce fine, but declined from this point, and closing on the 30th at 32 pence, equivalent to \$0.7015 per ounce fine.

During the month of December, 1893, the London price ranged from  $31\frac{1}{2}$  to  $32\frac{5}{16}$  pence, and the New York quotation from  $68\frac{3}{4}$  to  $70\frac{1}{2}$  cents.

In January, 1894, the price commenced to fall, and continued to decline until March, when it had reached 27 pence in London, equivalent to \$0.59187 per ounce fine, which is the lowest recorded price. After this the price gradually advanced, closing April 30 in London at  $29\frac{1}{2}$  pence, equivalent to \$0.63845 per ounce fine. From this the price again declined, and the closing price in London June 30 was  $28\frac{3}{4}$  pence, or 63 cents per ounce fine.

At the highest price ( $34\frac{1}{2}$  pence) of silver during the fiscal year, the bullion value of the silver dollar was 59.13 cents, and at the lowest (27 pence) 45.77 cents. Since the close of the fiscal year the price has fluctuated in the London market from  $28\frac{7}{8}$  to  $30\frac{7}{8}$  pence, or from 62.338 to 66.722 cents per ounce fine.

The following table exhibits the value of the pure silver in a silver dollar, reckoned at the commercial price of silver bullion from \$0.50 to \$1.2929 (parity), per ounce fine:

## REPORT ON THE FINANCES.

| Price of silver per fine ounce. | Value of pure silver in a silver dollar. | Price of silver per fine ounce. | Value of pure silver in a silver dollar. | Price of silver per fine ounce. | Value of pure silver in a silver dollar. |
|---------------------------------|------------------------------------------|---------------------------------|------------------------------------------|---------------------------------|------------------------------------------|
| \$0.50                          | \$0.387                                  | \$0.77                          | \$0.596                                  | \$1.04                          | \$0.804                                  |
| .51                             | .394                                     | .78                             | .603                                     | 1.05                            | .812                                     |
| .52                             | .402                                     | .79                             | .611                                     | 1.06                            | .820                                     |
| .53                             | .410                                     | .80                             | .619                                     | 1.07                            | .828                                     |
| .54                             | .418                                     | .81                             | .626                                     | 1.08                            | .835                                     |
| .55                             | .425                                     | .82                             | .634                                     | 1.09                            | .843                                     |
| .56                             | .433                                     | .83                             | .642                                     | 1.10                            | .851                                     |
| .57                             | .441                                     | .84                             | .650                                     | 1.11                            | .859                                     |

## SEIGNIORAGE ON SILVER COINAGE.

The balance of profits on the coinage of silver on hand at the mints at the commencement of the fiscal year, July 1, 1893, was \$201,759.62. The seigniorage on the coinage of silver dollars during the year amounted to \$227.01, and on the subsidiary coinage to \$2,729.10; a total of \$2,956.11.

From the seigniorage there were paid during the year for expenses of distributing silver coin \$2,638.85, and for reimbursements on silver wasted by the operative officers and for bullion sold in sweeps \$673.24. The balance of profits on the coinage of silver on hand at the mints June 30, 1894, was \$2,294.84.

Including the balance on hand at the mints July 1, 1878, the net profits on account of the coinage of silver from that date to June 30, 1894, aggregates \$74,262,615.01.

The total seigniorage on the coinage of silver under the act of July 14, 1890, from August 13, 1890, to June 30, 1894, was \$6,977,295.76; and from July 1 to November 1, 1894, \$786,764.27; a total seigniorage under this act of \$7 764,060.03.

A table will be found in the Appendix (p. 262), exhibiting the seigniorage on the silver coinage during the fiscal year at each mint, and the disposition of the same.

#### APPROPRIATIONS AND EXPENDITURES.

The amount specifically appropriated for the support of the mints and assay offices by the act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ended June 30, 1894, aggregated \$1,050,100.

It became necessary to obtain appropriations to supply deficiencies in the following appropriations for the fiscal year 1894:

For wages of workmen and adjusters at the mint at Philadelphia, \$46,000.

For contingent expenses, mint at Philadelphia, \$16,969.37.

For wages of workmen and adjusters, mint at New Orleans, \$6,500.

And for freight on bullion and coin between mints and assay offices, \$10,503.85.

The necessity for the additional appropriation for wages of workmen and adjusters at the Philadelphia Mint was due to the large gold coinage necessary to be done at that institution to meet the requirements of the Treasury. In order to do this, it was not only necessary to employ, temporarily, additional workmen and adjusters but to work a large portion of the force overtime.

The appropriation of \$16,969.37 for contingent expenses was necessary to reimburse the Treasury for the amount allowed the coiner and melter and refiner for wastage in their gold and silver operations during the year, under the provisions of section 3542, Revised Statutes of the United States.

The deficiency in the appropriation for freight on bullion and coin between the mints and assay offices was due to the amount of gold bullion transferred from the United States assay office at New York and the increase in the deposits of gold bullion at the minor assay offices, which was transferred to the mint at Philadelphia for coinage, and also to the further fact that the gold bullion deposited at the mint at Carson since the suspension of the coinage operations at that institution had been transferred to the mint at San Francisco for coinage. In this connection it is proper to state that during the year the amount of gold bullion transferred from the assay office at New York to the mint at Philadelphia aggregated \$50,207,000. The charges for transportation on the amount were \$15,047.80, of which sum \$12,536.80 were paid from the appropriation for contingent expenses of the mint at Philadelphia under section 3553, Revised Statutes of the United States, and the balance from the appropriation for freight on bullion and coin between the mints and assay offices, making the total amount paid for transportation of bullion \$32,040.65.

The appropriation of \$6,500 to supply a deficiency in the appropriation for wages of workmen and of adjusters at the mint at New Orleans was necessary to continue coinage operations at that institution during the month of June, and the recoinage of uncurrent subsidiary silver coin required to supply the demand of the Treasury.

The aggregate appropriations, including deficiencies, for the support of the mint service during the year amounted to \$1,130,073.22.

The expenditures during the year from the appropriations aggregated \$1,045,122.73, leaving an unexpended balance of \$84,950.49. In addition to the expenditures from the regular appropriations there was expended from the general appropriation contained in the act of July 14, 1890, authorizing the purchase of silver bullion and for other purposes, the sum of \$23,096.46. This expenditure was due to the weighing and counting of the large amounts of silver bullion and coin, incident to the change in the superintendency of the mint at Philadelphia; there was also expended from the same appropriation \$393 for cablegrams from London, reporting the daily price of silver bullion. Adding to the expenditures from the specific appropriations the amount of \$23,489.46, expended from the appropriation contained in the act of July 14, 1890, the total expenditures on account of the mint service for the year were \$1,068,612.19.

The following table exhibits the appropriations and expenditures of the respective mints and assay offices, exclusive of the sum of \$393 paid for cablegrams, as previously stated:

## APPROPRIATIONS AND EXPENDITURES, 1894.

## APPROPRIATIONS.

| Total.....         | 199,100   | 609,700           | 181,400              | 990,200   |

The estimates of the appropriations for the support of the mint service, including the office of the Director of the Mint, for the fiscal year 1896, submitted October 24, 1894, amounted to \$1,065,210—\$29,700 in excess of the appropriation for the current year.

The estimate of the appropriation for freight on bullion and coin between the mints and assay offices, which is increased from \$9,000 to \$30,000, makes up \$21,000 of the increase.

The addition asked for is due to the largely increasing deposits of gold bullion at the United States mint at Denver and the United States assay office at Helena, Mont.

The increase asked for in the appropriation for wages of workmen and contingent expenses at these institutions is due to the same cause.

EARNINGS AND EXPENDITURES OF THE REFINERIES, OF THE COINAGE MINTS, AND OF THE ASSAY OFFICE AT NEW YORK.

The charges collected for the operations of parting and refining bullion during the fiscal year 1894 aggregated \$147,591.92, exclusive of the amounts received from the sale of by-products, \$14,197.71, which is not applicable to the payment of the expenses of parting and refining bullion, but is deposited and covered into the Treasury as a miscellaneous receipt.

The gross expenditures for the year on account of these operations amounted to \$170,130.68, showing an excess of expenditures over charges collected of \$22,538.76, deducting the amount realized from the sale of by-products, leaves the net excess of expenditures \$8,341.05.

The charges collected for and the expenses of parting and refining bullion during the fiscal year 1894 are exhibited in the following table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING BULLION,  
1894.

| Institutions.                  | Charges collected. | Gross expenditures. | Net expenditures. |
|--------------------------------|--------------------|---------------------|-------------------|
| Mint at Philadelphia .....     | \$21,747.68        | \$20,549.80         | \$20,549.80       |
| Mint at San Francisco .....    | 16,814.18          | 33,608.52           | 32,638.13         |
| Mint at Carson .....           | 11,242.73          | 17,168.08           | 16,144.72         |
| Mint at New Orleans .....      | 1,163.95           | 1,310.16            | 1,310.16          |
| Assay office at New York ..... | 96,623.38          | 97,494.12           | 85,290.16         |
| Total .....                    | 147,591.92         | 170,130.68          | 155,932.97        |

EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.

The total earnings of the mints and assay offices during the fiscal year 1894, including amount of charges collected for parting and refining bullion, aggregated \$870,672.71.

The seigniorage on the coinage of silver during the year amounted to only \$2,956.11 as against \$1,559,362.41 for 1893.

The profits on minor coinage executed during the year amounted to \$649,425.60, against \$971,782.93 for the fiscal year 1893.

The total cost of the mint service during the year, including the wastage by the several operative officers, loss on sale of sweeps, and expenses of distributing minor coins, exceeded the earnings by \$408,050.35.

In the Appendix (p. 260) a table will be found showing in detail the earnings and expenditures, classified under the proper heading, at each mint and assay office.

CLASSIFIED STATEMENT OF EXPENDITURES.

The expenditures of the mints and assay offices for supplies, salaries, and wages of workmen during the fiscal year 1894, will be found in the Appendix (p. 306). The consolidated expenditures are shown in the following table:

CONSOLIDATED TABULATED STATEMENT OF EXPENDITURES FOR SUPPLIES OF THE  
MINTS AND ASSAY OFFICES OF THE UNITED STATES FOR THE FISCAL YEAR  
ENDING JUNE 30, 1894.

| Item of expenditures.                         | Ordinary ex-<br>penses. | Refinery ex-<br>penses. | Total.       |
|-----------------------------------------------|-------------------------|-------------------------|--------------|
| Acids.....                                    | \$1,421.25              | \$33,539.81             | \$34,961.06  |
| Assayers' balances.....                       | 203.00                  |                         | 203.00       |

## IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

**GOLD.**—During the fiscal year 1894 foreign gold bullion of the value of \$14,489,341 was imported into the United States, of which amount \$8,347,623 came from England, \$2,357,565 from Germany, \$1,210,757 from Mexico, \$887,684 from France, \$576,149 from Australia, \$442,732 from Colombia, \$295,044 from British Columbia, \$126,254 from Nicaragua, and the remainder from various countries, principally from South and Central American States.

Foreign gold coins of the value of \$27,168,886 were imported. Of this amount \$7,676,617 came from France, \$7,320,934 from England, \$6,664,632 from Cuba, \$3,120,874 from Germany, \$1,392,838 from Australia, \$734,711 from Quebec and Ontario, \$116,823 from Mexico, \$99,086 from West Indies, and the remainder from Central and South American States.

Foreign gold ores of the invoiced value of \$540,444 were imported for reduction, all of which came from Mexico except about \$38,400 worth, which came from British Columbia, Quebec, and Ontario.

United States gold coins of the value of \$30,790,892 were returned during the year. Of this amount \$15,949,988 came from England, \$8,959,428 from Germany, \$2,178,206 from France, \$912,813 from Quebec and Ontario, \$696,483 from Venezuela, \$735,798 from the West Indies, \$618,093 from Cuba, \$190,160 from China, \$176,238 from Mexico, \$154,637 from Colombia, \$90,133 from Central American States, and the remainder chiefly from the Azores, Madeira Islands, and Japan.

The following table shows the total gold imports into the United States during the fiscal year 1894:

GOLD IMPORTS, 1894.

| Items.                  | Amount.      |
|-------------------------|--------------|
| Foreign bullion.....    | \$14,489,341 |
| Foreign coin.....       | 27,168,886   |
| Foreign ores.....       | 540,444      |
| Total foreign gold..... | 42,198,671   |
| United States coin..... | 30,790,892   |
| Total gold imports..... | 72,989,563   |

Gold bars bearing the stamp of a United States mint or assay office, valued at \$76,365, were exported to Quebec and Ontario. Other domestic gold bullion of the value of \$107,139 was exported, of which \$81,790 went to England; \$23,717 to the Dominion of Canada, and the remainder to Hongkong and Cuba.

United States gold coins of the value of \$64,303,840 were exported as follows: \$28,800,000 to Germany; \$15,345,000 to France; \$14,853,500 to England; \$1,435,338 to Quebec and Ontario; \$1,282,958 to the West Indies; \$792,085 to the Hawaiian Islands; \$725,000 to the Netherlands; \$528,125 to the South American States; \$317,980 to the Central American States, and the remainder to Hongkong and British Columbia.

Gold contained in silver-copper matte of the value of \$20,319 was exported from the port of Baltimore.

Domestic gold ores of the invoiced value of \$146,779 were exported. Of this amount \$127,735 were shipped to England, and the remainder to Germany.

Foreign gold coins of the value of \$12,490,707 were reexported, of which \$11,896,644 went to Cuba; \$194,794 to Quebec and Ontario; \$134,000 to England; \$105,000 to France; \$102,285 to Bermuda, and the remainder principally to Colombia, West Indies, and Germany.

Foreign gold ores of the invoiced value of \$17,069 were reexported to England.

The following table shows the total gold exports from the United States during the fiscal year 1894:

GOLD EXPORTS, 1894.

| Items.                               | Amount.      |
|--------------------------------------|--------------|
| United States bars .....             | \$76,375     |
| Other domestic bullion .....         | 107,139      |
| Domestic coin .....                  | 64,303,840   |
| Gold contained in copper matte ..... | 20,319       |
| Domestic ores .....                  | 146,779      |
| Total domestic .....                 | 64,654,452   |
| Foreign coin reexported .....        | \$12,490,707 |
| Foreign ores reexported .....        | 17,069       |
| Total foreign .....                  | 12,507,776   |
| Total gold exports .....             | 77,162,228   |

The net gold exports for the fiscal year 1894 amounted to \$4,172,665, against \$86,897,275 for the previous fiscal year.

The following table shows the imports and exports of United States gold coin from January 1, 1870, to November 1, 1894:

IMPORTS AND EXPORTS OF UNITED STATES GOLD COIN.

| Period.                      | Imports.    | Exports.    | Period.               | Imports.    | Exports.    |
|------------------------------|-------------|-------------|-----------------------|-------------|-------------|
| Jan. 1 to July 1, 1870 ..... |             | \$6,384,250 | Fiscal year—          |             |             |
| Fiscal year—                 |             |             | 1886 .....            | \$1,687,231 | \$5,400,976 |
| 1871 .....                   |             | 55,491,719  | 1887 .....            | 5,862,509   | 3,550,770   |
| 1872 .....                   |             | 40,391,357  | 1888 .....            | 5,181,512   | 3,211,399   |
| 1873 .....                   |             | 35,661,863  | 1889 .....            | 1,403,619   | 4,143,939   |
| 1874 .....                   |             | 28,766,943  | 1890 .....            | 1,949,552   | 3,951,736   |
| 1875 .....                   |             | 59,309,770  | 1891 .....            | 2,824,146   | 67,704,900  |
| 1876 .....                   |             | 27,542,861  | 1892 .....            | 15,432,443  | 42,841,963  |
| 1877 .....                   |             | 21,274,565  | 1893 .....            | 6,074,899   | 101,844,087 |
| 1878 .....                   | \$7,325,783 | 6,427,251   | 1894 .....            | 30,790,892  | 64,303,840  |

| 1885 .....                   | 3,352,090   | 2,345,809   |                       |             |             |

**SILVER.**—Foreign silver bullion of the commercial value of \$3,924,205 (6,123,703 ounces) was imported during the fiscal year 1894, of which \$3,537,229 came from Mexico, and the remainder from Central and South American States.

Silver in foreign ores of the invoiced value of \$6,679,161 was imported into the United States for reduction, \$6,398,968 coming from Mexico,

and the remainder from British Columbia and Peru. These silver-lead ores contained 50,975,674 pounds of lead, valued at \$716,793, and 1,233,537 pounds of copper, valued at \$92,281.

The following table, kindly compiled and furnished by the Chief of the Bureau of Statistics, shows the quantity and value of the metals contained in these silver-lead ores imported during the fiscal year 1894:

STATEMENT SHOWING BY CUSTOMS DISTRICTS THE ESTIMATED QUANTITIES AND VALUES OF SILVER ORE IMPORTED INTO THE UNITED STATES DURING THE YEAR ENDED JUNE 30, 1894, WITH THE QUANTITIES AND VALUES OF GOLD, SILVER, LEAD, AND COPPER CONTAINED IN THE ORE AS FAR AS COULD BE ASCERTAINED.

| Total .....                  | 36,876            | 521,150   | 1,233,537      | 92,281  |

\* Calculated.

Foreign silver coins of the value of \$9,233,288 were imported, of which \$7,747,259 came from Mexico; \$450,525 from South American States; \$357,054 from the West Indies; \$326,947 from Central American States; \$305,170 from Canada, and the remainder from France and England.

United States silver coins (principally subsidiary pieces) of the value of \$129,059 were imported, of which \$92,183 came from Quebec and Ontario, and the remainder from the West Indies, South American States, and England.

The following table shows the total silver import into the United States during the fiscal year 1894:

## IMPORTS OF SILVER, 1894.

| Items.                                          | Amount.       |
|-------------------------------------------------|---------------|
| Foreign bullion (commercial value).....         | \$3, 924, 205 |
| Silver in foreign ores (commercial value) ..... | 6, 679, 161   |
| Foreign silver coin .....                       | 9, 233, 288   |
| Total foreign .....                             | 19, 836, 654  |
| United States silver coin.....                  | 129, 059      |
| Total silver imports .....                      | 19, 965, 713  |

The export of United States silver bars bearing the stamp of a United States mint or assay office was 136,493 ounces, valued at \$92,385, of which \$45,655 went to Quebec and Ontario, and the remainder to China and Japan. Other domestic silver bars, containing 57,136,373 ounces, valued at \$38,898,025, were exported during the year, of which \$33,111,913 were shipped to England; \$3,569,880 to Japan; \$1,309,276 to China; \$355,216 to Colombia; \$244,482 to Guatemala; \$201,000 to France, and the remainder to Germany and Mexico.

There were exported during the year 50,910,745 pounds of copper matte, containing 709,858 ounces of fine silver, which, at the average commercial price for the year, is valued at \$486,792.

The following letters from the superintendent of the United States assay office at New York and the collector of customs at Baltimore give the quantity of the precious metals exported in this copper matte:

OFFICE OF THE COLLECTOR OF CUSTOMS,  
*Port of Baltimore, September 18, 1894.*

SIR: Responding to your request of the 10th instant, I have the pleasure to inclose herewith an abstract of the amount of gold and silver contained in copper matte exported from this port during the fiscal year ended June 30, 1894. I would add that there has been no copper matte exported from this port since November, 1893, to date.

Very respectfully,

JAMES A. DIFFENBAUGH,  
*Collector.*

Hon. R. E. PRESTON,  
*Director of the Mint, Washington, D. C.*

WEIGHT OF SILVER-COPPER MATTE EXPORTED FROM THE PORT OF BALTIMORE,  
MD., DURING THE FISCAL YEAR ENDED JUNE 30, 1894.

[Calculated on a basis of 60.5 per cent pure copper, 35 ounces pure silver, and 0.14 ounces pure gold per ton.]

| Months.        | Matte.       |        | Pounds of pure copper. | Ounces of pure silver. | Ounces of pure gold. |

| Total .....    | 15, 727, 065 | 7, 021 | 9, 514, 874            | 245, 735               | 982. 94              |

UNITED STATES ASSAY OFFICE AT NEW YORK,  
*Superintendent's Office, October 10, 1894.*

SIR: In reply to your letter of the 10th ultimo, relative to the export of copper matte and argentiferous matte from this port during the fiscal year ended June 30, 1894, with the quantities of gold and silver contained, I have to report that the amount of said exports, according to the custom-house records, was as follows: Copper matte, 35,183,680 pounds. It contained 464,123 ounces of fine silver but no gold.

Respectfully,

ANDREW MASON, *Superintendent.*

HON. R. E. PRESTON,  
*Director of the Mint, Washington, D. C.*

United States subsidiary silver coin of the value of \$78,677 was exported, of which \$41,238 went to Mexico, \$31,374 to Canada, and the remainder to the West Indies and Hawaiian Islands.

Foreign silver coin, principally Mexican dollars, of the value of \$11,320,688, was reexported. Of this amount, \$7,865,715 went to Hong-kong, \$1,995,995 to England, \$514,578 to Mexico, \$288,104 to the West Indies, \$258,500 to Japan, \$250,035 to South American States, and the remainder to Quebec and Ontario and Central American States.

Foreign silver bars containing 113,910 ounces, of the value of \$61,490, were reexported, all of which went to Mexico.

Silver in foreign ore, of the value of \$69,015, was reexported to England for reduction.

The following table shows the total silver exports from the United States during the fiscal year 1894:

EXPORTS OF SILVER, 1894.

| Items.                                     | Amount.      |
|--------------------------------------------|--------------|

| Other domestic bullion .....               | 38,898,025   |
| Silver contained in copper matte.....      | 486,792      |
| United States subsidiary silver coin ..... | 78,677       |
| Total domestic.....                        | 39,555,879   |
| Foreign silver coin reexported .....       | \$11,320,688 |
| Foreign silver bullion reexported .....    | 61,490       |
| Silver in foreign ores reexported .....    | 69,015       |
| Total foreign .....                        | 11,451,193   |
| Total silver exports.....                  | 51,007,072   |

From a comparison of the tables of imports and exports of silver for the fiscal year 1894, it will be seen that the exports exceed the imports by \$31,041,359.

A table exhibiting the imports and exports of the precious metals by customs districts and by months for the fiscal year 1894, kindly compiled by the Chief of the Bureau of Statistics, will be found in the Appendix (p. 271), where will also be found tables exhibiting the imports and exports of gold and silver for a series of years of the principal countries of the world.

## MOVEMENT OF GOLD FROM THE UNITED STATES.

The superintendent of the United States Assay Office at New York, has kindly prepared the following tables, giving the exports and imports of gold from the port of New York to Europe during the fiscal year 1894:

## STATEMENT OF UNITED STATES GOLD COIN EXPORTED FROM THE PORT OF NEW YORK TO EUROPE DURING THE FISCAL YEAR ENDED JUNE 30, 1894.

| Date.   | Destination.  | Value.    | Rate of exchange. | Date.   | Destination.  | Value.    | Rate of exchange. |

## RECAPITULATION OF GOLD EXPORTS.

| Exports.                        | Value.       |
|---------------------------------|--------------|
| Total United States coin .....  | \$57,573,900 |
| Foreign coin .....              | 888,149      |
| Gold bars .....                 | 26,660       |
| Total shipments to Europe ..... | 58,488,709   |

During the same period there were shipped to the West Indies, Central and South America, the following amounts:

| Exports.                      | Value.        |
|-------------------------------|---------------|
| United States gold coin ..... | \$1, 822, 255 |
| Foreign coin .....            | 11, 413, 516  |
| Gold bars .....               | 700           |
| Total .....                   | 13, 236, 471  |
| Grand total of exports .....  | 71, 725, 180  |

The imports of gold during the same period were as follows:

| Imports.                                                     | Value.         |
|--------------------------------------------------------------|----------------|
| From Europe:                                                 |                |
| United States gold coin .....                                | \$22, 373, 203 |
| Foreign coin .....                                           | 18, 249, 727   |
| Foreign gold bullion .....                                   | 11, 419, 820   |
| Total .....                                                  | 52, 042, 750   |
| From Mexico, Central and South America, and the West Indies: |                |
| United States gold coin .....                                | 2, 337, 163    |
| Foreign coin .....                                           | 6, 807, 616    |
| Foreign gold bullion .....                                   | 717, 366       |
| Total .....                                                  | 9, 862, 145    |
| Grand total of imports .....                                 | 61, 904, 895   |

SUPPLEMENTARY STATEMENT OF IMPORTS OF GOLD COIN AND BULLION AT THE PORT OF NEW YORK FROM JULY 1 TO NOVEMBER 1, 1894.

| Where from.                                  | United States coin. | Foreign coin. | Bullion.   | Total.      |

## STOCK OF MONEY IN THE UNITED STATES.

The following table exhibits the stock of coin in the United States July 1, 1894:

OFFICIAL TABLE OF STOCK OF COIN IN THE UNITED STATES JULY 1, 1894.

| Items.                                                                            | Gold.           | Silver.        | Total.             |
|-----------------------------------------------------------------------------------|-----------------|----------------|--------------------|
| Estimated stock of coin July 1, 1893.....                                         | \$519, 156, 102 | \$496,747, 573 | \$1, 015, 903, 675 |
| Gain, by corrected amount used in the arts, for the first six months of 1893..... | 1, 000, 000     | 50, 000        | 1, 050, 000        |
| Coinage, fiscal year 1894.....                                                    | 99, 474, 913    | 6, 024, 898    | 105, 499, 811      |
| Net imports of United States coin, fiscal year 1894.....                          |                 | 50,382         | 50, 382            |
| Total.....                                                                        | 619, 631, 015   | 502, 872, 853  | 1, 122, 503, 868   |
| Loss:                                                                             |                 |                |                    |
| Net exports of United States coin for fiscal year 1894.....                       | 33, 512, 948    | .....          | 33, 512, 948       |
| United States coin melted for recoinage, fiscal year 1894.....                    | 2, 105, 984     | 7, 189, 720    | 9, 295, 704        |
| United States coin used in the arts, fiscal year 1894.....                        | 1, 500, 000     | 100, 000       | 1, 600, 000        |
| Total.....                                                                        | 37, 118, 932    | 7, 289, 720    | 44, 408, 652       |
| Estimated stock of coin July 1, 1894.....                                         | 582, 512, 083   | 495, 583, 133  | 1, 078, 095, 216   |

The total estimated stock of gold and silver coin in the United States on July 1, 1894, is given in the above table at \$1,078,095,216; gold \$582,512,083, and silver \$495,583,133. Of the silver coin \$419,333,208 were in silver dollars and \$76,249,925 in subsidiary pieces.

As a new estimate was made (Report on the Production of Precious Metals, 1893) of the amount of gold and silver coin used in the arts (\$1,500,000 in gold and \$100,000 in silver yearly, instead of \$3,500,000 in gold and \$200,000 in silver), it will be noticed that the gold coin balance on July 1, 1893, is increased \$1,000,000 and silver coin \$50,000.

The amounts of gold and silver coin melted for recoinage represent their nominal values, the silver coins being worn, subsidiary pieces transferred from the Treasury to the mints, and all mutilated pieces of that class of coin being purchased at the mints or assay offices as bullion.

The value of the gold and silver bullion belonging to the Government in the mints and assay offices on July 1, 1894, was as follows:

BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1894.

| Metals.            | Value.         |
|--------------------|----------------|
| Gold.....          | \$44, 781, 118 |
| Silver (cost)..... | 128, 666, 824  |
| Total.....         | 173, 447, 942  |

The stock of silver bullion as reported on June 30, 1894, on deposit with the Mercantile Safe Deposit Company, in New York City, was 154,674 fine ounces, the commercial value of which was \$97,800, the price of silver at that date being \$0.6323 per ounce fine.

The stock of coin in the United States, the gold and silver bullion belonging to the Government, together with the silver held by the Mer-

mercantile Safe Deposit Company, constituted the total metallic stock of the United States on July 1, 1894, as shown in the following table:

METALLIC STOCK OF THE UNITED STATES JULY 1, 1894.

| Coin and bullion.                                                        | Value.           |
|--------------------------------------------------------------------------|------------------|
| Gold.....                                                                | \$627, 293, 201  |
| Silver (including bullion in mints and Mercantile Safe Deposit Co.)..... | 624, 347, 757    |
| Total .....                                                              | 1, 251, 640, 958 |

The estimated metallic stock of the United States on July 1, 1893, was as follows:

METALLIC STOCK OF THE UNITED STATES, JULY 1, 1893.

| Coin and bullion.                                                         | Value.           |
|---------------------------------------------------------------------------|------------------|
| Gold .....                                                                | \$597, 697, 685  |
| Silver (including bullion in mints and Mercantile Safe Deposit Co.) ..... | 615, 861, 484    |
| Total .....                                                               | 1, 213, 559, 169 |

By comparing the amounts in the above tables it will be noticed that the estimated stock of gold in the United States during the fiscal year increased \$29,595,516, and that of silver \$8,486,273, a total increase of \$38,081,789.

The ownership of the stock of coin and gold and silver bullion in the United States on July 1, 1894, was as follows:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES JULY 1, 1894.

| Ownership.                          | Gold coin and bullion. | Silver coin and bullion. |                         |                 |                 | Total gold and silver coin and bullion. |

\* Includes \$34,023,000 gold clearing-house certificates.

† Includes \$8,438,528 of their own notes held by different national banks.

The amount of silver dollars in actual circulation on July 1, 1894, was \$51,173,035, against \$56,929,673 at the same date the previous year, showing a decrease in the actual circulation of silver dollars of \$5,756,638.

The total amount of money in circulation in the United States on July 1, 1894, excluding the amounts held by the Treasury and the silver bullion held by the Mercantile Safe Deposit Company, was \$1,660,795,694, against \$1,596,701,245 on July 1, 1893, showing an increase of \$64,094,449 during the fiscal year.

The approximate stock of United States coin for November 1, 1894, was as follows:

## STOCK OF GOLD AND SILVER COIN IN THE UNITED STATES NOVEMBER 1, 1894.

| Date.                         | Gold coin.    | Silver coin.    |              |                    | Total gold and silver coin. |
|-------------------------------|---------------|-----------------|--------------|--------------------|-----------------------------|
|                               |               | Silver dollars. | Subsidiary.  | Total silver coin. |                             |
| Stock July 1, 1894 .....      | \$582,512,083 | \$419,333,208   | \$76,249,925 | \$495,583,133      | \$1,078,095,216             |
| Gain or loss since that date. | —914,242      | 2,443,200       | —582,813     | 1,860,387          | 946,145                     |
| Stock Nov. 1, 1894 ...        | 581,597,841   | 421,776,408     | 75,667,112   | 497,443,520        | 1,079,041,361               |

The value of the gold and silver bullion in the mints and assay offices at the same date (November 1, 1894) was as follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES NOVEMBER 1, 1894.

| Metals.      | Cost value.    |
|--------------|----------------|
| Gold .....   | \$45, 034, 237 |
| Silver ..... | 127, 779, 988  |
| Total .....  | 172, 814, 225  |

The amount of silver bullion reported as held in the vaults of the Mercantile Safe Deposit Company at the close of business October 31, 1894, was 174,721 ounces of fine silver bars, the commercial value of which was \$112,043.

This amount, added to the gold and silver bullion in the mints and assay offices and the stock of coin in the United States, gives, approximately, the total metallic stock as follows:

METALLIC STOCK NOVEMBER 1, 1894.

| Coin and bullion.                                               | Amount.          |
|-----------------------------------------------------------------|------------------|
| Gold .....                                                      | \$626, 632, 078  |
| Silver (bullion in mints and Mercantile Safe Deposit Co.) ..... | 625, 335, 551    |
| Total .....                                                     | 1, 251, 967, 629 |

The following table exhibits the amount of metallic and paper money in the United States and the location of the same on November 1, 1894:

LOCATION OF THE MONEYS OF THE UNITED STATES NOVEMBER 1, 1894.

| Moneys.                                      | In Treasury.   | Outside of Treasury. | Total.           |

| <b>PAPER.</b>                                |              |                      |               |
| Legal-tender notes (old issue) .....         | 24,788,988   | 321,892,028          | 346,681,016   |
| Legal-tender notes (act of July 14, 1890) .. | 1,916,606    | 150,818,582          | 152,735,188   |
| Gold certificates .....                      | 115,860      | 78,889,309           | 79,005,169    |
| Silver certificates .....                    | 7,727,272    | 325,717,232          | 333,444,504   |
| National-bank notes .....                    | 11,566,766   | 197,745,227          | 209,311,993   |
| Currency certificates .....                  | 100,000      | 22,325,000           | 22,425,000    |
| Total .....                                  | 46,215,492   | 1,097,387,378        | 1,143,602,870 |

A comparison of the above tables, dated November 1, 1893, and November 1, 1894, shows a decrease in the Treasury in the amount of coin and bullion of \$36,233,056; in gold certificates of \$59,580; in silver certificates of \$1,158,069; and in national-bank notes of \$6,596,578.

There was an increase in the Treasury in silver coin and bullion of \$7,551,216 (of which \$68,292 was in silver bullion; \$4,726,006 in silver dollars, and \$2,756,918 in subsidiary silver coin; in legal-tender notes (all issues) of \$67,925,889; and in currency certificates of \$180,000; showing a total net increase in the Treasury of \$31,609,822.

The same comparison shows a decrease outside of the Treasury in silver coin and bullion of \$6,345,244 (of which \$2,282,148 was in silver dollars and \$4,066,808 in subsidiary silver coins); in legal-tender notes (all issues) of \$69,520,509; and in gold certificates of \$14,637,240; while there was an increase in gold coin of \$2,059,701; in silver certificates of \$5,426,069; in national-bank notes of \$4,849,675; and in currency certificates of \$31,720,000; a total net decrease of \$46,447,548.

MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

The following table of the monetary systems and the approximate stock of gold, silver, and uncovered paper money in the principal countries of the world has been compiled from the latest information obtainable, and, while necessarily but an estimate, is believed to show approximately the stock of money in the world:

## MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE AGGRE

| Countries.              | Monetary system. | Ratio between gold and full legal-tender silver. | Ratio between gold and limited-tender silver. | Population. | Stock of gold. |
|-------------------------|------------------|--------------------------------------------------|-----------------------------------------------|-------------|----------------|
| United States <i>a</i>  | Gold and silver  | 1 to 15.98                                       | 1 to 14.95                                    | 68,900,000  | \$826,600,000  |
| United Kingdom          | Gold             |                                                  | 1 to 14.28                                    | 38,800,000  | b 550,000,000  |
| France                  | Gold and silver  | 1 to 15½                                         | 1 to 14.38                                    | 38,300,000  | b 825,000,000  |

## GOLD AND SILVER USED IN THE INDUSTRIAL ARTS.

As has been the custom in past years, inquiries have been made for the purpose of ascertaining the amount and value of gold and silver used in the industrial arts in the United States during the calendar year 1893.

Statements have been received from Government institutions and from private refineries showing the amount and value of the gold and silver bars sold to manufacturers and jewelers for use in the arts, and, as nearly as possible, the material used in the manufacture of such bars.

The quantity and value of gold and silver bars furnished manufacturers and jewelers by the United States assay office at New York during the calendar year 1893 are as follows:

## BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY OFFICE AT NEW YORK DURING THE CALENDAR YEAR 1893.

| Material used.              | Gold.        |             | Silver.      |                |
|-----------------------------|--------------|-------------|--------------|----------------|
|                             | Fine ounces. | Value.      | Fine ounces. | Coining value. |
| Domestic bullion .....      | 276,095.152  | \$5,707,393 | 3,597,965    | \$4,651,915    |
| United States coin .....    | 21.012       | 434         | .....        | .....          |
| Foreign material .....      | 38,905.773   | 804,254     | 1,346,326    | 1,740,704      |
| Old plate, jewelry, etc ... | 91,083.171   | 1,882,856   | 387,451      | 500,946        |
| Total .....                 | 406,105.108  | 8,394,937   | 5,331,742    | 6,893,565      |

The following table exhibits the quantity and value of bars furnished by the mint at Philadelphia for use in the industrial arts during the calendar year 1893:

## VALUE AND WEIGHT OF GOLD AND SILVER BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES MINT AT PHILADELPHIA DURING THE CALENDAR YEAR 1893.

| Material used.           | Bars manufactured. |             |              |                |
|--------------------------|--------------------|-------------|--------------|----------------|
|                          | Gold.              |             | Silver.      |                |
|                          | Fine ounces.       | Value.      | Fine ounces. | Coining value. |
| Domestic bullion .....   | 48,875.884         | \$1,010,354 | 1,876        | \$2,426        |
| United States coin ..... | 1,955.052          | 40,415      | .....        | .....          |
| Jewelry, etc .....       | 3,824.575          | 79,061      | 9,456        | 12,226         |
| Total .....              | 54,655.511         | 1,129,830   | 11,332       | 14,652         |

The amounts of gold and silver furnished during the calendar year 1893 by private refineries for use in the industrial arts have been obtained by inquiries sent in the form of a circular letter to 49 firms, 47 of which replied.

Of the number replying, 18 reported that no bars were manufactured by them during the year. The weight and value of the bars manufactured by the remaining 29 firms are given below:

**BARs FOR INDUSTRIAL USE FURNISHED GOLDSMITHS AND OTHERS BY PRIVATE REFINERIES DURING THE CALENDAR YEAR 1893.**

| Material used.                                           | Gold bars manufactured. |               | Silver bars manufactured. |                |
|----------------------------------------------------------|-------------------------|---------------|---------------------------|----------------|
|                                                          | Fine ounces.            | Value.        | Fine ounces.              | Coining value. |
| Domestic bullion (exclusive of United States bars) ..... | 79, 177. 056            | \$1, 636, 735 | 1, 482, 212               | \$1, 916, 396  |
| United States bars .....                                 | 62, 248. 514            | 1, 286, 791   | 642, 690                  | 830, 953       |
| United States coin .....                                 | 26, 450. 144            | 546, 773      |                           |                |
| Old plate, jewelry, and other old material .....         | 39, 437. 622            | 815, 248      | 548, 881                  | 709, 664       |
| Total .....                                              | 207, 313. 336           | 4, 285, 547   | 2, 673, 783               | 3, 457, 013    |

In the above table it will be noticed that the amounts of "United States bars," that is, bars bearing the stamp of the mint at Philadelphia or assay office at New York, furnished by private refineries for industrial uses during the year were: Gold, \$1,286,791; silver, \$830,953.

As these bars are included in the amounts reported to the Bureau by the Philadelphia mint and New York assay office, it is necessary to eliminate the item representing them from the amounts reported by private refineries.

The weight and value of gold and silver bars other than those bearing the stamp of the mint at Philadelphia or assay office at New York are given in the following table:

**BARs FOR INDUSTRIAL USE (EXCLUSIVE OF GOVERNMENT BARS) FURNISHED GOLDSMITHS AND OTHERS BY PRIVATE REFINERIES DURING THE CALENDAR YEAR 1893.**

| Material.                                        | Gold bars manufactured. |               | Silver bars manufactured. |                |
|--------------------------------------------------|-------------------------|---------------|---------------------------|----------------|
|                                                  | Fine ounces.            | Value.        | Fine ounces.              | Coining value. |
| Domestic bullion .....                           | 79, 177. 056            | \$1, 636, 735 | 1, 482, 212               | \$1, 916, 396  |
| United States coin .....                         | 26, 450. 144            | 546, 773      |                           |                |
| Old plate, jewelry, and other old material ..... | 39, 437. 622            | 815, 248      | 548, 881                  | 709, 664       |
| Total .....                                      | 145, 064. 822           | 2, 998, 756   | 2, 031, 093               | 2, 626, 060    |

The value of the gold and silver bars furnished for industrial uses by Government and private refineries during the calendar year 1893 was as follows:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ART DURING THE CALENDAR YEAR 1893, AND CLASSIFICATION OF THE MATERIAL USED.

| Material.                      | Gold.       | Silver.     | Total.       |
|--------------------------------|-------------|-------------|--------------|
| Domestic bullion .....         | \$8,354,482 | \$6,570,737 | \$14,925,219 |
| United States coin .....       | 587,622     |             | 587,622      |
| Foreign bullion and coin ..... | 804,254     | 1,740,704   | 2,544,958    |
| Old material .....             | 2,777,165   | 1,222,836   | 4,000,001    |
| Total .....                    | 12,523,523  | 9,534,277   | 22,057,800   |

For the purpose of comparison, the following table, exhibiting the value of gold and silver furnished for industrial uses by Government institutions and private refineries during the calendar year 1892, is given:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1892, AND CLASSIFICATION OF THE MATERIAL USED.

| Material.                      | Gold.        | Silver.     | Total.       |
|--------------------------------|--------------|-------------|--------------|
| Domestic bullion .....         | \$10,588,703 | \$7,204,210 | \$17,792,913 |
| United States coin .....       | 787,334      | 5,152       | 792,486      |
| Foreign bullion and coin ..... | 771,686      | 1,249,801   | 2,021,487    |
| Old material .....             | 4,468,685    | 647,377     | 5,116,062    |
| Total .....                    | 16,616,408   | 9,106,540   | 25,722,948   |

By comparing the tables for the two years, it will be seen that there has been a decrease in the value of gold employed in the industrial arts during the calendar year 1893 of \$4,093,000, while the value of silver thus employed has increased \$428,000.

The amount of United States gold coin reported as having been used in the manufacture of bars for industrial purposes was \$587,622.

No United States silver coin was reported as having been used for such purpose.

It will be observed that the amount of gold coin actually consumed in the manufacture of bars for industrial uses, as reported by private refineries and Government institutions, was a little over one-seventh of the amount heretofore estimated to have been used annually for this purpose, namely, \$3,500,000, which estimate (made some years ago) was based on four censuses taken by this Bureau. It is believed that now \$1,500,000 would be a very liberal estimate of the amount of United States gold coin used in the arts annually, and considering the fact that fine gold bars of the weight of 5 ounces and upward, are manufactured by the Government institutions for use in the industrial arts, can be readily obtained by manufacturers and jewelers, and the further fact that by using bars they are subjected to no loss from abrasion, as would be the case if coin were used; it, therefore, seems reasonable to believe that manufacturers and jewelers would much prefer to use bullion in the shape of bars rather than coin.

In regard to United States silver coin used in the arts it is plain that manufacturers, who can buy silver bullion at the prevailing low price,

prefer its use to that of coin. The bullion value of the silver dollar, at the average price of silver for the calendar year 1893, was 60 cents, and for this same dollar the manufacturer or jeweler could go into the market and buy 619 grains of fine silver.

It is not likely, therefore, that he would use coin when bullion can be so readily and cheaply obtained.

The estimate heretofore made of the amount of United States silver coin used annually in the arts was \$200,000, which evidently is too high, from the fact that at no time since this estimate was made has the bullion value of the silver dollar been equal to 100 cents, much less the bullion value of the subsidiary coins, which contain less silver in proportion.

In accordance with these facts, it is believed that the amount of United States silver coin consumed annually in the arts does not exceed, if, indeed, it reaches, \$100,000.

Making these allowances for the total amount of United States gold and silver coin, respectively, used in the arts, the table showing the industrial consumption of the precious metals in the United States in 1893 would have to be modified thus:

| Material.                      | Gold.       | Silver.     | Total.       |
|--------------------------------|-------------|-------------|--------------|
| Domestic bullion .....         | \$8,354,482 | \$6,570,737 | \$14,925,219 |
| United States coin .....       | 1,500,000   | 100,000     | 1,600,000    |
| Foreign bullion and coin ..... | 804,254     | 1,740,704   | 2,544,958    |
| Old material .....             | 2,777,165   | 1,222,836   | 4,000,001    |
| Total .....                    | 13,435,901  | 9,634,277   | 23,070,178   |

GOLD BARS FOR USE IN THE INDUSTRIAL ARTS EXCHANGED FOR GOLD COIN,  
CALENDAR YEAR 1893.

| Month.          | Philadelphia. | New York.    | Total.       |
|-----------------|---------------|--------------|--------------|

| Old plate jewelry, etc ..... | 65,899.877   | 1,362,271.38 | 394,632.83   | 510,232.34     |
| Total .....                  | 292,709.979  | 6,050,852.30 | 5,105,727.99 | 6,601,345.28   |

It will be seen by the above table that the value of the gold bars manufactured by Government institutions during the fiscal year 1894 was \$6,050,852, a decrease of \$6,945,639 (or over 53 per cent) as compared with the amount manufactured during the fiscal year 1893.

The value of the silver bars manufactured was \$6,601,345, a decrease of \$842,376 (or over 11 per cent) as compared with the previous fiscal year.

In the Appendix (p. 302) will be found a table showing the value and description of the gold and silver employed in the industrial arts in the United States for the years 1880-1893, inclusive, giving the items of each year separately.

## PRODUCT OF GOLD AND SILVER.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1893 were presented in a special report to Congress on that subject, according to which they were as follows:

## PRODUCT OF MINES OF THE UNITED STATES, 1893.

| Metals.     | Fine ounces. | Value.       |
|-------------|--------------|--------------|
| Gold.....   | 1,739,323    | \$35,955,000 |
| Silver..... | 60,000,000   | *77,575,757  |
| Total.....  |              | 113,530,757  |

\* Coining value.

The distribution of the product of our own mines among producing States and Territories was approximately as follows:

APPROXIMATE DISTRIBUTION BY PRODUCING STATES AND TERRITORIES OF THE PRODUCT OF GOLD AND SILVER IN THE UNITED STATES FOR THE CALENDAR YEAR 1893, AS ESTIMATED BY THE DIRECTOR OF THE MINT.

| State or Territory. | Gold.        |             | Silver.      |                | Total value. |
|---------------------|--------------|-------------|--------------|----------------|--------------|
|                     | Fine ounces. | Value.      | Fine ounces. | Coining value. |              |
| Alaska.....         | 48,863       | \$1,010,100 | 9,600        | \$12,412       | \$1,022,512  |
| Arizona.....        | 57,286       | 1,184,200   | 2,935,700    | 3,795,652      | 4,979,852    |
| California.....     | 584,370      | 12,080,000  | 470,100      | 607,806        | 12,687,806   |
| Colorado.....       | 364,119      | 7,527,000   | 25,838,600   | 33,407,483     | 40,934,483   |
| Georgia.....        | 4,702        | 97,200      | 500          | 646            | 97,846       |
| Idaho.....          | 79,669       | 1,646,900   | 3,910,700    | 5,056,259      | 6,703,159    |
| Michigan.....       | 2,032        | 42,000      | 43,500       | 56,242         | 98,242       |
| Montana.....        | 172,989      | 3,576,000   | 16,906,400   | 21,858,780     | 25,434,780   |
| Nevada.....         | 46,367       | 958,500     | 1,561,300    | 2,018,651      | 2,977,151    |
| New Mexico.....     | 44,171       | 913,100     | 458,400      | 592,679        | 1,505,779    |
| North Carolina..... | 2,593        | 53,600      | 13,400       | 17,325         | 70,925       |
| Oregon.....         | 79,592       | 1,645,300   | 11,800       | 15,257         | 1,660,557    |
| South Carolina..... | 5,998        | 124,000     | 500          | 646            | 124,646      |
| South Dakota.....   | 193,809      | 4,006,400   | 140,400      | 181,527        | 4,187,927    |
| Texas.....          |              |             | 349,400      | 451,750        | 451,750      |
| Utah.....           | 41,293       | 853,600     | 7,196,300    | 9,304,307      | 10,157,907   |
| Washington.....     | 10,744       | 222,100     | 152,700      | 197,430        | 419,530      |
| Alabama.....        |              |             |              |                |              |
| Maryland.....       |              |             |              |                |              |
| Tennessee.....      |              |             |              |                |              |
| Virginia.....       | 726          | 15,000      | 700          | 905            | 15,905       |
| Vermont.....        |              |             |              |                |              |
| Wyoming.....        |              |             |              |                |              |
| Total.....          | 1,739,323    | 35,955,000  | 60,000,000   | 77,575,757     | 113,530,757  |

In the Appendix (p. 290) will be found a table showing the annual product of gold and silver from the mines of the United States since 1792.

A summary of the world's production of gold and silver for the years 1891, 1892, and 1893 will be found in the following table.

WORLD'S PRODUCTION OF THE PRECIOUS METALS.

| Calendar years. | Gold.         | Silver.       |
|-----------------|---------------|---------------|
| 1891.....       | \$130,650,000 | \$177,352,300 |
| 1892.....       | 146,297,600   | 197,740,700   |
| 1893.....       | 157,228,100   | 209,165,000   |

A table compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of the principal countries of the world for the calendar years 1891, 1892, and 1893, will be found in the Appendix (p. 292).

For the sake of uniformity the value of silver has, as heretofore, been calculated at its coining rate, viz, \$1.2929+ per fine ounce.

The following table exhibits the estimated product of the precious metals in the world for each calendar year since 1873:

PRODUCTION OF GOLD AND SILVER IN THE WORLD FOR THE CALENDAR YEARS 1873-1893.

| Calendar years. | Gold.        | Silver.             |                   |                |
|-----------------|--------------|---------------------|-------------------|----------------|
|                 |              | Fine ounces (troy). | Commercial value. | Coining value. |
| 1873.....       | \$96,200,000 | 63,267,000          | \$82,120,000      | \$81,800,000   |
| 1874.....       | 90,750,000   | 55,300,000          | 70,673,000        | 71,500,000     |
| 1875.....       | 97,500,000   | 62,262,000          | 77,578,000        | 80,500,000     |
| 1876.....       | 103,700,000  | 67,753,000          | 78,322,000        | 87,600,000     |
| 1877.....       | 114,000,000  | 62,648,000          | 75,240,000        | 81,000,000     |
| 1878.....       | 119,000,000  | 73,476,000          | 84,644,000        | 95,000,000     |
| 1879.....       | 109,000,000  | 74,250,000          | 83,383,000        | 96,000,000     |
| 1880.....       | 106,500,000  | 74,791,000          | 85,636,000        | 96,700,000     |
| 1881.....       | 103,000,000  | 78,890,000          | 89,777,000        | 102,000,000    |
| 1882.....       | 102,000,000  | 86,470,000          | 98,230,000        | 111,800,000    |
| 1883.....       | 95,400,000   | 89,177,000          | 98,986,000        | 115,300,000    |
| 1884.....       | 101,700,000  | 81,597,000          | 90,817,000        | 105,500,000    |
| 1885.....       | 108,400,000  | 91,652,000          | 97,564,000        | 118,500,000    |
| 1886.....       | 106,000,000  | 93,276,000          | 92,772,000        | 120,600,000    |
| 1887.....       | 105,775,000  | 96,124,000          | 94,031,000        | 124,281,000    |
| 1888.....       | 110,197,000  | 108,827,000         | 102,283,000       | 140,706,000    |
| 1889.....       | 123,489,000  | 120,213,600         | 112,399,700       | 155,427,700    |
| 1890.....       | 118,848,700  | 126,095,000         | 132,399,700       | 163,032,000    |
| 1891.....       | 130,650,000  | 137,170,900         | 135,524,800       | 177,352,300    |
| 1892.....       | 146,297,600  | 152,940,100         | 133,822,600       | 197,740,700    |
| 1893.....       | 157,228,100  | 161,776,100         | 126,185,300       | 209,165,000    |

The silver product is given at its commercial value, reckoned at the average market price of silver each year, as well as its coining value in United States dollars.

In the Appendix (p. 304) will be found a table showing the production of gold and silver in the world for the calendar years 1493-1893.

## WORLD'S COINAGE.

In the Appendix (p. 291) will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1891, 1892, and 1893.

The following is a summary of the same:

| Calendar years. | Gold.         | Silver.       |
|-----------------|---------------|---------------|
| 1891.....       | \$119,534,122 | \$138,294,367 |
| 1892.....       | 172,473,124   | 153,700,697   |
| 1893.....       | 232,485,668   | 135,389,753   |

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years therein named.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

## WORLD'S RECOINAGES.

The following table, compiled from official sources, exhibits approximately the recoinages of gold and silver of the principal countries of the world for 1892 and 1893, so far as the same has been reported to this Bureau:

## GOLD AND SILVER RECOINAGES REPORTED BY THE PRINCIPAL COUNTRIES OF THE WORLD DURING THE CALENDAR YEARS 1892 AND 1893.

[Value expressed in United States money.]

| Countries.            | 1892.      |             | 1893.       |             |
|-----------------------|------------|-------------|-------------|-------------|
|                       | Gold.      | Silver.     | Gold.       | Silver.     |
| United States .....   | \$558,334  | \$8,275,440 | \$1,717,957 | \$5,952,389 |
| Great Britain .....   | 84,521,980 | 1,105,747   | 30,658,950  | 1,431,296   |

| Total .....           | 14,733,563  | 3,047,152 | 12,979,069   | 1,828,803   |

## VALUE OF FOREIGN COINS.

## The law requires:

That the value of foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement, the values of foreign coins have been estimated and proclaimed as follows:

VALUES OF FOREIGN COINS, JANUARY 1, 1894, UNDER THE PROVISIONS OF THE ACT OF OCTOBER 1, 1890.

| Country.                                         | Standard.        | Monetary unit.                        | Value in terms of United States gold dollar. | Coins.                                                                                                                                 |
|--------------------------------------------------|------------------|---------------------------------------|----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Argentine Republic.                              | Gold and silver. | Peso .....                            | \$0.96, 5                                    | Gold: argentine (\$4.82, 4) and $\frac{1}{2}$ argentine. Silver: peso and divisions.                                                   |
| Austria-Hungary.                                 | Gold .....       | Crown .....                           | .20, 3                                       | Gold: former system—4 florins (\$1.92, 9), 8 florins (\$3.85, 8), ducat (\$2.28, 7) and 4 ducats (\$9.15, 8). Silver: 1 and 2 florins. |
| Belgium .....                                    | Gold and silver. | Franc .....                           | .19, 3                                       | Gold: present system—20 crowns (\$4.05, 2) and 10 crowns (\$2.02, 6). Gold: 10 and 20 francs. Silver: 5 francs.                        |
| Bolivia .....                                    | Silver .....     | Boliviano .....                       | .51, 6                                       | Silver: boliviano and divisions.                                                                                                       |
| Brazil .....                                     | Gold .....       | Milreis .....                         | .54, 6                                       | Gold: 5, 10, and 20 milreis. Silver: $\frac{1}{2}$ , 1, and 2 milreis.                                                                 |
| British Possessions N. A. (except Newfoundland). | .....do .....    | Dollar .....                          | 1.00                                         |                                                                                                                                        |
| Central American States:                         |                  |                                       |                                              |                                                                                                                                        |

\* Gold the nominal standard. Silver practically the standard.

† Coined since January 1, 1886. Old half imperial = \$3.98, 6.

‡ Silver the nominal standard. Paper the actual currency, the depreciation of which is measured by the gold standard.

In the Appendix (p. 299) a table will be found exhibiting the changes in the estimates of the values of foreign coins, from January 1, 1880, to October 1, 1894.

## ASSAY LABORATORY, BUREAU OF THE MINT.

The assay office of the Bureau has been fully occupied during the year in testing the sample coins taken from each delivery by the coiners to the superintendents of the various mints.

The final adjudication of the fineness and weight of all coins produced at the mints lies, of course, with the annual assay commission, but meanwhile the avoidance of possible issuance of coins outside the legal weight and fineness is secured by prompt testing of all deliveries made by the coiners.

The unusually large gold coinage of the year has added much to the work required of the Bureau laboratory. Three hundred and ninety-nine gold coins and silver coins from 352 deliveries were assayed.

The following table shows, according to the mints, the number of coins assayed at the Bureau, and also by the annual assay commission, with the average fineness:

NUMBER OF DELIVERIES AND AVERAGE FINENESS OF GOLD AND SILVER COINS OF THE UNITED STATES TESTED AT THE BUREAU OF THE MINT AND BY THE ANNUAL ASSAY COMMISSION.

| Institutions.       | Gold.                  |                   |                                         |                   | Silver.                |                   |                                         |                   |

| New Orleans .....   | 53                     | 900.08            | 6                                       | 899.99            | 120                    | 899.97            | 11                                      | 899.94            |
| Carson .....        | 32                     | 899.98            | 5                                       | 899.96            | 35                     | 900.21            | 5                                       | 900.64            |
| Total .....         | 399                    | 899.99            | 38                                      | 899.93            | 352                    | 900.02            | 39                                      | 899.89            |

It will be seen that all were within the legal requirements.

In September, 1893, two half eagles were received from the New Orleans mint which showed on assay that cuttings from the same piece varied in fineness from .899 to .900,3. This being entirely unusual in the assay of standard gold, five additional pieces from the same delivery were asked for and furnished by the superintendent at New Orleans.

A large number of assays was made from these pieces, with the same strange results, fully confirming the accuracy of the previous work. A mass melt was made of the residue of these coins, and after a thorough mixing an ingot was obtained of uniform fineness showing only .899,5.

The issue of these coins was stopped, and Mr. Cabell Whitehead, the assayer to the Mint Bureau, was instructed to proceed to New Orleans and ascertain, if possible, the cause of this apparent "segregation" in gold bullion. One lot of \$125,000 in half eagles was melted into ingots. A remelting was found necessary before a uniform assay could be obtained, and this showed a fineness of only .899,5, although the ingots from which the coins were originally made were passed at .900.

The mint at Philadelphia, working on bullion of the same description, suffered from an unusual number of melts condemned as "not mixed." Attention was naturally attracted to the history of the bul-

lion which caused the trouble, and it was found that the bars sent to New Orleans and the Philadelphia mint were made several years ago at the New York assay office from foreign coin—chiefly Spanish. It was not refined, the natural supposition being that it was suitable for coinage, although it is now recalled that some difficulty was experienced in getting uniform assays.

The facts seemed to indicate the presence of some unusual element in this bullion, which only a complete analysis would reveal. The following table shows two such analyses made by the assayer of the Bureau. One is from a sample of the bullion sent to New Orleans, and the other is of coin made at the Philadelphia mint from bullion of the same character:

| Metals.                 | New Orleans<br>coin made<br>(from Spanish<br>coins). | Philadelphia<br>coin made<br>(from Spanish<br>coins). |
|-------------------------|------------------------------------------------------|-------------------------------------------------------|
| Gold .....              | 896.300                                              | 900.200                                               |

| Iron .....              | .062                                                 | .030                                                  |
| Platinum .....          | .047                                                 | .047                                                  |
| Lead .....              | Trace.                                               | Trace.                                                |
| Bismuth .....           | Trace.                                               | Trace.                                                |
| Arsenic .....           | Trace.                                               | .0002                                                 |
| Antimony .....          | .0013                                                | .0014                                                 |
| Tin .....               |                                                      | Trace.                                                |
| Zinc .....              | .015                                                 | .050                                                  |
| Nickel and cobalt ..... | .001                                                 | .006                                                  |
|                         | 1000                                                 | 1000                                                  |

The presence of zinc, nickel, and cobalt is unusual in gold bullion. The percentage of iron shown by the assays is a little higher than usual, but the presence of even larger quantities of this metal has not been found to cause segregation in gold ingots. We have not the same assurance as to the effect of zinc even in small quantities, and it is believed that the troublesome and anomalous results above mentioned may be fairly attributed to the presence of zinc in the bullion.

#### ANNUAL TRIAL OF COINS.

In conformity with section 3547 of the Revised Statutes the following Commissioners were appointed by the President to examine and test the fineness and weight of the gold and silver coins of the coinage of the calendar year 1893: Hon. D. W. Voorhees, Finance Committee, United States Senate; Hon. C. W. Stone, Committee on Coinage, Weights, and Measures, House of Representatives; Henry D. Welsh, esq., Pennsylvania; Horatio C. Burchard, esq., Illinois; Prof. J. A. Quarles, Virginia; Prof. Frederick Prime, Pennsylvania; Andrew Mason, esq., New York; Cabell Whitehead, esq., District of Columbia; Girault Farrar, esq., Louisiana; J. W. Ellsworth, esq., Illinois; Prof. George T. Winston, North Carolina; Prof. Arthur L. Perry, Massachusetts; L. Clarke Davis, esq., Pennsylvania; Talfouad P. Linn, esq., Ohio; John W. Woodside, esq., Pennsylvania.

The Commission met at Philadelphia on February 14, 1894, with the exception of Messrs. Butler, Voorhees, and Stone, all of the Commissioners being present, together with the following ex-officio Commis-

sioners: James H. Eckels, esq., Comptroller of the Currency, and Herbert G. Torrey, assayer, United States assay office, New York.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the Mint of all transcripts sent him by the several superintendents, with the exception that in delivery 243 from the New Orleans mint \$5 (in half dollars) in excess were found.

The quantities of coin reserved at the several mints for the purposes of the Commission were as follows:

| Mints.                      | Pieces. | Value.        |
|-----------------------------|---------|---------------|
| <b>GOLD.</b>                |         |               |
| Philadelphia.....           | 3, 790  | \$33, 495. 00 |
| San Francisco.....          | 1, 364  | 22, 490. 00   |
| Carson.....                 | 94      | 840. 00       |
| New Orleans.....            | 128     | 730. 00       |
| Total.....                  | 5, 376  | 57, 555. 00   |
| <b>SILVER.</b>              |         |               |
| Philadelphia.....           | 7, 558  | 2, 519. 15    |
| San Francisco.....          | 2, 394  | 541. 60       |
| Carson.....                 | 339     | 339. 00       |
| New Orleans.....            | 3, 423  | 1, 010. 00    |
| Total.....                  | 13, 714 | 4, 409. 75    |
| Total pieces and value..... | 19, 090 | 61, 964. 75   |

The committee on assaying reported:

In compliance with section 3547 of the Revised Statutes we have taken samples of the coins reserved from time to time at the United States mints at Philadelphia, San Francisco, Carson, and New Orleans for assay.

These samples represent the various deliveries made by the coiners to the superintendents of the several mints during the calendar year 1893.

The result of the assays made of the individual coins, and of the same in mass, are given in the following schedules.

From these it will be seen that the greatest excess in the assay value of the gold coinage above standard at the different mints (the limit of tolerance being one-thousandth) is at—

|                    |        |
|--------------------|--------|
| Philadelphia.....  | 900. 1 |
| San Francisco..... | None.  |
| New Orleans.....   | 900. 2 |
| Carson.....        | 900. 3 |

The greatest deficiency below standard (the limit of tolerance being one-thousandth) is at—

|                    |        |
|--------------------|--------|
| Philadelphia.....  | 899. 8 |
| San Francisco..... | 899. 4 |
| New Orleans.....   | 899. 8 |
| Carson.....        | 899. 8 |

The greatest excess in silver coins above standard (the limit of tolerance being three-thousandths) is at—

|                    |        |
|--------------------|--------|
| Philadelphia.....  | 900. 4 |
| San Francisco..... | 900. 2 |
| New Orleans.....   | 901. 3 |
| Carson.....        | 901. 6 |

The greatest deficiency below standard (the limit of tolerance being three-thousandths) is at—

|                    |        |
|--------------------|--------|
| Philadelphia.....  | 899. 3 |
| San Francisco..... | 899. 6 |
| New Orleans.....   | 899. 1 |
| Carson.....        | 900    |

The assay committee also tested the quartation of silver and the lead used in the assay of gold bullion and found them free from gold.

The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were also tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedules to be trustworthy.

#### The committee on weighing reported:

From the results shown the committee on weighing recommends that the trial of the weights of the coinage of the mints of 1893 be considered and reported satisfactory.

The result of the annual test is contained in the following resolution adopted by the Commission:

*Resolved*, That the assay commission having examined and tested the reserved coins of the several mints of the United States for the year 1893, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered, and hereby reported, satisfactory.

*Resolved further*, That the assay commission having compared the standard weights in use in the mint with the standard troy pound, and having found them to be correct, the comparison and test is hereby reported to be satisfactory.

### COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS.

#### GOLD COINS.

##### DOUBLE EAGLE.

Authorized to be coined, act of March 3, 1849.

Weight, 516 grains; fineness, .900.

Total amount coined to June 30, 1894, \$1,200,606,980.

##### EAGLE.

Authorized to be coined, act of April 2, 1792.

Weight, 270 grains; fineness, .916 $\frac{2}{3}$ .

Weight changed, act of June 28, 1834, to 258 grains.

Fineness changed, act of June 28, 1834, to .899, 225.

Fineness changed, act of January 18, 1837, to .900.

Total amount coined to June 30, 1894, \$252,662,960.

##### HALF EAGLE.

Authorized to be coined, act of April 2, 1792.

Weight, 135 grains; fineness, .916 $\frac{2}{3}$ .

Weight changed, act of June 28, 1834, to 129 grains.

Fineness changed, act of June 28, 1834, to .899, 225.

Fineness changed, act of January 18, 1837, to .900.

Total amount coined to June 30, 1894, \$208,820,815.

##### QUARTER EAGLE.

Authorized to be coined, act of April 2, 1792.

Weight, 67.5 grains; fineness, .916 $\frac{2}{3}$ .

Weight changed, act of June 28, 1834, to 64.5 grains.

Fineness changed, act of June 28, 1834, to .899, 225.

Fineness changed, act of January 18, 1837, to .900.

Total amount coined to June 30, 1894, \$28,670,820.

##### THREE-DOLLAR PIECE.

Authorized to be coined, act of February 21, 1853.

Weight, 77.4 grains; fineness, .900.

Total amount coined to September 26, 1890, \$1,619,376.

Coinage discontinued, act of September 26, 1890.

## ONE DOLLAR.

Authorized to be coined, act of March 3, 1849.  
 Weight, 25.8 grains; fineness, .900.  
 Total amount coined to September 26, 1890, \$19,499,337.  
 Coinage discontinued, act of September 26, 1890.

## SILVER COINS.

## DOLLAR.

Authorized to be coined, act of April 2, 1792.  
 Weight, 416 grains; fineness, .892.4.  
 Weight changed, act of January 18, 1837, to 412½ grains.  
 Fineness changed, act of January 18, 1837, to .900.  
 Coinage discontinued, act of February 12, 1873.  
 Total amount coined to February 12, 1873, \$8,031,238.  
 Coinage reauthorized, act of February 28, 1878.  
 Amount coined from March 1, 1873, to June 30, 1893, \$419,333,208.  
 Total amount coined to June 30, 1893, \$427,364,446.

## TRADE DOLLARS.

Authorized to be coined, act of February 12, 1873.  
 Weight, 420 grains; fineness, .900.  
 Coinage limited to export demand, joint resolution July 22, 1876.  
 Coinage prohibited, act of March 3, 1887.  
 Total amount coined, \$35,965,924.

## HALF DOLLAR.

Authorized to be coined, act of April 2, 1792.  
 Weight, 208 grains; fineness, .892.4.  
 Weight changed, act of January 18, 1837, to 206½ grains.  
 Fineness changed, act of February 18, 1837, to .900.  
 Weight changed, act of February 21, 1853, to 192 grains.  
 Weight changed, act of February 12, 1873, to 12½ grams, or 192.9 grains.  
 Total amount coined to June 30, 1894, \$130,512,383.50.

## COLUMBIAN HALF DOLLAR.

Authorized to be coined, act of August 5, 1892.  
 Weight, 192.9 grains; fineness, .900.  
 Total amount coined, \$2,501,052.50, included in half-dollar coinage.

## QUARTER DOLLAR.

Authorized to be coined, act of April 2, 1792.  
 Weight, 104 grains; fineness, .892.4.  
 Weight changed, act of January 18, 1837, to 103½ grains.  
 Fineness changed, act of January 18, 1837, to .900.  
 Weight changed, act of February 21, 1853, to 96 grains.  
 Weight changed, act of February 12, 1873, to 6½ grams, or 96.45 grains.  
 Total amount coined to June 30, 1894, \$47,198,044.

## COLUMBIAN QUARTER DOLLAR.

Authorized to be coined, act of March 3, 1893.  
 Weight, 96.45 grains; fineness, .900.  
 Total amount coined, \$10,005.75, included in quarter-dollar coinage.

## TWENTY-CENT PIECE.

Authorized to be coined, act of March 3, 1875.  
 Weight, 5 grams, or 77.16 grains; fineness, .900.  
 Coinage prohibited, act of May 2, 1878.  
 Total amount coined, \$271,000.

## REPORT ON THE FINANCES.

## DIME.

Authorized to be coined, act of April 2, 1792.  
 Weight, 41.6 grains; fineness, .892.4.  
 Weight changed, act of January 18, 1837, to 41½ grains.  
 Fineness changed, act of January 18, 1837, to .900.  
 Weight changed, act of February 21, 1853, to 38.4 grains.  
 Weight changed, act of February 12, 1873, to 2½ grains, or 38.58 grains.  
 Total amount coined to June 30, 1894, \$28,480,117.20.

## HALF DIME.

Authorized to be coined, act of April 2, 1792.  
 Weight, 20.8 grains; fineness, .892.4.  
 Weight changed, act of January 18, 1837, to 20½ grains.  
 Fineness changed, act of January 18, 1837, to .900.  
 Weight changed, act of February 21, 1853, to 19.2 grains.  
 Coinage discontinued, act of February 12, 1873.  
 Total amount coined, \$4,880,219.40.

## THREE-CENT PIECE.

Authorized to be coined, act of March 3, 1851.  
 Weight, 12½ grains; fineness, .750.  
 Weight changed, act of March 3, 1853, to 11.52 grains.  
 Fineness changed, act of March 3, 1853, to .900.  
 Coinage discontinued, act of February 12, 1873.  
 Total amount coined, \$1,282,087.20.

## MINOR COINS.

## FIVE CENT (NICKEL).

Authorized to be coined, act of May 16, 1866.  
 Weight, 77.16 grains; composed of 75 per cent copper and 25 per cent nickel.  
 Total amount coined to June 30, 1894, \$13,432,430.95.

## THREE CENT (NICKEL).

Authorized to be coined, act of March 3, 1865.  
 Weight, 30 grains; composed of 75 per cent copper and 25 per cent nickel.  
 Coinage discontinued, act of September 26, 1890.  
 Total amount coined, \$941,349.48.

## TWO CENT (BRONZE).

Authorized to be coined, act of April 22, 1864.  
 Weight, 96 grains; composed of 95 per cent copper and 5 per cent tin and zinc.  
 Coinage discontinued, act of February 12, 1873.  
 Total amount coined, \$912,020.

## CENT (COPPER).

Authorized to be coined, act of April 2, 1792.  
 Weight, 264 grains.  
 Weight changed, act of January 14, 1793, to 208 grains.  
 Weight changed by proclamation of the President, January 26, 1796, in conformity with act of March 3, 1795, to 168 grains.  
 Coinage discontinued, act of February 21, 1857.  
 Total amount coined, \$1,562,887.44.

## CENT (NICKEL).

Authorized to be coined, act of February 21, 1857.  
 Weight, 72 grains; composed of 88 per cent copper and 12 per cent nickel.  
 Coinage discontinued, act of April 22, 1864.  
 Total amount coined, \$2,007,720.

## CENT (BRONZE).

Coinage authorized, act of April 22, 1864.

Weight, 48 grains; composed of 95 per cent copper and 5 per cent tin and zinc.

Total amount coined to June 30, 1894, \$7,351,783.35.

## HALF CENT (COPPER).

Authorized to be coined, act of April 2, 1792.

Weight, 132 grains.

Weight changed, act of January 14, 1793, to 104 grains.

Weight changed by proclamation of the President, January 26, 1796, in conformity with the act of March 3, 1795, to 84 grains.

Coinage discontinued, act of February 21, 1857.

Total amount coined, \$39,926.11.

|                            |                    |
|----------------------------|--------------------|
| Total gold coinage .....   | \$1,711,880,288.00 |

| Grand total .....          | 2,414,082,626.63   |

## MINT AT PHILADELPHIA.

The amount and value of gold and silver received by the mint at Philadelphia during the fiscal year ended June 30, 1894, is shown by the following table:

| Metal.            | Standard ounces. | Coining value.  |
|-------------------|------------------|-----------------|
| Gold .....        | 3,744,425.984    | \$69,663,739.24 |
| Silver .....      | 11,376,986.39    | 13,238,675.07   |
| Total value ..... |                  | 82,902,414.31   |

In addition, 243,200 pounds of minor coinage blanks were received. The number of assays made during the year was as follows:

|                     |        |
|---------------------|--------|
| Gold assays .....   | 27,200 |
| Silver assays ..... | 12,200 |

The value of fine gold and silver bars issued by the mint at Philadelphia, during the fiscal year 1894, for use in the industrial arts, was as follows:

|              |              |
|--------------|--------------|
| Gold .....   | \$728,631.09 |
| Silver ..... | 31,766.62    |

The deposits of gold bullion at the mint at Philadelphia included worn and uncurrent domestic gold coin of the nominal value of \$1,622,446, containing 86,849.070 ounces of standard metal of the coining value of \$1,615,796.65.

The deposits of silver bullion included worn and mutilated domestic silver coin of the nominal value of \$1,696,043.06, which produced, upon melting, 1,297,325.05 ounces of standard metal, the coining value, in subsidiary silver coin, of the same being \$1,614,090.26.

Foreign gold coin containing 747.312 ounces of standard metal of the coining value of \$13,903.48 was received and melted. Foreign silver coin containing 32.79 ounces of standard metal of the coining value of \$38.16 was also received and melted.

The quantity of precious metals operated upon in the metallurgical department was:

| Metals.     | Standard ounces. |
|-------------|------------------|
| Gold.....   | 9,310,254.611    |
| Silver..... | 3,056,809.84     |

The number of melts made in the same department and the number condemned by the assayer during the fiscal year was:

| Metals.     | For bars. | For ingots. |            |
|-------------|-----------|-------------|------------|
|             |           | Made.       | Condemned. |
| Gold.....   | 292       | 1,757       | 134        |
| Silver..... | 358       | 725         | 2          |
| Total.....  | 650       | 2,482       | 136        |

The operations of the refinery of the mint at Philadelphia were as follows:

#### REFINERY OPERATIONS, 1894.

| Bullion.                                        | Gold.                | Silver.              |
|-------------------------------------------------|----------------------|----------------------|
| Gross weight, 1,844,675.673 ounces.             | <i>Standard ozs.</i> | <i>Standard ozs.</i> |
| Refined by acid, standard ounces by assay ..... | 395,068.403          | 1,052,111.42         |
| Returned from refinery .....                    | 394,997.885          | 1,052,295.34         |
| Total.....                                      | 790,066.288          | 2,104,406.76         |
| Value.....                                      | \$14,698,907.68      | \$2,448,764.23       |

At the annual settlement, June 30, 1894, it was found that the wastage of the melter and refiner in operating on 9,310,254.611 ounces of standard gold bullion during the fiscal year was 730.733 ounces standard, or 7.848 per cent of the legal limit of allowance under the provisions of section 8542 of the Revised Statutes of the United States. In operating upon 3,056,809.84 ounces of standard silver during the fiscal year the melter and refiner returned a surplus of 7,173.14 ounces of standard silver.

The operations of the coining department, during the fiscal year 1894, comprising gold and silver, are exhibited in the following table:

| Metals operated on. | Standard ounces. |
|---------------------|------------------|
| Gold.....           | 8,452,167.350    |
| Silver.....         | 2,551,942.35     |

The amount of minor coinage blanks operated upon by the coiner during the year was 4,303,503.20 ounces.

On the settlement of the coiner's accounts at the close of the fiscal year, under the provisions of section 8542 of the Revised Statutes of the United States, it appeared that, in operating upon 8,452,167.350 ounces of standard gold, there was a wastage of 410.429 ounces

standard, or 9.711 per cent of the legal allowance; and in operating upon 2,551,942.35 ounces of standard silver, a wastage of 1,053.68 ounces standard, or 41.29 per cent of the legal allowance.

The coinage executed at the mint at Philadelphia during the fiscal year 1894 was as follows:

| Denomination.            | Pieces.      | Value.             |
|--------------------------|--------------|--------------------|
| <b>GOLD.</b>             |              |                    |
| Double eagles .....      | 1, 713, 257  | \$34, 265, 140. 00 |
| Eagles .....             | 3, 327, 034  | 33, 270, 340. 00   |
| Half eagles .....        | 1, 721, 836  | 8, 609, 180. 00    |
| Quarter eagles .....     | 30, 101      | 75, 252. 50        |
| Total gold .....         | 6, 792, 228  | 76, 219, 912. 50   |
| Standard dollars .....   | 758          | 758. 00            |
| <b>SUBSIDIARY.</b>       |              |                    |
| Half dollars .....       | 1, 416, 758  | 708, 379. 00       |
| Quarter dollars .....    | 2, 812, 758  | 703, 189. 50       |
| Dimes .....              | 2, 050, 758  | 205, 075. 80       |
| Total subsidiary .....   | 6, 280, 274  | 1, 616, 644. 30    |
| Total silver .....       | 6, 281, 032  | 1, 617, 402. 30    |
| <b>MINOR.</b>            |              |                    |
| Five cent (nickel) ..... | 9, 226, 071  | 461, 303. 55       |
| One cent (bronze) .....  | 25, 561, 571 | 255, 615. 71       |
| Total minor .....        | 34, 787, 642 | 716, 919. 26       |
| Total coinage .....      | 47, 860, 902 | 78, 554, 234. 06   |

The percentage of good coin produced from ingots operated on was, gold, 48.4, and silver, 55.3.

The number of medals struck in the same Department for the year was as follows:

**MEDALS MANUFACTURED, 1894.**

| Character.                 | Number. |
|----------------------------|---------|
| Gold .....                 | 84      |
| Silver .....               | 382     |
| Bronze .....               | 916     |
| Bronze (gold plated) ..... | 3, 000  |
| Total .....                | 4, 382  |

Foreign gold and silver coins deposited and melted at the mint at Philadelphia during fiscal year ended June 30, 1894, were as follows:

| Countries of coinage. | Gold.                 | Silver.        |
|-----------------------|-----------------------|----------------|
|                       | Value in U. S. money. | Coining value. |
| Spain .....           | \$885. 67             | \$5. 76        |
| Great Britain .....   | 1, 083. 39            |                |
| Mexico .....          |                       | 31. 42         |
| Mixed .....           | 11, 934. 42           | . 98           |
| Total .....           | 13, 903. 48           | 38. 16         |

Mutilated and uncurrent gold and silver coins of the United States, to the amounts shown in the following table, were deposited and melted at the mint at Philadelphia during the fiscal year ended June 30, 1894:

| Denomination.               | Pieces.   | Face value.  |
|-----------------------------|-----------|--------------|
| <b>GOLD.</b>                |           |              |
| Double eagles .....         | 30,971    | \$619,420.00 |
| Eagles .....                | 33,933    | 339,330.00   |
| Half eagles .....           | 74,580    | 372,900.00   |
| Three-dollar pieces .....   | 49,087    | 147,261.00   |
| Quarter eagles .....        | 57,302    | 143,255.00   |
| Dollars .....               | 280       | 280.00       |
| Total gold .....            | 246,153   | 1,622,446.00 |
| <b>SILVER.</b>              |           |              |
| Trade dollars .....         | 292       | 292.00       |
| Dollars .....               | 2,262     | 2,262.00     |

| Quarter dollars .....       | 4,005,304 | 1,001,326.00 |
| Twenty-cent pieces .....    | 2,638     | 527.60       |
| Dimes .....                 | 1,576,824 | 157,682.40   |
| Half dimes .....            | 63,690    | 3,154.50     |
| Three-cent pieces .....     | 9,502     | 285.06       |
| Total silver .....          | 6,720,939 | 1,696,043.06 |
| Total gold and silver ..... | 6,967,092 | 3,318,489.06 |

Col. O. C. Bosbyshell having resigned as superintendent of the mint, was succeeded by Dr. Eugene Townsend, who entered on duty April 1, 1894.

The bullion, coin, and other moneys necessary to be taken into account in the transfer incident to the change of superintendents amounted to \$187,301,854.20, classified as follows: Gold bullion, \$24,266,094.04; gold coin, \$3,824,217.50; silver bullion, \$107,902,611.40; silver dollars, \$50,275,000; subsidiary silver coin, \$666,924.63, and minor coin, \$344,195.81. The balance, \$22,810.82, represents the value of the gold bullion embezzled by the late weigh clerk, which amount, it is believed, will be recovered from his bondsmen and those of the late superintendent.

Of the above amount, \$161,696,313.41 were in the hands of the superintendent and \$25,582,729.97 in the hands of the operative officers. No verification of latter amount was made at this time, as the bullion was legally in the hands of the operative officers.

Of the silver bullion purchased under the act of July 14, 1890, there were on hand 111,150 bars, containing 118,992,256 ounces of fine silver, costing \$107,702,840.90.

An account of this bullion was taken by weight, and found to correspond with the amount charged. The weighing of the bullion occupied some four months, and was completed at the end of July, 1894.

Upon opening the vault containing the silver dollars, which had been stored in 1890, under the joint seal of a representative of the Mint Bureau and the superintendent of the mint, it was found that nearly all the bags, by reason of the dampness of the vault, had so rotted as to be little else than a mass of shreds. It was impracticable to verify the number of dollars by weight, as is usual in the case of new coins,

on account of their wet and slimy condition, thus rendering it necessary to count them on a counting machine, a slow and tedious work. The count of these dollars is still in progress, under a representative of the Mint Bureau and representatives of the retiring and present superintendent, and will in all probability be completed by the end of December.

There is not only a lack of vault room in the Philadelphia Mint, but some of the vaults are so located that they are difficult of access, inconvenient, and ill-adapted for the storage of coin. The fact of their being situated below the level of the street renders them damp, so much so, that if coin be stored in them for any length of time the result will be mildewed and rotten bags, thus entailing much time and expense to count the coin whenever it becomes necessary to do so.

During the year, three gas-annealing furnaces were erected and put in operation.

The results obtained have been very satisfactory, owing to the uniform heat which the gas produces, and which could not be obtained by wood, as formerly used. There is also a saving of about 20 per cent in the operating expenses.

An electric-light plant has also been added which gives all the illuminating power required at a greatly reduced cost to that formerly supplied by the Edison Light Company, and it is estimated the plant will effect a saving of \$5,000 annually.

Notwithstanding the increased amount of steam required to operate the dynamos, there has been no increase in the consumption of fuel, but on the contrary, the engines and boilers having been thoroughly overhauled, a saving of 33½ per cent in fuel has been effected, 66 tons of coal now producing 115 horsepower as against 95 tons formerly used to produce 75 horsepower, and the amount of ashes has declined nearly one-half.

The annual settlement at the mint at Philadelphia June 30, 1894, was superintended by Mr. Cabell Whitehead, of this Bureau, who reported the settlement as satisfactory.

#### MINT AT SAN FRANCISCO.

The weight and value of gold and silver bullion deposited at the mint at San Francisco during the fiscal year 1894 was as follows:

| Metals.      | Standard ounces. | Value.             |
|--------------|------------------|--------------------|
| Gold .....   | 1, 146, 219. 783 | \$21, 325, 019. 21 |
| Silver ..... | 3, 747, 203. 54  | 4, 360, 382. 30    |
| Total .....  | 4, 893, 423. 323 | 25, 685, 401. 51   |

The number of assays made during the fiscal year was as follows:

| Metals.      | Number. |
|--------------|---------|
| Gold .....   | 35, 000 |
| Silver ..... | 12, 500 |
| Sweeps ..... | 193     |

The deposits of gold bullion, at the mint at San Francisco, included worn and uncurrent domestic gold coin of the nominal value of \$10,737.50, containing 528.307 ounces of standard metal of the coining value of \$9,828.97.

The deposits of silver bullion included worn and mutilated domestic silver coin of the nominal value of \$3,000,078.80, which produced upon melting 2,360,310.10 ounces of standard metal of the coining value, in subsidiary coin, of \$2,936,622.22.

Foreign gold coin containing 81,986.980 ounces of standard metal of the coining value of \$1,525,339.16 was received and melted.

The quantity of precious metals operated upon in the metallurgical department was:

| Metals.     | Standard ounces. |
|-------------|------------------|
| Gold.....   | 2, 136, 351. 158 |
| Silver..... | 6, 713 323. 96   |

The number of melts made in the same department and the number condemned during the year was as follows:

| Metals.     | Melts of Ingots. |                 |
|-------------|------------------|-----------------|
|             | Made.            | Con-<br>demned. |
| Gold.....   | 722              | 2               |
| Silver..... | 2, 952           | 1               |
| Total.....  | 3, 674           | 3               |

No fine silver bars were manufactured during the year.

The operations of the refinery at the mint at San Francisco were as follows:

#### REFINERY OPERATIONS, 1894.

| Bullion.    | Standard<br>ounces. | Value.            |
|-------------|---------------------|-------------------|
| Gold.....   | 181, 112. 956       | \$3, 369, 543. 37 |
| Silver..... | 146, 115. 63        | 163, 043. 64      |
| Total.....  |                     | 3, 532, 587. 01   |

The bullion melted for coinage during the same period being 2,105,626.930 ounces of standard gold and 4,935,909.75 ounces of standard silver.

Upon the annual settlement of the melter and refiner's accounts, he returned a surplus of 860.627 ounces of standard gold, valued at \$16,011.66, and 3,695.21 ounces of standard silver, valued at \$2,081.32.

At the annual settlement of the coiner's accounts, at the close of the fiscal year, under the provisions of section 8542 of the Revised Statutes of the United States, it appears that in operating upon 2,169,608.570 ounces of standard gold there was a wastage of 139.318 ounces stand-

ard, or 12.842 per cent of the legal allowance, and in operating upon 5,128,998.07 ounces of standard silver there was a wastage of 968.78 ounces standard, or 18.88 per cent of the legal allowance.

COINAGE EXECUTED AT THE MINT AT SAN FRANCISCO, FISCAL YEAR 1894.

| Denomination.        | Pieces.     | Value.             |
|----------------------|-------------|--------------------|
| <b>GOLD.</b>         |             |                    |
| Double eagles.....   | 1, 043, 925 | \$20, 878, 500. 00 |
| Eagles.....          | 47, 850     | 478, 500. 00       |
| Half eagles.....     | 56, 000     | 280, 000. 00       |
| Total gold.....      | 1, 147, 775 | 21, 637, 000. 00   |
| <b>SILVER.</b>       |             |                    |
| Half dollars.....    | 3, 259, 896 | 1, 629, 948. 00    |
| Quarter dollars..... | 3, 097, 622 | 774, 405. 50       |
| Dimes.....           | 1, 491, 425 | 149, 142. 50       |
| Total silver.....    | 7, 848, 943 | 2, 553, 496. 00    |
| Total coinage.....   | 8, 996, 718 | 24, 190, 496. 00   |

The proportion of finished coin produced from ingots operated upon was gold, 54.2 per cent; silver, 50.25 per cent.

The following table exhibits the denominations of domestic gold melted at the mint at San Francisco during the fiscal year ended June 30, 1894:

| Denomination.              | Pieces.     | Faco value.     |
|----------------------------|-------------|-----------------|
| <b>GOLD.</b>               |             |                 |
| Double eagles.....         | 241         | \$4, 820. 00    |
| Eagles.....                | 179         | 1, 790. 00      |
| Half eagles.....           | 736         | 3, 680. 00      |
| Three-dollar pieces.....   | 12          | 36. 00          |
| Quarter eagles.....        | 143         | 357. 50         |
| Dollars.....               | 54          | 54. 00          |
| Total gold.....            | 1, 365      | 10, 737. 50     |
| <b>SILVER.</b>             |             |                 |
| Dollars.....               | 6           | 6. 00           |
| Half dollars.....          | 5, 049, 083 | 2, 524, 541. 50 |
| Quarter dollars.....       | 1, 092, 040 | 273, 010. 00    |
| Twenty-cent pieces.....    | 203         | 40. 60          |
| Dimes.....                 | 2, 012, 451 | 201, 245. 10    |
| Half dimes.....            | 24, 610     | 1, 230. 50      |
| Three-cent pieces.....     | 170         | 5. 10           |
| Total silver.....          | 8, 178, 563 | 3, 000, 078. 80 |
| Total gold and silver..... | 8, 179, 928 | 3, 010, 816. 30 |

The following table exhibits the amount of foreign gold coin melted at the mint at San Francisco during the fiscal year:

| Countries of coinage. | Value in United States money. | Countries of coinage. | Value in United States money. |
|-----------------------|-------------------------------|-----------------------|-------------------------------|
| Austria.....          | \$2.28                        | Japan.....            | \$16.95                       |
| Argentine Republic..  | 38.60                         | Mexico.....           | 101,422.98                    |
| Bolivia.....          | 89.58                         | New Granada.....      | 590.52                        |
| Chile.....            | 305.42                        | Norway.....           | 5.36                          |
| Costa Rica.....       | 1,760.25                      | Peru.....             | 415.90                        |
| Denmark.....          | 15.08                         | Russia.....           | 3.86                          |
| England.....          | 1,420,292.58                  | Spain.....            | 1,643.69                      |
| Ecuador.....          | 112.00                        | United States of Co-  |                               |
| France.....           | 390.82                        | lombia.....           | 549.13                        |
| Guatemala.....        | 759.84                        | Total.....            | 1,529,492.98                  |
| Germany.....          | 1,078.14                      |                       |                               |

Representing 81,986,980 ounces standard, of the coining value of \$1,525,339.16.

Messrs. B. F. Butler and F. W. Braddock, of the Bureau of the Mint, who were designated to make the annual settlement at the San Francisco Mint, were detained at Ogden by reason of the railroad strike, and unable to be present at the settlement between the operative officers and superintendent, which settlement, by authority of the Director of the Mint, was made in the presence of Mr. P. T. Donnelly, of the San Francisco Mint.

Upon the arrival of Messrs. Butler and Braddock, the bullion and coin in the hands of the superintendent was weighed and counted, and they reported as having found all the money and bullion with which the superintendent was charged.

Gen. William Dimond having resigned, Hon. John Daggett was appointed superintendent of the mint at San Francisco, and entered upon duty August 1, 1893.

#### MINT AT NEW ORLEANS.

The weight and value of precious metals deposited at the mint of the United States at New Orleans, La., during the fiscal year ended June 30, 1894, was as follows:

| Metals.     | Standard ounces. | Value.         |
|-------------|------------------|----------------|
| Gold.....   | 96,008.010       | \$1,786,195.53 |
| Silver..... | 3,453,504.11     | 4,018,622.56   |
| Total.....  | 3,549,512.120    | 5,804,818.49   |

During the year there was deposited for recoinage 1,837.756 ounces standard of United States mutilated and worn gold coins, of the face value of \$34,511, representing a coinage value of \$34,190.81, and 1,911,740.07 ounces standard of United States mutilated and worn silver coins, of the face value of \$2,492,877.61, representing \$2,378,525.74 in new subsidiary coin.

Foreign gold coins containing 187,806 ounces standard, of the coining value of \$3,494.06, were also deposited during the year.

The quantity of precious metals operated upon in the metallurgical department was—

| Metals.     | Standard ounces. |
|-------------|------------------|
| Gold .....  | 243,689.227      |
| Silver..... | 3,950,642.52     |

The number of melts made in the same department and the number condemned during the fiscal year was as follows:

| Metals.      | Melts for ingots. |            |
|--------------|-------------------|------------|
|              | Made.             | Condemned. |
| Gold.....    | 132               | 17         |
| Silver ..... | 349               | 2          |
| Total .....  | 481               | 19         |

The operations of the refinery of the mint at New Orleans were as follows:

#### REFINERY OPERATIONS, 1894.

| Bullion.    | Standard ounces. | Value.       |
|-------------|------------------|--------------|
| Gold.....   | 11,312.677       | \$210,468.41 |
| Silver..... | 3,492.76         | 4,064.30     |
| Total ..... | 14,805.437       | 214,532.71   |

The wastage of the melter and refiner in operating during the year on 243,689.227 ounces of standard gold bullion, at the annual settlement June 30, 1894, was found to be 19.371 ounces of standard gold, or 7.948 per cent of the legal allowance.

In operating on 3,950,642.52 ounces of standard silver during the year the melter and refiner, on the settlement of his accounts June 30, 1894, returned a surplus over and above the amount delivered him of 423.48 ounces of standard silver.

During the year the old-style boiling furnace used in the refinery of this mint was dispensed with and a lead tank heated by steam substituted, and one gas and two coke furnaces were added to the plant of the melting room.

COINAGE EXECUTED AT THE MINT OF THE UNITED STATES AT NEW ORLEANS,  
FISCAL YEAR 1894.

| Denomination.                 | Pieces.     | Value.        |
|-------------------------------|-------------|---------------|
| GOLD.                         |             |               |
| Eagles .....                  | 122, 000    | \$1, 220, 000 |
| Half eagles .....             | 79, 600     | 398, 000      |
| Total gold .....              | 201, 600    | 1, 618, 000   |
| SILVER.                       |             |               |
| Half dollars .....            | 2, 050, 000 | 1, 025, 000   |
| Quarter dollars .....         | 3, 276, 000 | 819, 000      |
| Dimes .....                   | 100, 000    | 10, 000       |
| Total subsidiary silver ..... | 5, 426, 000 | 1, 854, 000   |
| Total coinage .....           | 5, 627, 600 | 3, 472, 000   |

The percentage of finished gold coin produced from amount operated upon was 43.59 per cent and silver 50.88 per cent.

On the annual settlement of the accounts of the coiner it was found that in operating upon 199,477.200 ounces of standard gold ingots during the fiscal year 1894, there was a wastage of 14,788 ounces of standard gold, or 14.82 per cent of the legal allowance as fixed by law.

In operating on 2,928,073.70 ounces of standard silver during the year, the actual silver wastage of the coiner was 120.04 ounces standard, or 4.09 per cent of the legal allowance.

During the year, the assayer made 10,738 assays, 3,053 of which were gold and 7,685 silver.

The annual settlement at the mint at New Orleans, June 30, 1894, was superintended by Messrs. John T. Kent, of the United States assay office at New York, and W. F. Bowen, of the Bureau of the Mint, who reported in writing that they found on hand all the money and bullion with which the superintendent was charged.

The former cashier of the mint at New Orleans, who was arrested for the embezzlement of \$25,000 in June, 1893, was tried before the United States court at New Orleans in December last, and was acquitted of the charge.

Suit has been instituted against the former superintendent, Dr. Andrew W. Smyth, and is now pending for the recovery of the amount.

The President having removed the superintendent, assayer, melter and refiner, and coiner of the mint at New Orleans, Overton Cade was appointed superintendent; R. L. Schroeder, assayer; Lewis Guion, melter and refiner; and H. Gibbs Morgan, coiner; all of whom entered upon duty July 22, 1893.

## MINT AT CARSON.

The weight and value of the gold and silver deposited at the mint of the United States at Carson, Nev., during the fiscal year 1894, are exhibited in the following table:

| Metals.      | Standard ounces. | Value.          |
|--------------|------------------|-----------------|
| Gold .....   | 36, 577. 476     | \$680, 511. 18  |
| Silver ..... | 486, 952. 78     | 506, 635. 96    |
| Total .....  | .....            | 1, 247, 147. 14 |

## REFINERY OPERATIONS IN 1894.

| Bullion.                      | Gold.                | Silver.              |
|-------------------------------|----------------------|----------------------|
| Gross weight, 808,691 ounces. | <i>Standard ozs.</i> | <i>Standard ozs.</i> |
| Sent to refinery .....        | 48, 739.035          | 804, 534.40          |
| Received from refinery .....  | 43, 360.889          | 731, 955.45          |
| Total .....                   | 92, 099.924          | 1, 536, 489.85       |
| Value .....                   | \$1, 713, 486.96     | \$1, 787, 915.47     |

J. W. Adams, esq., having been appointed superintendent, and Hirsch Harris, melter and refiner, of the mint at Carson, entered upon their respective duties June 1, 1894. At this time a complete settlement was made of both the superintendent's and melter and refiner's accounts. Upon the settlement of the melter and refiner's accounts, it was found that he had received from the superintendent during the year gold bullion containing 71,077.619 ounces standard, and silver bullion containing 967,921.12 ounces standard. During the eleven months ended May 31, 1894, he operated upon 67,637.825 ounces of standard gold and 957,779.57 ounces of standard silver. In his gold operations he incurred a wastage of 8.009 ounces of gold, or 11.84 per cent of the legal allowance, and a wastage in his silver operations of 1.379.86 ounces standard, or 96.05 per cent of the legal allowance.

The superintendent of the mint at Carson, in explanation of the large wastage of silver by the melter and refiner in his operations, states that it was due to the fact that a large amount of fine silver, about 600,000 ounces, was received from the refinery at a fineness of from 0.991 to 0.992 and refined by crucible to 0.997½ and upward. The explanation of the superintendent is not a satisfactory one.

At the time the settlement was made, June 1, 1894, the melter and refiner was ill and died shortly thereafter. The Bureau is at a loss to understand why the melter and refiner should have adopted the mode of procedure described above. Such procedure is not consistent with good mint practice since silver bullion of the fineness of 0.991 and 0.992 is clearly suitable for coinage, the base metal being copper. If the refining was done for the preparation of fine bars, a reference to article 7, section 2, page 7, of the Regulations would have shown that "fine bars may be approved when they have a fineness of 0.992 and upward."

A much less drastic treatment would have brought this silver within the category of fine bars, and no treatment at all was needed for fitting it for coinage. While the treatment adopted appears to have been clearly injudicious, yet it might be more readily excused if the fluxes and sweeps had shown a large part of the missing bullion, as was to be expected. Measures have been adopted that will prevent this course of treatment of bullion in the refinery hereafter.

Messrs. B. F. Butler and F. W. Braddock, who had been designated to superintend the annual settlements at the mints on the Pacific Coast, were unable to reach Carson before the close of the fiscal year, being detained en route by the railroad strike. A complete settlement, however, of the accounts of both the superintendent and melter and refiner having been made June 1, when the present superintendent, J. W. Adams, and Melter and Refiner Hirsch Harris entered upon their respective duties, it was not deemed necessary to have a general settlement of the melter and refiner's accounts. The representatives of the Bureau, after completing the counting and weighing of the coin and

bullion in the hands of the superintendent of the mint at San Francisco, visited Carson and weighed and counted the bullion and coin in the hands of the superintendent of the mint at that place, and found the same to agree with the accounts.

#### ASSAY OFFICE AT NEW YORK.

The value of the gold and silver deposited at the United States assay office at New York during the fiscal year 1894 aggregated \$48,224,012.04 against \$26,506,360.92; an increase of \$21,717,651.29 over 1893.

United States gold coin (worn and mutilated), containing 21,650.106 ounces standard of the coining value of \$402,792.67, and uncurrent silver coins containing 580.82 ounces standard of the coining value of \$675.86, were deposited during the year.

Foreign gold coins containing 582,841.914 ounces standard of the coining value of \$10,843,570.49, and silver coins containing 469,660.74 ounces standard of the coining value of \$546,514.32, were also deposited during the year.

The weight and value of the deposits were as follows:

| Metals.           | Weight.              | Value.             |
|-------------------|----------------------|--------------------|
|                   | <i>Standard ozs.</i> |                    |
| Gold .....        | 2, 299, 946. 300     | \$41, 115, 280. 00 |
| Silver .....      | 6, 109, 066. 60      | 7, 108, 732. 04    |
| Total value ..... |                      | 48, 224, 012. 04   |

During the year five gold bars of the value of \$5,322,221.21, and fine silver bars of the value of \$6,569,578.66, were issued for use in the industrial arts and manufactures.

The quantity of bullion operated upon in the melter and refiner's department was:

| Bullion.     | Weight.              |
|--------------|----------------------|
|              | <i>Standard ozs.</i> |
| Gold .....   | 2, 225, 033. 852     |
| Silver ..... | 6, 060, 036. 36      |

The operations of the refinery of the assay office at New York were as follows:

#### REFINERY OPERATIONS, 1894.

| Bullion.                             | Weight.              | Value.            |
|--------------------------------------|----------------------|-------------------|
| Gross weight 4, 514, 573. 93 ounces. | <i>Standard ozs.</i> |                   |
| Gold .....                           | 516, 084. 116        | \$9, 691, 564. 95 |
| Silver .....                         | 3, 930, 153. 37      | 4, 573, 269. 36   |
| Total .....                          | 4, 446, 237. 486     | 14, 174, 834. 31  |

The amount of sulphuric acid used for parting operations was 1,583,310 pounds.

The proceeds of sale of spent acids and blue vitriol amounted to \$11,997.54, and of old material, \$348.48, a total of \$12,346.02.

The number of fine, mint, and standard bars manufactured was 53,549, containing 2,199,184.245 ounces of standard gold of the value of \$40,915,055.72, and 6,066,507.60 ounces of standard silver of the value of \$7,059,208.84.

The number of gold deposits melted was 7.473, and of silver, 3.417.

On the annual settlement of his accounts at the close of the fiscal year it appears that the melter and refiner in operating upon 2,225,033.852 ounces of standard gold bullion incurred a wastage of 137.198 ounces standard of the value of \$2,552.52, being 6.166 per cent of the legal allowance. In operating upon 6,060,036.36 ounces of standard silver bullion during the year the melter and refiner returned a surplus of 663.31 ounces standard of the value of \$603.31.

The work of the assay department during the year comprised the testing of some 12,000 melts of metal and 600 to 700 barrels of sweeps, in addition to the stamping of nearly 60,000 bars and the making of a large number of special assays of bullion.

The tenants of the higher floors of a new building, erected during the year on the street immediately in the rear of the refinery, having complained that the smoke, fumes of acids, etc., from the refinery were a great annoyance, the owner called the attention of the superintendent thereto. The matter, through the superintendent of repairs to public buildings in New York, was referred to the Supervising Architect at Washington, with the result that an iron pipe 5 feet in diameter and 52 feet long was placed on the top of the stack, raising its outlet some distance above the building and obviating all cause of complaint.

The addition to the stack is attached to and supported by the building, and is covered with paint claimed to be steam and acid proof.

The skylight in the weigh room of the assay department has been enlarged, effecting a saving of expenditure for artificial light and adding greatly to the comfort of the employees.

An opening made in the ceiling of the receiving room and in the hall floor of the second story extends the benefit of a skylight to that room and improves its ventilation.

Messrs. H. Clay Stier, of the First Auditor's Office, and A. A. Hassan, of the Bureau of the Mint, superintended the annual settlement, June 30, 1894, and reported that they found on hand all the coin and bullion with which the superintendent was charged.

#### MINT AT DENVER.

The value of the bullion operated upon at the mint of the United States at Denver, Colo., during the fiscal year ended June 30, 1894, was \$3,259,277.77, an increase of \$1,841,482.90 over the deposits of the previous year.

The number of deposits received and melted during the fiscal year 1894 was 3,674, a gain over 1893 of 1,595.

The increase in the deposits of gold is due, first, to the increase in the gold output of Colorado and the adjacent States and Territories; secondly, to the fact that two of the largest smelting and refining works in the West deposit their fine gold bars at the Denver mint, where they are paid for either by check on the depository banks at Denver or on the Assistant Treasurer of the United States at Chicago, Ill.

Owing to the large increase in the deposits of gold, it has been found necessary to erect an additional melting furnace, which will increase the melting capacity one-third. A small toughening plant will also be erected at an early date, at a cost of about \$500.

The deposits, earnings, and expenditures for the fiscal year are shown in the following table:

| Items.            | Amount.           |
|-------------------|-------------------|
| Deposits:         |                   |
| Gold.....         | \$3, 221, 105. 56 |
| Silver.....       | 38, 172. 21       |
|                   | \$3, 259, 277. 77 |
| Earnings.....     | 7, 947. 63        |
| Expenditures..... | 27, 434. 72       |

Percentage of net expenses to deposits, 0.597

MUTILATED AND UNCURRENT GOLD COINS OF THE UNITED STATES MELTED AT THE MINT AT DENVER, COLO., DURING THE FISCAL YEAR ENDED JUNE 30, 1894.

| Denomination.      | Gold.             |             |
|--------------------|-------------------|-------------|
|                    | Number of pieces. | Face value. |
| Double eagles..... | 159               | \$2, 580    |
| Eagles.....        | 51                | 510         |
| Half eagles.....   | 29                | 145         |
| Total.....         | 239               | 3, 235      |

Michael E. Smith, esq., having resigned as assayer in charge of the mint at Denver, William J. Puckett, esq., was appointed, and entered upon duty December 1, 1893.

ASSAY OFFICE, HELENA, MONT.

The deposits of bullion of the assay office at Helena during the fiscal year ended June 30, 1894, amounted to \$2,020,733.05, an increase of \$587,931.58 over the deposits of the previous year.

The deposits, earnings, and expenditures for the fiscal year 1894 are as follows:

| Items.            | Amount.           |
|-------------------|-------------------|
| Deposits:         |                   |
| Gold.....         | \$1, 963, 534. 60 |
| Silver.....       | 57, 198. 45       |
|                   | \$2, 020, 733. 05 |
| Earnings.....     | 5, 667. 47        |

| Denomination.      | Number of pieces. | Face value. |
|--------------------|-------------------|-------------|
| Double eagles..... | 1                 | \$20.00     |
| Total .....        | 1                 | 20.00       |

#### ASSAY OFFICE AT CHARLOTTE, N. C.

The deposits of bullion at the assay office at Charlotte during the fiscal year ended June 30, 1894, amounted to \$249,513.64, an increase of \$9,147.20 over the amount of deposits reported last year.

The deposits, earnings, and expenditures for the fiscal year 1894 are as follow:

| Items.             | Amount.      |
|--------------------|--------------|
| Deposits:          |              |
| Gold .....         | \$248,284.96 |
| Silver.....        | 1,228.68     |
|                    | \$249,513.64 |
| Earnings.....      | 1,098.74     |
| Expenditures ..... | 4,750.00     |

Percentage of net expenses to deposits, 1.463.

| Total .....         | 43                | 417.50      |

#### UNITED STATES ASSAY OFFICE, BOISE, IDAHO.

The deposits at the assay office at Boise during the fiscal year ended June 30, 1894, amounted to \$801,138.37, an increase of \$14,096.74 over the deposits of the previous year.

The following table exhibits the deposits, earnings, and expenditures of this office during the fiscal year 1894:

| Items.            | Amount.      |
|-------------------|--------------|
| Deposits:         |              |
| Gold.....         | \$783,254.87 |
| Silver.....       | 17,883.50    |
|                   | \$801,138.37 |
| Earnings .....    | 3,226.91     |
| Expenditures..... | 11,192.16    |

Percentage of net expenses to deposits, 0.994

During the year a Hoskins gasoline blowpipe and cupelling furnace were added to the outfit of this institution, effecting not only a saving of time but also of materials.

For the accommodation and convenience of the numerous small miners, many assays of deposits of gold bullion weighing less than 5 ounces are made at this institution at a nominal charge of 50 cents.

#### ASSAY OFFICE AT ST. LOUIS, MO.

The deposits of bullion at the assay office at St. Louis during the fiscal year ended June 30, 1894, amounted to \$157,913.84, a decrease of \$573,523.44 reported for the fiscal year 1893. This falling off has occurred in the amount of domestic bullion, no refined bars of that description having been deposited.

The deposits, earnings, and expenditures for the fiscal year 1894 are as follows:

| Items.            | Amount.      |
|-------------------|--------------|
| Deposits:         |              |
| Gold.....         | \$155,620.33 |
| Silver .....      | 2,293.51     |
|                   | \$157,913.84 |
| Earnings .....    | 667.37       |
| Expenditures..... | 5,056.56     |

Percentage of net expenses to deposits, 2.779

| St. Louis ..... | 157,913.84     | 667.37     | 5,056.56    | 2.779                                   |
| Total .....     | 6,488,576.67   | 18,008.12  | 72,836.79   | *.845                                   |

\* Average.

## SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES, 1894.

The precious metals received at the mints and assay offices during the fiscal year 1894 were valued at \$170,352,370, against \$135,943,272 received the previous year.

The operations of the melting and refining departments of the coinage mints and of the assay office at New York for 1893 and 1894, so far as the value of the metals treated is concerned, are exhibited in the following table:

## BULLION OPERATIONS OF THE MELTING DEPARTMENTS, 1893 AND 1894.

| Metals.      | Fiscal year 1893. |                | Fiscal year 1894. |                |
|--------------|-------------------|----------------|-------------------|----------------|
|              | Standard ounces.  | Coining value. | Standard ounces.  | Coining value. |
| Gold .....   | 4,173,160         | \$77,640,186   | 13,918,586        | \$258,950,446  |
| Silver ..... | 33,403,334        | 38,869,335     | 20,546,684        | 23,908,867     |
| Total .....  | 37,576,494        | 116,509,521    | 34,465,270        | 282,859,313    |

The operations of the coining branches of the mints during the fiscal years 1893 and 1894, in the manufacture of finished coins from ingots prepared by the melting departments were, in value of the metals operated upon, as follows:

## BULLION OPERATIONS OF THE COINING DEPARTMENTS, 1893 AND 1894.

| Metals.      | Fiscal year 1893. |                | Fiscal year 1894. |                |
|--------------|-------------------|----------------|-------------------|----------------|
|              | Standard ounces.  | Coining value. | Standard ounces.  | Coining value. |
| Gold .....   | 3,277,371         | \$60,974,344   | 10,821,252        | \$201,325,620  |
| Silver ..... | 29,758,389        | 24,155,216     | 10,609,013        | 12,346,196     |
| Total .....  | 24,035,769        | 85,129,560     | 21,430,265        | 213,671,816    |

The work of the minor assay offices at Helena, Mont.; Boise, Idaho; Charlotte, N. C.; St. Louis, Mo., and the mint at Denver, Colo., which consists in the receipt and assaying of deposits and the manufacture of unparted bars of gold and silver, during the fiscal years 1893 and 1894, was as follows:

OPERATIONS OF MINOR ASSAY OFFICES, 1893 AND 1894.

| Metals.     | Fiscal year 1893. |                | Fiscal year 1894. |                |
|-------------|-------------------|----------------|-------------------|----------------|
|             | Standard ounces.  | Coining value. | Standard ounces.  | Coining value. |
| Gold.....   | 239,585           | \$4,457,394    | 342,434           | \$6,371,794    |
| Silver..... | 130,666           | 152,046        | 100,355           | 116,776        |
| Total.....  | 370,251           | 4,609,440      | 442,839           | 6,488,570      |

The following table is a summary of the three preceding tables, showing the value of the precious metals operated on at the mints and minor assay offices during the fiscal years 1893 and 1894:

BULLION OPERATED UPON IN THE MELTING AND COINING DEPARTMENTS OF ALL THE MINTS AND ASSAY OFFICES, 1893 AND 1894.

| Metals      | Fiscal year 1893. |                | Fiscal year 1894. |                |
|-------------|-------------------|----------------|-------------------|----------------|
|             | Standard ounces.  | Coining value. | Standard ounces.  | Coining value. |
| Gold.....   | 7,690,116         | \$143,071,925  | 25,082,322        | \$466,647,850  |
| Silver..... | 54,293,390        | 63,177,764     | 31,256,052        | 36,370,677     |
| Total.....  | 61,983,506        | 206,249,689    | 56,338,374        | 503,018,527    |

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the fiscal year ended June 30, 1894, exceeded 860 tons of gold and 1,069 tons of silver.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$29,174.35.

A loss of \$16,794.30 occurred from the difference between the assay value of bullion contained in sweeps and leady melts sold and the amount received for the same.

The wastages and losses aggregated \$45,968.65. Against these losses there were gains arising from the operations on bullion as follows:

| Character.                                                                        | Amount.     |
|-----------------------------------------------------------------------------------|-------------|
| Surplus bullion returned by the operative officers.....                           | \$23,125.86 |
| Precious metals recovered in grains and sweepings.....                            | 8,177.96    |
| Gain on bullion shipped from the minor assay offices to the mint for coinage..... | 6,362.85    |
| Total gains.....                                                                  | 37,666.67   |

Deducting the value of the total operative wastage and loss on sale of sweeps from the value of incidental gains of bullion, there was a net loss in the operations of the mints during the year of \$8,301.98.

The following table exhibits the cost per piece at the mints of the United States during the fiscal years 1893 and 1894:

COST OF COINAGE EXECUTED AT THE COINING MINTS OF THE UNITED STATES DURING THE FISCAL YEARS 1893 AND 1894.

| Coining mints.      | Pieces coined. |            | Pieces coined, exclusive of minor coins. |            |
|---------------------|----------------|------------|------------------------------------------|------------|
|                     | Fiscal year.   |            | Fiscal year.                             |            |
|                     | 1893.          | 1894.      | 1893.                                    | 1894.      |

## MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the coinage and production of the precious metals, imports and exports of gold and silver, amount of bank and Government notes, both covered and uncovered, of the different foreign countries published annually in the reports of this Bureau are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

A list of interrogatories embodying the points on which information is sought is sent every year to our ambassadors and ministers through the Department of State, and the answers are received in the form of reports made directly to this Bureau.

The questions relating to the calendar year 1893 are as follows:

(1) What was the amount of gold coined during the calendar year 1893, by denominations and values? What amount was recoinced (withdrawn from circulation) during the year, domestic and foreign coins separately?

(2) Same question as to silver.

(3) What was the weight and value of the gold used in the industrial arts during the year?

(4) Same question as to silver.

(5) What was the import and export of gold during the calendar year 1893? Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.

(6) Same question as to silver.

(7) What was the weight, expressed in kilograms, and the value of the gold produced from the mines of the country during the calendar year 1893?

(8) Same question as to silver. In answering this interrogatory, state whether the value given is commercial or coining value.

(9) What was the output of gold from the refineries of the country during the year?

(10) Same question as to silver.

(11) What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1893?

(12) Same question as to silver.

(13) What was the amount of Government notes outstanding at the same date?

(14) What was the amount of bank notes outstanding?

(15) What was the amount of uncovered Government notes?

(16) What was the amount of uncovered bank notes?

(17) What is the actual currency of the country—gold and silver, or inconvertible paper?

(18) Is gold at a premium as compared with the actual currency of the country; and, if it is, what was the average premium during the year 1893?

(19) Were any laws passed during the year 1893 affecting the coinage, issue, or legal-tender character of the metallic or paper currency? If so, please transmit copies of the same.

(20) Is there a report published of the operations of the mint? If so, please forward a copy.

It is usual for the Bureau to supplement the information received through our foreign representatives by other statistical data obtained from printed documents, both official and nonofficial.

The Director hereby expresses his acknowledgments to the senders for this year for the Twenty-fourth Annual Report of the Deputy Master of the Royal Mint, 1893, London, 1894; London Bankers' Magazine, 1894; Journal of the Statistical Society, London, 1894; Journal of the Institute of Bankers, London, 1894; Board of Trade Journal, London, 1894; Government of India, Financial Statement, 1893-94, Calcutta, 1894; Financial and Commercial Statistics of British India, Calcutta, 1894; Report of the Head Commissioner of Paper Currency, Calcutta, to the Secretary of the Government of India for the year 1893-94, Calcutta, 1894; Accounts Relating to the Trade and Navigation of British India, for the fiscal year 1893-94, Calcutta, 1894; Report of the Administration of the Mints at Bombay and Calcutta for the year 1893-94, Simla, 1894; Annual Report of the Secretary of Mines of Victoria during the year 1893, Melbourne, 1893; the Australian Insurance and Banking Record, 1894; Broken Hill Proprietary Company, Limited, New South Wales, reports, etc., for half year ending May 31, 1884; Report of the Director of the Imperial Mint of Japan for the year ending March 31, 1894, Hyogo, 1894; República Mexicana; Noticias del Movimiento Marítimo en el Año Fiscal de 1892 á 1893, México, 1894; República Mexicana, Exportaciones en el Año Fiscal de 1892 á 1893, México, 1894; Amonedaciones é Introducciones de Metales Preciosos á la Casa de Moneda, Año Fiscal de 1892 á 1893, México, 1894; Zeitschrift für Berg., Hütten- und Salinen-Wesen im Preussischen Staate, Jahrgang 1894, Berlin, 1894; Bulletin de Statistique et de Législation Comparée, Paris, 1894; Revue des Banques, Paris, 1894; Algemeen Verslag van het Munt College, over 1893, Amsterdam, 1894.

For special information kindly furnished the Bureau the Director desires to express his personal obligations to the following gentlemen:

Sir Charles Fremantle, deputy master of the Royal Mint, London; Hon. George Anderson, deputy master of the mint, Melbourne, Australia; Hon. J. E. O'Connor, assistant secretary of the Government of India; Mr. J. Stavoli, chief of the bureau of statistics, Mexico; to the chan-

cellor of the exchequer, Russia; the directors of the mints of Japan, the Netherlands, Paris, Berlin, Vienna, and Kremnitz; Mr. Augustus Sauerbeck, London, and Mr. Ottomar Haupt, Paris.

The replies to the interrogatories, which are given in full in the Appendix to this report, are indicated by the numbers of the questions.

For convenience of reference the more important statistical data relating to foreign countries and contained in the answers to the interrogatories are condensed into the following tables:

## AUSTRALASIA.

| Items reported for 1893. | Pounds sterling. | Value in United States money. |
|--------------------------|------------------|-------------------------------|
| Gold coinage .....       | 6,587,764        | \$32,059,354                  |
| Gold produced .....      |                  | 35,683,600                    |
| Silver produced .....    |                  | 26,507,000                    |

## AUSTRIA-HUNGARY.

| Items reported for 1892.  | Florins.   | Value in United States money. |
|---------------------------|------------|-------------------------------|
| Gold coinage .....        | 29,125,962 | \$14,038,714                  |
| Recoinage of gold .....   | 6,216,062  | 2,996,142                     |
| Silver coinage .....      | 16,293,712 | 7,853,569                     |
| Recoinage of silver ..... | 2,527,230  | 1,218,125                     |
| Gold produced .....       | 3,153,015  | 1,519,753                     |
| Silver produced .....     | 4,952,925  | 2,427,310                     |

## CHINA.

| Items reported for 1893. | Value in United States money. |
|--------------------------|-------------------------------|
| Silver coined .....      | \$4,249,960                   |

## DENMARK.

| Items reported for 1893.   | Kroner.    | Value in United States money. |
|----------------------------|------------|-------------------------------|
| Imports of gold .....      | 500,000    | \$134,000                     |
| Exports of gold .....      | 2,250,000  | 603,000                       |
| Stock of gold .....        | 53,000,000 | 13,939,000                    |
| Stock of silver .....      | 20,000,000 | 5,360,000                     |
| Uncovered bank notes ..... | 20,000,000 | 5,360,000                     |

## ECUADOR.

| Items reported for 1893.   | Value in United States money. |
|----------------------------|-------------------------------|
| Imports of gold .....      | \$350,000                     |
| Exports of gold .....      | 52,000                        |
| Imports of silver .....    | 200,000                       |
| Exports of silver .....    | 166,000                       |
| Production of gold .....   | 52,000                        |
| Stock of gold .....        | 385,000                       |
| Stock of silver .....      | 1,500,000                     |
| Uncovered bank notes ..... | 1,485,000                     |

## REPORT ON THE FINANCES.

## FRANCE.

| Items reported for 1893.  | Francs.       | Value in United States money. |

## THE GERMAN SILVER COMMISSION.

The commission appointed in January, 1894, by the Imperial German Government, "to discuss measures for raising and fixing the value of silver," held its first session on the 22d of February, 1894, in Berlin, and its final session on the 6th of June following. It was a commission appointed to discuss, debate, propose, but had no right to vote on any measure. Its essential duty was to give information to the Imperial Government on the means of raising the value of silver, and this task it ably discharged. The commission consisted of twenty-eight mem-

bers (nine of whom represented the Government). Among them were such pronounced monometallists as Ludwig Bamberger, and such double standard advocates as Otto Arendt. The discussions were exhaustive and learned. The report of the commission is in two large volumes, the first containing 714 pages, the second about one-third of that number.

The following is a list of the most important papers and propositions laid before the commission:

(1) By Bergrath Schmeisser: Report on the permanency of gold mining in the South African Republic.

(2) By Count von Kanitz: Draft of an Imperial coinage law introducing the double standard into Germany at the ratio of 1 to 15 $\frac{1}{4}$ .

(3) By Professor Lexis: Propositions for raising the value of silver.

(4) Tables relating to the execution of the German monetary reform.

(5) Proposition for an international monetary agreement, by Dr. Arendt and others.

(6) History preparatory to that of the German monetary reform, by Dr. Bamberger.

(7) Proposition for an international double standard, by Bank Director Neustadt.

(8) Tables of prices in Germany from 1871 to 1893, by the statistical office of the Empire.

(9) Propositions respecting transition measures to raise the value of silver, by Dr. Arendt.

(10) Present condition of the world's production of the precious metals, by Dr. Hauchecorne.

(11) The circulation of German thalers.

(12) History preparatory to that of the German monetary reform, by Dr. Arendt.

(13) The question of the standard and industry.

(14) Is a considerable diminution of Germany's monetary gold stock to be feared after the execution of a convention providing for the double standard?

(15) The German sales of silver compared with the production of silver.

(16) Table showing the copper contents of Mansfeld copper ore.

(17) On the occurrence and permanency of gold in their economic bearings, by Mining Inspector Wimmer.

Mr. von Posadowski, president of the commission and secretary of state in the treasury of the Empire, has summed up, in a very impartial manner, the arguments made by both the monometallists and the bimetalists who took part in the debates.

The following is a translation of Mr. Arthur Raffolovich's version of the president's summary, extracted from the *Économiste Français* of October 27, 1894:

The bimetalists alleged that since the introduction of the gold standard, the price of silver has fallen more than 50 per cent. They did not find the cause of this phenomenon in the increase of production, for if, with respect to the comparative conditions of the production of gold and silver, we go back to the year 1850, that is, to a period anterior to the Californian discoveries, we find that the production of gold increased in much larger proportions than that of silver, and that notwithstanding the price of the yellow metal never fell perceptibly at any time. Bimetalists find the causes of the depreciation of silver in governmental measures exclusively, that is, in the demonetization of silver and the closing of the mints to its free coinage.

The bimetalists maintain that there is an unlimited demand for silver, and in support of this, cite the fact that all the silver produced immediately finds a purchaser and that there is no supply of silver on the market in excess of the demand for it. They find the effects of the demonetization of silver, first of all in the increasing purchasing power of gold, and they then infer that, as at present it is necessary to give for the same amount of gold a greater amount of merchandise or of labor than in the past the gold standard has caused the price of commodities to fall. In order to show the effects of the standard on the prices of the principal articles of consumption, the bimetalists rely on the well-known tables of Mr. Augustus Sauerbeck, on those of the *London Economist*, and on a whole series of statistical data.

The bimetalists see in this decline of the prices of commodities, not only the cause of the economic crisis, and consequently of an economic evil, but they infer that this business depression is attended by disastrous political consequences, and that it may be said that the development of revolutionary socialism, and even of

that of German Anti-Semitism, depends in a certain measure on business depression. They see in the introduction of bimetallism the remedy for actual economic and political evils; they maintain that there is not sufficient gold at present for the countries that have the gold standard already; if these countries maintain their monetary system, the other States which still have the silver standard will be forced by the general conditions of trade to adopt the gold standard, and from the adoption of that standard there would result a still greater scarcity of gold, in consequence of which there would be a new decline of prices. The bimetallists declare that geological research shows that there is a great probability that, in the future, and even in the near future, the auriferous beds of the world will be exhausted, and that their exhaustion will be followed by an aggravation of existing evils.

The bimetallists, therefore, demand a legal-tender power of silver equal to that of gold, and they desire to attain that equality for silver by means of free coinage of the white metal; from which they expect a greater circulation of the media of payment, and as a consequence of the latter, a rise of prices, and therefore the termination of the actual present business depression.

The representatives of bimetallism have besides declared that the ratio between gold and silver, so far as they were concerned, is a secondary question. They say, however, that the restoration of the old ratio of 1 to 15½ is an end worthy of attainment, and they do not consider it a condition *sine qua non* in bimetallic negotiations. They even believe that the ratio between the two metals may be the object of a compromise. They allege that from the moment when the demonetization of silver ceased, when the situation which existed before the adoption of the gold standard has been restored, the old ratio will become established of itself, and that silver will stand to gold in the ratio of 1 to 15½. Lastly, they affirm that the charge made by the monometallists that the bimetallists desire to meet their obligations in a depreciated money or one of less value is unjust, and this because as soon as, in consequence of the legal introduction of bimetallism, silver has obtained the same payment power as gold the payments of debts may just as well be made in the white metal, whose intrinsic value will be equal to that of gold.

The bimetallists who heard this résumé of the president of the conference, Mr. Posadowski, made no protest against its accuracy, and it may be admitted that it represents their platform.

Mr. Posadowski made a similar résumé of the arguments of the partisans of the gold standard. In the course of the debates of the conference he said the representatives of the gold standard did not deny that the legislative measures taken since 1873 exercised an influence on the fluctuations of silver, but they insisted that the influence of the increase in the production of silver and its effect on the decline of that metal should be taken into consideration. It is true, they admitted, that there is no surplus supply of silver in the market, and that all the silver produced finds a purchaser, but it finds a purchaser only at a reduced price of the metal, and in this reduced price the excess of production naturally finds its commercial expression.

The partisans of the gold standard are therefore of opinion that the demonetization of silver, in the form of bimetallism, would not restore the old parity of 1 to 15½. They think that the legal ratio should be regulated by the real ratio of prices, as was the case when France, at the beginning of this century, adopted its monetary system, but they do not believe that by granting the free and unlimited coinage of silver it is possible to return again to the old parity of 1 to 15½, and they are of the opinion that it is impossible to regulate the prices of the precious metals for all time by monetary laws, and especially not the price of silver. Do they, nevertheless, desire to try the experiment? The divergence between the commercial price of the metal and its legal value would find its natural expression in a premium on gold.

The representatives of the gold standard maintain that it is not the price of gold which has risen, but rather the price of silver which has lowered; they do not recognize any great force in the statistical tables, especially those of Mr. Sauerbeck, who claims to have demonstrated that there is a close and constant relation between the price of silver and the price of commodities; they object that, if such a latent economic law existed, it would apply to the price of all commodities. If, on the one hand, it can not be denied that since the adoption of the gold standard a whole series of commodities has fallen in price, as many examples may be cited whose prices have risen; in any event, it is incontestable that wages (the price of manual labor) have risen.

They also maintain that the fall of the price of commodities, where it has taken place, has its origin in an improvement of the processes of production, and on the other hand, in the perfecting of the means of transportation. They deny that the existence of the scarcity of gold at the present time has been demonstrated. If gold is too scarce, gold being the legal instrument of payment, it logically follows that the rate charged for the loan of the instruments of payment is expressed by interest

and discount. But, during the last twenty years, there has been a decline both of the rate of interest and the rate of discount.

Besides, the partisans of the gold standard are of the opinion that by the introduction of the double standard the monetary rise of prices might be produced, perhaps even a rocket-like rise of prices. Not only the prices of the products which the agriculturist sells would rise, but also the price of the commodities which the agriculturists buy, as well as the price of labor—that is, wages, this last increasing gradually. They have therefore tried to show that if the price of commodities rises, the net products would not increase in the same proportion.

As to wages, there should be reason to fear, in the first place, that in case the prices of the products of agriculture and of other commodities advanced, there would be a deterioration in the standard of living of all workmen not paid in kind; experience having proved that when there is a general rise of prices wages paid in money are the slowest to rise. One point, however, was conceded by the monometallist; that is, that the introduction of bimetallism might, to a certain extent, be advantageous to the working classes. It was conceded also that the rise of prices of commodities would make the reimbursement of debts requiring fixed payment more easy.

Lastly, the monometallists explained that, even if this advantage were accepted for debtors, the higher prices would constitute a perceptible disadvantage to those with fixed incomes, and that the creditor would be injured in the same proportion, as the debtor would find it easier to pay his debts. The creditor is not always the stronger economically.

The partisans of the gold standard, therefore, believe that the introduction of bimetallism would cause a modification of prices, but that this modification of prices would produce only a temporary and apparent improvement. Some of them have not ignored that with a depreciation of silver serious inconvenience to trade with countries having a depreciated currency would result, but they contend that the evils caused by a modification of the gold monetary system of Germany would extend to larger circles, and would assume dimensions much more considerable.

With respect to the international agreement, they contended that, even on the hypothesis that bimetallism be desirable, expediency demands that, under any circumstances, the initiative should be taken by England, for if it were desired to introduce bimetallism legally without the participation of England the price of silver might be doubtless temporarily raised. In this way a remedy would be indirectly applied to the evils from which England suffers, and the latter would consequently have fewer incentives to enter into bimetallic union.

The partisans of the actual régime have therefore remained faithful to the attitude which they had hitherto maintained. They do not consider the introduction of the double standard necessary nor economically useful.

Considering the interest attached to the résumé of the president of the German silver commission, we have deemed it useful to faithfully translate it. We shall add to it the conclusion which Mr. von Posadowski expressed at the closing session of the commission.

"I believe," he said, "that the commission is agreed upon three points—that the fluctuations and the low price of silver have caused certain inconveniences to our export trade and our domestic production; that Germany alone is not in a position to take effectual measures to raise the price of silver; that an enhancement of the price of silver by means of a monopoly of a syndicate or of the purchase of the mines by the State could not be effected.

"No understanding has been reached on the question whether, in view of free production, the rise of prices might not be effected, nor by what means; nor of the question, what degree of importance, in view of the general interests of all, should be given to the particular interests compromised by the decline of silver; nor what fixed ratio should be proposed for an international convention; nor on the question whether the remedies proposed from various directions would not be more dangerous than the disease itself."

The German minister added that no matter to what party a person belonged, he had to admit that the inconveniences existing in the monetary domain are difficult of suppression, and this in consequence of the international trade of Germany. One should not identify with monetary questions economic evils, the responsibility for which an impartial judge could not trace, except in part, to the monetary régime.

The silver commission devoted its last five sessions to a debate between experts on the researches of geology and mining science.

In conclusion, we would remark that the commission has no political bearing or sanction. Germany has brought its contribution to monetary literature. Those who have had the courage to peruse the two enormous volumes of the report of its proceedings will share our [Mr. Raikovich's] opinion that it has not added a single new argument which can cause Germany to regret the reform which it accomplished in 1873.

## MONETARY SYSTEMS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

In the Appendix will be found a brief abstract of the monetary systems of the principal foreign countries,\* which, however, had no claim to an official character. It is simply a compilation from the latest and most reliable sources, especially Schönberg's *Handbuch der National-Oekonomie*, Say and Chailley's *Dictionnaire de L'Economie Politique*, Haupt's *Arbitrages et Parités*, Tate's *Modern Cambist*, and a pamphlet prepared in 1892 by the then director, Mr. E. O. Leech, on the monetary systems of the principal countries, the full and free use of all of which has been made in the preparation of the briefs, and the indebtedness of the Bureau to each is hereby acknowledged.

Acknowledgments are due the officers and clerical staff of the Bureau for the zeal and fidelity displayed in the performance of their duty.

Very respectfully,

R. E. PRESTON,  
*Director of the Mint.*

Hon. J. G. CARLISLE,  
*Secretary of the Treasury, Washington, D. C.*

## REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,  
OFFICE OF THE COMPTROLLER OF THE CURRENCY,  
*Washington, December 3, 1894.*

SIR: I have the honor to herewith submit, as required by law, for the consideration of Congress, the annual report of the Comptroller of the Currency. It is the thirty-second report made since the organization of the Bureau, and covers the year which ended October 31, 1894.

The records of the Bureau show that on October 31 the total number of national banks in operation was 3,756, with an authorized capital stock of \$672,671,365, represented by 7,955,076 $\frac{1}{2}$  shares of stock owned by 287,842 shareholders, thus giving to each bank in the system an average capital stock of \$179,092, with 2,117 shares and 76 shareholders.

In this total number of banks in the system Pennsylvania leads with 406; New York follows with 334; Massachusetts is next with 267, and the three following in order of numbers are Ohio, 246; Texas, 218; and Illinois, 217. In the item of capital stock Massachusetts is first, with \$97,992,500, with the several States following next in the order named, viz: New York, \$87,346,060; Pennsylvania, \$74,168,390; Ohio, \$45,240,100; Illinois, \$38,506,000; Texas, \$23,255,000; Connecticut, \$22,791,070, and Missouri, \$20,840,000.

On October 2, 1894, the date of their last report of condition, the total resources of the 3,755 banks then reporting were \$3,473,922,055.27, of which their loans and discounts aggregated \$2,007,122,191.30, and money of all kinds in bank, \$422,428,192.45. Of their liabilities, \$1,728,418,819.12 represented individual deposits, \$334,121,082.10 surplus and net undivided profits, and \$172,331,978 circulating notes outstanding. The total amount of circulation of national banks October 31, as shown by the books of the office, was \$207,472,603, a net decrease during the year of \$1,741,563, and a gross decrease of \$8,614,864 in circulation secured by a deposit of bonds.

During the year but 50 banks, located in 22 States, were organized, with a total capital stock of \$5,285,000. This is the smallest number of banks organized, as well as the minimum amount of capital, in any one year since 1879. In point of numbers Pennsylvania leads with 8 banks, followed by Illinois with 5, Minnesota 4, Ohio and Texas 3 each; the remaining 27 are distributed among the other States. In point of capital stock Kentucky is first, with \$800,000, Pennsylvania second, with \$600,000, Missouri third, with \$575,000, and Ohio fourth, with \$510,000.

An examination of the geographical location of these banks shows 27,

with a capital stock of \$2,410,000, in the Northern and Eastern States; 10, with a capital stock of \$1,550,000, in the Southern States; and 13, with a capital stock of \$1,325,000, in the Western or trans-Mississippi division.

The charters of forty-one national banks, having a capital stock of \$5,143,000 and a circulation of \$1,678,050, distributed throughout 18 States were extended during the year. Of these, 9 are located in Illinois, 5 in Indiana, and 4 each in Ohio and Kentucky. (The details as to the distribution of the remainder will be found in the table.) The aggregate capital stock of the leading States is as follows: Kentucky, \$825,000; Illinois, \$698,000; California, \$500,000; Massachusetts, \$500,000, and Texas, \$500,000.

Within the year 79 banks, with an aggregate capital stock of \$10,475,000, have passed out of the system by voluntary liquidation, and 21, including 2 which failed during the year 1893, with a capital stock of \$2,770,000, have become insolvent and been placed in charge of receivers. Ten banks, with a capital stock of \$1,575,000, which were in the hands of receivers at the date of the last report, have resumed business during the year.

The charters of 6 banks, reporting a capital of \$665,000 and a circulation of \$283,950, expired by limitation, 5 of which were succeeded by new associations, with a capital stock aggregating \$600,000 and circulation amounting to \$92,250.

By a comparison of the statements contained in the last report with the operations of the present year, it is observed that the number of new banks decreased 69; the number of voluntary liquidations increased 33; the number of receivers appointed decreased 44. The number of extensions of corporate existence increased 1; the number of expirations increased 2, and the number of banks organized to succeed expiring associations increased 1. The total number of active banks decreased 40.

The following abstract of the reports made in response to the five calls required by law indicates the changes which have characterized the status of the banks at different periods throughout the year covered by this report. For the purpose of facilitating comparison with the year preceding the reports of condition for that year are also given

SUMMARY OF THE STATE AND CONDITION OF EVERY NATIONAL BANK REPORTING DURING THE YEAR ENDED OCTOBER 2, 1894.

## REPORTS OF 1893 AND 1894 COMPARED.

The changed condition of the national banking interests, despite the severe and prolonged financial and business depression of the year, as shown by a comparison of the tables, is not less marked than was that between the years 1892 and 1893. The recovery of public confidence in the banks during the year 1894 has been not less rapid than was the apparent loss of such confidence in 1893.

Individual deposits declined from \$1,764,456,177 on December 9, 1892, to their lowest point, \$1,451,124,330, on October 3, 1893, but from the last-named date they began steadily to increase to \$1,539,399,795 on December 19, 1893, \$1,586,800,444 on February 28, 1894, \$1,670,958,769 on May 4, 1894, \$1,677,801,200 on July 18, 1894, until on October 2, 1894, they had reached the sum of \$1,728,418,819, or an amount but \$36,000,000 less than on December 9, 1892, the highest point reached during the two years named.

In this connection is to be considered that on December 9, 1892, these deposits were held by 3,784 banks, with a capital stock of \$689,698,017, while on October 2, 1894, they were held by only 3,755 banks, with a capital stock of but \$668,861,847.

At the last-named date the banks had a surplus fund of \$245,197,517, and net undivided profits of \$88,923,564, as against, on December 9, 1892, a surplus fund of \$239,931,932, and undivided profits, after deducting expenses and taxes, of \$100,398,914.

During the two years named the national-bank notes outstanding increased from \$145,669,499, on December 9, 1892, to \$182,959,725 on October 3, 1893, after which date they decreased until July 18, 1894, when the amount of \$171,714,552 was reached. Between that date and October 2, 1894, the amount again increased, reaching \$172,331,978.

The amount due to other national banks on December 9, 1892, was \$323,339,449. It gradually decreased to \$226,423,979 on October 3, 1893, but after that date again increased, and on October 2, 1894, stood at \$343,692,316. So also with the amount due State banks and bankers. On December 9, 1892, it was \$160,778,117, but decreased by October 3, 1893, to \$122,891,098, and after that date again increased, standing on October 2, 1894, at \$183,167,779.

On October 3, 1893, the liabilities of the banks for money borrowed in different forms amounted to \$80,126,026, which liability had by December 19, 1893, decreased to \$28,827,772. The same items of liability on October 2, 1894, aggregated \$26,944,248. The total liabilities of the banks which on December 9, 1892, were \$3,480,349,667 had on October 3, 1893, decreased to \$3,109,563,284, the lowest point touched during the two years under consideration, and after that time increased gradually until on October 2, 1894, was \$3,473,922,055, an amount but \$6,000,000 less than on December 9, 1892.

A study of their resources shows that the loans and discounts which on December 9, 1892, stood at \$2,166,615,720, and on May 4, 1893, at \$2,161,401,858, had by October 3, 1893, decreased to \$1,843,634,167, the lowest point touched during the two years. By December 19, 1893, however, this item of resources had increased to \$1,871,574,769; on February 28, 1894, \$1,872,402,605; on May 4, 1894, \$1,926,686,824; on July 18, 1894, \$1,944,441,315, and on October 2, 1894, to \$2,007,122,191, a recovery at the last-named date of \$163,488,024, as compared with the lowest point reached on October 3, 1893.

The amount of United States bonds to secure circulation on December 9, 1892, was \$166,449,250, increasing gradually during 1893 until on October 3, 1893, it stood at \$206,463,850, the highest point reached

during the two years. After October 3, 1893, commenced a slight decrease, the amount of bonds held for circulation on October 2, 1894, being \$199,642,500. The amount of bonds held to secure United States deposits shows little variation between the dates named. On December 9, 1892, it was \$15,321,000, and on October 2, 1894, \$15,226,000.

Of United States bonds held for investment the banks had on December 9, 1892, \$4,148,600, the item decreasing in amount until on October 3, 1893, when they held \$2,760,950. On December 19, 1893, the amount had slightly increased, reaching \$3,049,000, but on February 28, 1894, it increased to \$17,250,150, this marked increase being chiefly due to investments made by the banks in the 5 per cent bonds sold by the Treasury during the period intervening between the two dates named. After February 28, 1894, the amount of these bonds held for investment gradually decreased until on October 2, 1894, when the banks held \$10,662,200.

The amount of stocks, securities, etc., was on December 9, 1892, \$153,648,180, but steadily decreased until October 3, 1893, when it amounted to but \$148,569,950. An increase then began and continued, as is shown by the following: December 19, 1893, \$159,749,363; February 28, 1894, \$174,305,552; May 4, 1894, \$185,324,549; July 18, 1894, \$191,137,435, and October 2, 1894, \$193,300,072. This movement commencing at the close of the monetary stringency and continuing while the cash resources of the banks were being replenished by depositors, indicates the extent to which this form of investments was resorted to by the banks during a period of easy money.

The amount invested in banking houses, furniture, and fixtures was on December 9, 1892, \$72,294,364, and with slight variations gradually increased during the period to \$75,183,745 on October 2, 1894. Of other real estate and mortgages owned the banks held on December 9, 1892, \$15,926,687, the amount increasing during the year to \$16,828,949, after which date there was a gradual and steady increase until, on October 2, 1894, the amount reached \$22,708,391, thus showing the extent to which real-estate security was acquired by the banks as a result of the financial stringency for the purpose of saving debts previously contracted.

The item due from national banks, which on December 9, 1892, was \$142,623,106, decreased until, on October 3, 1893, it was but \$94,740,014. It then began to increase until, on October 2, 1894, it reached the amount of \$122,479,067; so also the amount due from State banks and bankers, which on December 9, 1892, was \$34,403,231, decreased to \$24,229,106 on October 3, 1893, after which time it again slightly increased to \$28,682,998 on December 19, 1893. The variation during 1894 was slight, standing on October 2, \$27,973,911.

The amount due from reserve agents on December 9, 1892, was \$204,948,159, decreasing by October 3, 1893, to \$158,499,644, and thereafter increasing steadily until on July 18, 1894, the amount of \$258,089,227 was reached, the item standing at \$248,849,607 on October 2, 1894.

Exchanges for clearing house, which on March 6, 1893, had reached the large amount of \$125,142,839, decreased to \$106,181,394 on October 3, 1893, still further to \$71,943,165 on December 19, 1893, and to \$70,299,653 on February 28, 1894, increasing to \$76,002,055 on May 4, 1894, decreasing again by July 18, 1894, to \$66,511,835, and again sharply increasing between the last named date and October 2, 1894, to \$88,524,052. Representing, as does this item, the volume of checks drawn by their depositors exchanged by associated banks, the fluctuations are interesting as measuring the ebb and flow of business activity during the period under consideration.

The specie held on December 9, 1892, amounted to \$209,895,260, and gradually decreased to \$186,761,173 on July 12, 1893, after which it as gradually increased until on May 4, 1894, it amounted to \$259,941,923, decreasing thereafter to \$250,670,652, and further to \$237,250,654 on October 2, 1894. So the amount of legal-tender notes and United States certificates of deposit therefor, which on July 12, 1893, had decreased to \$102,493,677, increased thereafter until the sum of these items amounted on May 4, 1894, to \$192,161,292, then decreasing to \$188,261,318 on July 18, 1894, and further to \$165,644,028 on October 2, 1894.

It is interesting to note that the lawful money reserve in bank, which had reached its lowest point, \$289,244,850, on July 12, 1893, steadily increased thereafter until May 4, 1894, the amount of it was \$452,103,214. It then decreased to \$438,931,970 on July 18, 1894, and further to \$402,894,682 on October 2, 1894, such decrease in cash resources between May 4, 1894, and October 2, 1894, being accounted for by the marked increase in the item of loans and discounts during the same period, due to the gradual revival of business between the two dates named, but more particularly between July 18, 1894, and October 2, 1894.

#### EARNINGS AND DIVIDENDS.

The law requiring dividend reports from national banks went into effect in March, 1869, and since that date the abstracts for semiannual periods have been incorporated in the annual reports issued by this Bureau. The number, capital, surplus, dividends, net earnings, and ratios of dividends to capital, dividends to capital and surplus, and net earnings to capital and surplus, annually, from March, 1869, to March, 1894, are shown by such abstracts.

The average capital and surplus were \$522,797,940 and \$149,931,336, respectively; the average annual dividends paid amount to \$44,355,814 and the net earnings to \$55,237,454. The rate per cent of dividends declared varies from 10.5 in the year ended March 1, 1870, to 6.8 in 1894, the average for the twenty-five years being 8.5. The total dividends paid and the net earnings are shown to amount to \$1,108,895,358 and \$1,380,936,361, respectively.

#### CONSOLIDATION OF BANKS.

During the year, as already stated, 79 national banks withdrew from the system by voluntary liquidation, a number larger than in any previous year except 1885. Many active banks have reduced their capital stock to a greater or less degree since the last report, while the number of banks organized has been comparatively small. The cause is probably to be found in the reduced earnings of the banks, consequent upon the contraction in the volume of business for the year.

While the average percentage of net earnings on capital and surplus since 1869, when the act of Congress became operative requiring national banks to report earnings and dividends, is 8.2 per cent and of dividends 6.6 per cent, net earnings during the year past have only amounted to 5.6 per cent and dividends to 5 per cent. This is the smallest percentage of dividends ever paid, and the percentage of earnings falls below all years except 1878 and 1879. The continued stagnation in commercial circles, with its attendant business embarrassments, has in some instances consumed surplus and undivided profits, and even demanded substantial assessments upon the shareholders to make good impairment of capital. In order to place such

banks upon a dividend-paying basis, expenses must be reduced until the earnings again exceed them. How to accomplish this purpose has demanded very serious consideration. Two methods appear to promise favorable results. Either a reduction of capital or a consolidation of banking interests will produce a curtailing of expenses. If the reduction can be accomplished without loss of business, its results may be fairly satisfactory. However, such action frequently tends to breed distrust rather than create confidence. No one can deny that banking has overreached itself in many communities. Profits are sought by several institutions when one strong bank only could be able to make them, the others conducting their business at either an actual loss, or at least without profit. The consolidation of rival concerns in such localities would add quite largely to the available banking capital, and at the same time escape a large proportion of expense. It would also tend to check reckless banking springing from an unwholesome competition to obtain business. Such a course invites public confidence and goes to justify it.

During the year this plan has been adopted by national banks at Louisville, Indianapolis, Denver, Dallas, and in other places with satisfactory results. Unquestionably it will hereafter receive careful attention from conservative bankers, and, without in anywise tending toward monopoly in banking concerns, it will be productive of benefit to all interests.

#### BANKS, OTHER THAN NATIONAL.

In compliance with the provisions of the law requiring that the Comptroller shall present to Congress a general statement of the resources, liabilities, and condition of banks and banking companies, other than national, namely: State, savings, private banks, and loan and trust companies, the following information is submitted. It has been furnished to this office by the officers of the various States and Territories of the Union having supervision of these institutions, and is complete except as to Delaware, Maryland, West Virginia, South Carolina, Georgia, Florida, Alabama, Arkansas, Tennessee, Arizona, Idaho, Indian Territory, Oklahoma, Montana, Nevada, New Mexico, Oregon, and Utah.

The number of banks and savings institutions organized under State authority, and in active operation July 1, 1894, was 5,033, and reports of condition have been received from 4,834 of this number. A compilation of these returns will be found in the appendix, tabulated by classes and States and the source of information indicated. In addition to the returns from banks organized under State authority, reports of condition have been received from 904 private banks and bankers.

As the reports almost uniformly indicate the condition of such banks in the months following the monetary stringency of 1893, a comparison with the returns of the preceding year is herewith made to show the extent to which these banks were affected by the panic. The principal items of resources and liabilities are as follows:

| Items.                    | 1893.              | 1894.              |
|---------------------------|--------------------|--------------------|
| Loans .....               | \$2, 340, 605, 313 | \$2, 133, 628, 978 |
| Bonds, etc. ....          | 1, 009, 604, 350   | 1, 010, 248, 230   |
| Cash .....                | 205, 645, 203      | 229, 373, 004      |
| Capital .....             | 406, 007, 240      | 398, 735, 390      |
| Surplus and profits ..... | 346, 206, 237      | 352, 424, 784      |
| Deposits .....            | 3, 070, 462, 680   | 2, 973, 414, 101   |
| Total resources .....     | 3, 979, 008, 533   | 3, 868, 474, 997   |

From the above statement an increase is to be noted in the following items: Investments in stocks and bonds, \$643,880; cash on hand, \$23,727,801; surplus and undivided profits, \$6,218,497. The following items show a decrease: Loans and discounts, \$206,976,335; capital stock, \$7,271,850; deposits, \$97,048,579, and total resources, \$110,533,536.

The total number of State banks from which reports were received is seven more than reported in 1893, though the capital stock is \$6,000,000 less, being but \$244,435,573. The deposits are \$658,107,494; loans and discounts, \$665,988,823; investments in stocks and bonds, \$84,541,728; total resources, \$1,077,164,813. The decrease in loans is about \$91,000,000; deposits, \$49,000,000, and total resources, \$53,000,000.

The amount of dividends paid by the State banks in Rhode Island, Connecticut, Pennsylvania, Michigan, and North Dakota is official, and the percentage is based on the entire capital employed by all banks in each State. With the exceptions above noted the average rates are based on the capital and dividends of dividend-paying banks. Information on this subject, in full or in part, was received from 1,265 banks, located in twenty-six States, capitalized in the sum of \$69,601,357, on which dividends amounting to \$5,145,440, an average rate of 7.4 per cent, were paid.

The incompleteness of such returns is owing to the fact that in a large majority of States in which public officers are charged with the supervision of banks and the compilation of banking statistics, no provision is made for procuring statements of dividends paid. In a number of instances, however, the State officials very courteously made a special call in order that the desired information might be placed at the disposal of this Bureau.

Reports of condition were received from 1,024 savings banks and savings institutions, of which 646 are mutual and 378 stock savings banks. The resources of the latter class amount to less than 15 per cent of the total of both. Of the mutual savings institutions 635 are located in the Eastern and Middle States, 1 in a Southern, and 10 in three of the Western States.

The total loans of banks of this class amount to \$822,404,433; investments in stocks and bonds, \$742,923,542; deposits, \$1,538,305,070; and total resources, \$1,691,432,501. The total loans of all savings banks amount to \$1,026,622,425; stock and bond investments, \$778,587,866; deposits subject to check, \$29,971,962; savings deposits, \$1,747,961,280; and total resources, \$1,980,744,189.

A comparison of these returns with those of 1893 indicates a decrease in the following items: Loans, \$20,152,272; stocks and bonds, \$20,784,610; deposits, \$30,867,020; total resources, \$33,030,958. The number of savings depositors is 52,912 less, and the average amount due each depositor \$3.69 less than last year. It appears from the annual reports of public officers in the Eastern and Middle States that the large decrease in deposits in savings banks was the result of the panic, withdrawals from the banks being due to fear, inspired by a lack of confidence, a desire to make other investments, or, where industrial depressions occurred, for subsistence.

From reports of savings banks, made as late as June 30 last, it appears that they are again approaching their normal condition, and their deposits are now constantly increasing.

The tables in the appendix show in detail, by States, the condition of each and of both classes of savings banks and the average deposit by States and geographical divisions, the number of depositors in all savings banks, amount of savings deposits and average due by States

in 1892-'93 and in 1893-'94, and the growth of savings banks in number, depositors, and amount of savings deposits from 1820 to 1894.

There have been received reports of condition of 224 loan and trust companies, which show loans amounting to \$374,421,713; stocks and bonds, \$142,224,151; capital, \$97,068,092; deposits, \$471,298,816; total resources, \$705,186,944.

Nine hundred and four private banks and bankers, having an aggregate capital of \$26,652,167; deposits, \$66,074,549; loans, \$66,596,017; stocks and bonds, \$4,894,485, and total resources, \$105,379,051, reported.

In order to make a proper comparison, a condensed statement is here-with given, showing the principal items of resources, liabilities, and total resources of each class of banks referred to:

| Items.                    | State banks.  | Loan and trust companies. | Savings banks.  | Private banks. |
|---------------------------|---------------|---------------------------|-----------------|----------------|
| Loans .....               | \$665,988,823 | \$374,421,713             | \$1,026,622,425 | \$66,596,017   |
| United States bonds ..... | 604,055       | 13,449,411                | 108,950,804     | 534,102        |
| Other bonds .....         | 83,937,673    | 128,774,740               | 669,637,062     | 4,360,383      |
| Capital .....             | 244,435,573   | 97,068,092                | 30,579,558      | 26,652,167     |
| Surplus and profits ..... | 102,453,492   | 75,303,366                | 165,609,461     | 9,058,465      |
| Deposits .....            | 658,107,494   | 471,298,816               | 1,777,933,242   | 66,074,549     |
| Resources .....           | 1,077,164,813 | 705,186,944               | 1,980,744,189   | 105,379,051    |

Similar information with respect to national and other banks and total of all banks is shown in the following statement:

| Items.                    | National banks. | All other banks. | Total.          |
|---------------------------|-----------------|------------------|-----------------|
| Loans .....               | \$1,991,874,273 | \$2,133,628,978  | \$4,125,503,251 |
| United States bonds ..... | 240,154,979     | 123,538,372      | 363,693,351     |
| Other bonds .....         | 193,300,072     | 886,709,858      | 1,080,009,930   |
| Capital .....             | 668,861,847     | 398,735,390      | 1,067,597,237   |
| Surplus and profits ..... | 334,121,082     | 352,424,784      | 686,545,866     |
| Deposits .....            | 1,742,160,267   | 2,973,414,101    | 4,715,574,368   |
| Total resources .....     | 3,473,922,055   | 3,868,474,997    | 7,342,397,052   |

The total amount of capital stock reported by national banks on July 18 last, and of State, stock savings, private banks, and loan and trust companies at the date of the latest returns obtainable by this Bureau, is \$1,069,826,555, an average of \$15.63 per capita. The aggregate capital reported in 1893 was \$1,091,793,959, an average of \$16.29.

The estimated population of the United States on the date mentioned was 68,473,000; the total banking funds, namely, capital, surplus, undivided profits, and deposits of national and other banks, \$6,407,003,338, making a per capita average of \$93.57. The decrease in these funds, as compared with 1893, is \$5,936,616. The average per capita on the latter date was \$95.68.

The amount of specie, paper currency, etc., held by national banks on July 18 last, and by other banks on or about the same date, was \$688,996,937, of which amount the gold reported was \$133,398,786; silver, \$16,827,146; specie, not classified, \$20,480,340; paper currency, \$397,587,281; fractional currency, \$1,041,630, and cash not classified, \$119,661,754.

In connection with the information obtained relative to the condition of banks other than national, it is not out of place to here incorporate

a summary of the annual report of the Commissioner of Labor, issued May last, which is devoted exclusively to the laws and rules governing, methods of operating, condition of, and statistics relative to building and loan associations of the United States.

It appears from the report that associations of this character have existed in the country since about 1840, since which date their growth has been very rapid. It is stated that the number in operation is 5,838, of which 1,079 are located in Pennsylvania, 721 in Ohio, 669 in Illinois, 445 in Indiana, 418 in New York, 366 in Missouri, 288 in New Jersey, 240 in Maryland, 148 in Kentucky, 133 in California, 115 in Massachusetts. In no other State does the number reach 100. Nearly complete data show that the number of shares in force is 13,255,872, and the number of shareholders 1,745,725. The number of male and female shareholders was 919,614 and 307,828, respectively. The assets and liabilities of the associations are as follows:

| Assets.                          |               | Liabilities.            |              |
|----------------------------------|---------------|-------------------------|--------------|
| Loans on real estate .....       | \$470,142,524 | Borrowed money .....    | \$13,283,265 |
| Loans on association stock ..... | 17,352,193    | Dues paid in .....      | 370,003,478  |
| Loans on other securities .....  | 6,001,671     | Profits .....           | 80,664,116   |
| Cash .....                       | 14,056,406    | Stock, paid up .....    | 33,775,366   |
| Other assets .....               | 21,300,091    | Other liabilities ..... | 31,126,660   |
| Total .....                      | 528,852,885   | Total .....             | 528,652,885  |

Tables showing in detail information submitted by State and other banks, the condition of the loan and trust companies in the District of Columbia October 2, 1894, and of the chartered banks in the Dominion of Canada on July 31, 1894, will be found under their appropriate headings in the appendix.

#### INTEREST OF WOMEN IN BANKS.

In April, 1893, as the result of an inquiry instituted by this Bureau, reports were received from national banks showing the number and value of shares of stock owned therein by women, the number of women employed, and the amount paid them as compensation by the banks. In June last similar information was submitted by banks incorporated under State authority. The returns from banks of the latter class are shown in detail in the table appearing in the appendix. A condensed statement of such information from national and other banks is as follows:

|                                                 | 1893. National<br>banks (3,808). | 1894. All other<br>banks (3,211). |
|-------------------------------------------------|----------------------------------|-----------------------------------|
| Number of shares issued .....                   | 7,090,413                        | 3,618,084                         |
| Value of shares issued .....                    | \$698,642,876                    | \$307,151,716                     |
| Number of shares issued held by women .....     | 1,733,772                        | 481,098                           |
| Value of shares issued held by women .....      | \$130,681,494                    | \$38,074,712                      |
| Percentage of shares issued held by women ..... | 24.4                             | 13.3                              |
| Percentage of capital held by women .....       | 18.9                             | 12.4                              |
| Number of women shareholders .....              | 70,697                           | 23,146                            |
| Number of women employes .....                  | 383                              | 584                               |
| Compensation of women employes .....            | \$185,797.00                     | \$262,847.00                      |
| Average compensation of women employes .....    | \$185.11                         | \$450.42                          |

## INSOLVENT NATIONAL BANKS.

During the year there were placed in the hands of receivers 21 national banking associations, having an aggregate capital of \$2,770,000; surplus and undivided profits, \$715,889; outstanding circulation, \$453,154; other liabilities, \$5,470,313; and total liabilities, \$9,409,356. By comparison with the number and liabilities of all banks on October 2, last, the number of failures was 0.56 of 1 per cent, the capital 0.4 of 1 per cent, and the liabilities 0.27 of 1 per cent.

The greatest number of failures occurred in Oregon, in which State 4 banks, with capital aggregating \$425,000, were closed. In Kansas 3 banks, with capital of \$450,000, and the same number in Nebraska, with capital of \$260,000, failed. There were 2 failures each in Texas and Missouri, the aggregate capital being \$175,000 and \$450,000 respectively. In each of the following-named States but 1 bank was compelled to close, the capital being as indicated: New York, \$50,000; Pennsylvania, \$85,000; Alabama, \$50,000; Michigan, \$300,000; Colorado, \$200,000; South Dakota, \$75,000, and Washington, \$250,000.

## RECEIVERSHIPS.

Within the period covered by this report the affairs of 143 insolvent national banks have demanded the supervision of the Comptroller. Of these, 10 have been restored to solvency and have resumed business in charge of their proper officers. The accounts of 8 have been finally closed; 25 have been placed upon the inactive list, the accounts being kept open only to await the result of pending litigation, or to prevent too great sacrifice in disposing of remaining assets. On October 31 receivers were in charge of 100 trusts in process of active liquidation.

The number of receiverships in active operation during the past year has been greater than in any former year since the origin of the national-banking system. For this reason, it seems appropriate to here present some statistics concerning the administration of insolvent banks.

It has been found necessary to place the affairs of 267 national banks in the hands of receivers since June 20, 1863, when the Comptroller's certificate of authority to begin business was issued to the first bank. Of these 12 have been restored to solvency, leaving the assets of 255 to be distributed by forced liquidation. The affairs of 130 of these have been fully administered and the trusts closed.

The nominal value of the general assets of the 255 banks, as they passed into the possession of the receivers, amounted to \$158,010,847. Assessments have been levied against shareholders of insolvent banks amounting to \$24,051,050, making the total resources of these trusts \$182,061,897, an average of \$713,576 for each receivership. The total liabilities of these failed banks were \$109,936,458, an average of \$413,123 for each receivership.

The different receivers have collected in cash from the general assets \$64,925,321, and from assessments against shareholders \$10,119,452, making a total of cash collected \$75,044,773. This amount is increased by \$21,871,822 by reason of offset settlements, etc., making gross collections aggregating \$96,916,595.

There is an uncollected balance of assets in the hands of receivers amounting to \$43,846,521. Assets valued at \$3,926,137 have been returned to the shareholders of the banks that have paid all claims allowed against them, including interest in full. These figures show

an average of over 72 per cent of the nominal value realized from a forced collection of these items.

The total cost of securing this large aggregate of collections was \$5,857,727, or an average on all trusts of a trifle over 6 per cent of the gross proceeds. When the extremely complicated and, in many instances, desperate condition of these trusts is considered, it will be seen that the expenses have been kept at a very low figure. It is gratifying to know that each year the percentage of cost to collections of assets is lessened.

The balance of the cash collected by the different receivers, after deducting the expenses of the trusts, has been disposed of as follows: settlements by offsets and otherwise, which discharged \$21,871,822 of the gross liabilities, required cash payments of \$9,460,506. This leaves a balance of liabilities footing up \$88,064,636, of which 64 $\frac{3}{4}$  per cent has already been paid in dividends, amounting to \$56,933,633.

Including the settlements already mentioned, an average of 71 $\frac{5}{7}$  per cent has already been paid upon gross liabilities of all insolvent national banks. The proceeds of the assets yet to be collected will materially increase this average. Shareholders of those banks that have more than paid in full have received in cash from receivers \$1,077,344. On October 31, 1894, the cash balance remaining in the hands of the Comptroller and the receivers amounted to \$1,723,563.

The average time required for the complete liquidation of the 130 receiverships which have been finally terminated was five and two-fifths years. The longest time taken to settle the affairs of any trust was in the case of the second bank that failed, which was eighteen and three-fourths years. The third failed bank comes next with seventeen years. The shortest time within which the affairs of an insolvent national bank have been settled by a receiver was four months and eight days, the next shortest time being four months and fourteen days.

It should be explained that the length of time required to settle the affairs of the second and third failed banks was owing to the fact that at that time no legal precedents had been established, and all important questions arising in the liquidation of their assets were required to be determined in court. The litigation thus engendered was the principal cause of the prolongation of these trusts.

It is gratifying to know that the average life of receiverships is rapidly growing shorter, being approximately proportioned to the increased experience in settling the affairs of such banks. The first receiver for a national bank was appointed April 14, 1865. The average term of receiverships for the ten years prior to October 31, 1874, was eight years one month and seventeen days. For the succeeding decade the average is six years three months and fourteen days, and for the last ten years the average is but two years ten months and twenty-four days.

#### INSOLVENT BANKS OTHER THAN NATIONAL.

Through the courtesy of Mr. Albert C. Stevens, editor of Bradstreet's, this Bureau has been placed in possession of statistics with respect to the failure of banks other than national during the year ended August 31 last. This information in tabular form, showing the number of failures, assets, and liabilities by States, etc., will be found in the appendix. An abstract is herewith given, in connection with similar information

with respect to the banks which closed during the first eight months of 1893.

| Class.                         | 1893. |              |              | 1894. |             |              |
|--------------------------------|-------|--------------|--------------|-------|-------------|--------------|
|                                | No.   | Assets.      | Liabilities. | No.   | Assets.     | Liabilities. |
| State banks .....              | 172   | \$41,281,848 | \$36,903,266 | 27    | \$1,773,678 | \$2,009,967  |
| Saving banks .....             | 47    | 17,673,938   | 16,830,809   | 9     | 2,646,008   | 2,677,943    |
| Loan and trust companies ..... | 13    | 14,337,500   | 22,354,000   | 5     | 420,000     | 477,000      |
| Mortgage companies .....       | 6     | 760,803      | 1,790,000    | 3     | 33,000,000  | 37,500,000   |
| Private banks .....            | 177   | 20,237,259   | 19,315,455   | 21    | 1,749,600   | 2,235,600    |
| Total .....                    | 415   | 94,291,348   | 97,193,530   | 65    | 39,589,286  | 44,900,510   |

By eliminating the failures of mortgage companies, which do not do a banking business, from the total for the year, the number of failures is reduced to 62, and their assets and liabilities to \$6,589,286 and \$7,400,510, respectively. By comparing these figures with those of 1892, when the failures were 69, the assets, \$6,125,189, and the liabilities, \$11,024,628, it is evident that the banking business of institutions of the classes named has about resumed its normal condition.

The following table indicates the number of banks of each class in operation on July 1, 1894, and the number and percentage of national and other banks closed during the year.

| Class.                         | Number doing business July 1, 1894. | Banks closed. |           |
|--------------------------------|-------------------------------------|---------------|-----------|
|                                |                                     | Number.       | Per cent. |
| National banks .....           | 3,775                               | *22           | .58       |
| State banks .....              | 4,359                               | 27            | .62       |
| State and savings banks .....  | 5,033                               | 36            | .71       |
| Loan and trust companies ..... |                                     | 8             |           |
| Private banks .....            | 3,858                               | 21            | .54       |

\*One bank has resumed, 1 will probably resume, and 1 will go into voluntary liquidation, leaving 19 in the hands of receivers.

The number of all banks, exclusive of loan and trust companies, reported to be in existence on the date in question is 12,666; the number of failures 79, and the percentage of failures, 0.62.

#### INVESTIGATIONS UNDERTAKEN.

The increasing importance of the bank as a means for facilitating the daily business transactions of every character and the many interests centering in it, warranted the instituting and carrying on of a number of investigations upon lines which it was believed would afford the general public and the lawmaking powers added information upon questions not only affecting them in their relation to the banks, but to the whole monetary problem. They involved the use of credit instruments in daily retail transactions, the extent to which banks are used as banks of deposit by the people, as a source of profit to the Government and utility to the public. These investigations have been carried on without other expense to the Government than the trifling cost involved in the printing of the necessary extra blanks sent to the banks upon three occasions when calls for reports of condition were made upon them. The information furnished by the officers of these institu-

tions was wholly gratuitous, and the Comptroller desires to here acknowledge his indebtedness to them for the courtesy shown by them in so readily complying with his request and aiding him in his undertaking.

#### THE USE OF CREDIT INSTRUMENTS IN RETAIL TRANSACTIONS.

The use of credit instruments in the daily transactions of the business of the country has been largely discussed in former reports, but this office had not undertaken to systematically gather information upon the subject of the use of them in retail transactions alone. The inquiries made relative to their use had been general in their character, and thus the returns received embraced in the largest measure the part they played in transactions of very large magnitude.

It seems desirable in this instance to confine them exclusively to the every-day business involved in daily living, and, therefore, at the suggestion of David Kinley, PH. D., professor in charge of the department of political economy in the University of Illinois, who had interested himself in the matter, and of his colleague, Mr. A. P. Winston, the following circular and blank form for a reply thereto were prepared and sent out to each bank under the supervision of the Comptroller:

TREASURY DEPARTMENT,  
OFFICE OF THE COMPTROLLER OF THE CURRENCY,  
Washington, D. C., May 15, 1894.

To the Cashier of the ——— National Bank,

SIR: An investigation is about to be undertaken looking toward the collection and publication of statistics relative to the use of credit instruments in retail transactions throughout the country, and the assistance of banks and bankers, generally, is earnestly desired. I shall, therefore, be exceedingly thankful to have your cooperation in this investigation by having you furnish this office, at your early convenience, the information called for in the inclosed blank, as well as such other data bearing on the subject as may be at your command. It is suggested that the most satisfactory results will be obtained by giving the data requested, as shown by the deposits on the "settling day," in your community, nearest to the close of the fiscal year ending June 30, 1894.

Respectfully, yours,

JAMES H. ECKELS,  
Comptroller.

June —, 1894.

Hon. JAMES H. ECKELS,  
Comptroller of the Currency:

SIR: In compliance with your request of May 15, I give herewith the information<sup>n</sup> desired with respect to deposits, etc., of retail merchants with this bank on June —, 1894:

| Depositors.                  | Deposits.* |         |                    |                      |                 |                                         | Total. |
|------------------------------|------------|---------|--------------------|----------------------|-----------------|-----------------------------------------|--------|
|                              | Gold.      | Silver. | Gold certificates. | Silver certificates. | Treasury notes. | Checks and other instruments of credit. |        |
| Grocers, retail .....        |            |         |                    |                      |                 |                                         |        |
| Butchers, retail .....       |            |         |                    |                      |                 |                                         |        |
| Clothiers, retail .....      |            |         |                    |                      |                 |                                         |        |
| Furniture dealers, retail .. |            |         |                    |                      |                 |                                         |        |
| Fuel dealers, retail .....   |            |         |                    |                      |                 |                                         |        |
| Total .....                  |            |         |                    |                      |                 |                                         |        |

\* Please omit cents.

1. What is the usual period of credit granted by the retail merchants in your community? \_\_\_\_\_
2. Is it the custom in your community for employers to pay wages by checks? \_\_\_\_\_
3. If it is the custom for employers to pay wages by checks, do the employes as a rule present such checks for payment at the bank, or are they cashed by the merchants? \_\_\_\_\_

Very respectfully,

Cashier ——— National Bank,

Replies more or less complete were received from 2,465 out of a total of 3,774. Upon their receipt an analysis of them was undertaken by Prof. Kinley, in conjunction with the Comptroller, and while neither the returns nor the analysis based upon them are as thorough as might be wished, they at least throw some light upon an important phase of the use of credit instruments and justify the making of the inquiry. It is proposed to undertake during the ensuing year another investigation touching the same subject, but in a way that will, it is believed, call out more fully the exact facts.

There was of course no way of getting anything like complete returns of retail transactions throughout the country. The best that could be done was to select a few of those kinds of retail trade which in the aggregate represent the largest percentage of retail business; that is to say, those employments were selected the purchase of whose products represents the largest part of expenses for living.

In his report for 1890, on the cost of production of iron, steel, etc., the U. S. Commissioner of Labor gives data respecting the cost of living, from which it appears that the expenditure for food, clothing, furniture, and fuel is ordinarily about 72.6 per cent of the total expenditure of the average family of five persons in those industries. It seemed likely that the mode of payment of the purchases of products in these lines would be fairly representative of the mode of payment in other classes of retail transactions, and therefore of all classes of retail transactions.

Owing to some slight misunderstanding the blanks sent out did not cover these classes of transactions quite as fully as was intended. Under clothiers, for instance, it was intended to include dealers in dry goods. It was intended further to insert among the classes whose deposits were called for, "general stores," because, as is well known, in most country districts one store covers most, if not all, the classes of trade mentioned in the schedule. Notwithstanding these omissions, it is thought, however, that the returns are fairly representative of the character of the composition of the circulating medium of those places throughout the country which are sufficiently developed to have a national bank.

It may be said that a large amount of the retail trade on the day in question is not represented, and that this omission vitiates the statistics materially. It must be remembered, however, that a large part of the trade concerning which there are no returns is in the small country towns where there are no national banks. In these places most of the trade is done on the basis of book credit, farmers bringing in their produce being credited with its value on the books of the dealers and securing their supplies on the basis of such credit.

In all these transactions very little money is used. So far as money is not used in these transactions they would go to swell the amount of

the credit in retail business. Moreover, the returns came from national banks only. It is not unlikely that if returns had been received from State and private banks throughout the country they would show the same proportion of credit instruments used. The total number of State and private banks at the time of the investigation was about 8,200; the number of national banks was about 3,700.

If the State and private banks did only half as much business as the national banks the total amount of retail transactions represented would be \$9,000,000, and this is about two-thirds of the average daily expenditure in retail transactions throughout the country, as estimated from the average expenditure given by the Commissioner of Labor in his report for 1899, assuming the family expenditure he describes as the average of the country. It is doubtless true, also, that the returns from these banks would more largely increase the per cent of credit than the per cent of money in the returns, for they are mostly located in those parts of the country where credit seems to be more largely used.

Moreover, there are many instances in which the percentage of checks used for payments in the other kinds of retail transactions is much larger than in those for which returns were obtained. This is shown by the extra returns written in on many of the blanks. For example, in 8 banks in the State of Pennsylvania alone there were \$6,687 in checks deposited by dealers of the kinds specified in the circular, and \$50,428 in checks deposited by other classes of retail dealers. Instances of this kind would arise largely from some peculiar character of the place, like the predominance of some particular trade, but wherever they occur they would tend to swell the proportion of checks.

The amount of retail payments which the returns cover is \$5,999,065, or in round numbers \$6,000,000. Of this amount 58.9 per cent was in checks and store orders, and 41.1 per cent in the various kinds of money. The percentages for the different States are as follows:

TABLE I.

| State.             | Per cent<br>of money. | Per cent<br>of checks. | State.              | Per cent<br>of money. | Per cent<br>of checks. |
|--------------------|-----------------------|------------------------|---------------------|-----------------------|------------------------|
| Alabama.....       | 35                    | 65                     | Montana.....        | 27.3                  | 72.7                   |
| Arizona.....       | 40.6                  | 59.4                   | Nebraska.....       | 35.6                  | 64.4                   |
| Arkansas.....      | 39.7                  | 60.3                   | New Hampshire.....  | 42.9                  | 57.1                   |
| California.....    | 58.4                  | 41.6                   | New Jersey.....     | 49                    | 51                     |
| Colorado.....      | 29.5                  | 70.5                   | New Mexico.....     | 16.4                  | 83.6                   |
| Connecticut.....   | 45.4                  | 54.6                   | New York.....       | 42.5                  | 57.5                   |
| Delaware.....      | 46.3                  | 53.7                   | North Carolina..... | 50.5                  | 49.5                   |
| Florida.....       | 34                    | 66                     | North Dakota.....   | 43.7                  | 56.3                   |
| Georgia.....       | 29.8                  | 70.2                   | Ohio.....           | 54.8                  | 45.2                   |
| Idaho.....         | 45.7                  | 54.3                   | Oklahoma.....       | 39.2                  | 60.8                   |
| Illinois.....      | 44.8                  | 55.2                   | Oregon.....         | 51                    | 49                     |
| Indiana.....       | 54.7                  | 45.3                   | Pennsylvania.....   | 47.9                  | 52.1                   |
| Iowa.....          | 40.6                  | 59.4                   | Rhode Island.....   | 41                    | 59                     |
| Kentucky.....      | 46.1                  | 53.9                   | South Dakota.....   | 62.4                  | 37.6                   |
| Kansas.....        | 34.3                  | 65.7                   | Tennessee.....      | 42.0                  | 57.1                   |
| Louisiana.....     | 33.6                  | 66.4                   | Texas.....          | 32.5                  | 67.5                   |
| Maine.....         | 37.7                  | 62.3                   | Utah.....           | 43.7                  | 56.3                   |
| Maryland.....      | 41.9                  | 58.1                   | Vermont.....        | 37.8                  | 62.2                   |
| Massachusetts..... | 50.5                  | 49.5                   | Virginia.....       | 25.2                  | 74.8                   |
| Michigan.....      | 45.1                  | 54.9                   | West Virginia.....  | 36                    | 64                     |
| Mississippi.....   | 13.5                  | 86.5                   | Washington.....     | 33.2                  | 66.8                   |
| Minnesota.....     | 56.8                  | 43.2                   | Wisconsin.....      | 40.5                  | 59.5                   |
| Missouri.....      | 35.7                  | 64.3                   | Wyoming.....        | 56.4                  | 43.6                   |

The following table shows the returns for groups of States according to population:

TABLE II.

| Population.             | States.                                                                                                                         | Per cent of check. |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 5,000,000, upward ..... | New York and Pennsylvania .....                                                                                                 | 54.8               |
| 3,500,000, upward ..... | Illinois and Ohio .....                                                                                                         | 50.2               |
| 2,000,000, upward ..... | Missouri, Texas, Massachusetts, Indiana, and Michigan .....                                                                     | 55.9               |
| 1,500,000, upward ..... | Iowa, Kentucky, Georgia, Tennessee, Wisconsin, Virginia, North Carolina, and Alabama .....                                      | 61.2               |
| 500,000, upward .....   | New Jersey, Kansas, Minnesota, California, Arkansas, Louisiana, Nebraska, Maryland, West Virginia, Connecticut, and Maine ..... | 60.4               |
| Below 500,000 .....     | .....                                                                                                                           | 58.7               |

In Table III the returns are given for the States grouped geographically, according to the grouping of the census, as North Atlantic division, South Atlantic division, etc.

TABLE III.

| Division.            | Percent. | Population. |
|----------------------|----------|-------------|
| North Atlantic ..... | 56.1     | 17,400,000  |
| South Atlantic ..... | 62.3     | 8,900,000   |
| North Central .....  | 54.3     | 22,400,000  |
| South Central .....  | 65.6     | 11,000,000  |
| Western .....        | 59.7     | 3,000,000   |

The order of these groups of States as respects density of population, beginning with the lowest, is Western, South Central, North Central, South Atlantic, and North Atlantic.

Figures showing the percentage of checks to total receipts in groups of cities according to population:

TABLE IV.

| In cities of—          | Per cent. |
|------------------------|-----------|
| 500,000 and over ..... | 55.9      |
| 200,000 and over ..... | 65.3      |
| 100,000 and over ..... | 70.9      |
| 50,000 and over .....  | 53.8      |
| 25,000 and over .....  | 53.0      |
| 10,000 and over .....  | 66.1      |
| Below 10,000 .....     | 55.6      |

The number of cities of the first class whose statistics are included above was 4; of the second, 11; of the third, 10; of the fourth, 25; of the fifth, 41; of the sixth, 59; of the seventh, 309.

It is not clear to what extent national-bank notes were returned as Treasury notes. The omission of these, if they were omitted to any large extent, can be allowed for on the assumption that the proportion of these notes used of the denominations of \$20 and less bears the same proportion to the total amount of these notes of the denominations mentioned that the silver certificates returned bear to the total silver certificates of the same denominations. That amount would be \$400,000. If this is included on the money side of the returns the percentage of checks would become 53.8. This would not alter the proportion of credit instruments used more than 5 per cent.

Another element which ought to be considered, concerning which there is no way of getting data, but which would go to swell the credit

side of the account, is the large amount of store orders and store checks used, especially in the mining districts and in country districts throughout the South. These are issued in payment of wages, and reduce the amount of money paid out in wages as well as in retail payments. These store orders, as well as the book credit accounts mentioned above, obtain very largely in places whose supplies are furnished through "general stores."

The business of these stores is therefore probably more largely a credit than a cash business. The inclusion of these in the returns would therefore have swelled the per cent of credit instruments. From all these considerations it may be safely inferred that the percentage of credit instruments shown is at least not too large.

A study of the tables shows that the extent of the use of credit instruments in retail transactions varies widely in different parts of the country. Mississippi heads the list and South Dakota shows the smallest percentage. The larger daily use of credit throughout the cotton-growing States was to be expected, and the figures bear out the supposition. Alabama shows 65 per cent in checks and orders, Georgia 70.2 per cent, and Texas 67.5 per cent.

The same is true in general of the great wheat-growing States of the Northwest. Referring to Table III, it is found that the highest percentage of checks is in the South Central division and the lowest in the North Central division. Grouping the division of States somewhat differently, it is found that the percentage of retail transactions done on credit is larger in the South Atlantic and South Central divisions than in the North Atlantic and North Central divisions, while the Western group of States is intermediate.

It is commonly assumed that the use of checks and other credit instruments increases with the population. While it is not safe to draw any very definite conclusions from the results of a single investigation, and that, too, so defective as the present one necessarily was, yet there are some indications from the returns that the above assumption is not in strict accordance with the facts. It would rather appear that the rate of increase in the use of credit instruments in retail transactions decreases relatively to the growth of population after a certain density of population is reached.

The returns from States grouped according to population, as in Table II, seems to show this, and the returns from the cities appear to bear out the conclusion. The same relation holds for the population groups of Table III. The conclusion holds when the groups in the tables are arranged either in the simple order of population, or in the order of the density of population in the groups. The results for the cities, grouped according to population, is shown in Table IV.

In the first class there are represented 4 cities whose population is 500,000 or more; the second class contains 11 cities whose population is between 200,000 and 500,000; the third class 10 cities of between 100,000 and 200,000 population; the fourth class 25 cities of between 50,000 and 100,000; the fifth class 41 cities of between 25,000 and 50,000; and the sixth class 59 cities of between 10,000 and 25,000. The percentage of checks falls from 66.1, in the group of cities of 10,000 and over to 53.0 in the cities of 25,000; rises again to 70.9 in the cities of 100,000 and more, and gradually falls to 55.9 when the cities of 500,000 are reached.

It will be seen from these figures that the movement of the use of checks in the cities of the country corresponds approximately to the movement in the country at large. The data are not sufficient for the foundation of a law, but they indicate that the conclusion stated above

as to the relation of the extent of the use of checks to the population may be true.

The most important practical question connected with the investigation is whether or not the returns throw any light on the legitimacy of the continual demand for more money in certain sections of the country. Bearing in mind the difficulties which always interfere with the drawing of fair conclusions from incomplete data, it may be said that, so far as they go, the returns do not fully justify, if at all, this demand.

There are wide differences as to the extent of the use of credit instruments in retail business between States of the same general character of population and economic condition, but it would seem, from such results as this investigation show, that if there is a real demand and necessity for a continuous larger medium of exchange, the satisfaction of that demand could and would be met by an increase in the use of credit instruments. It is fair to presume that their use would follow, as the absolute business needs of the people are always properly met by those engaged in carrying on business of each community. That it is not so met is evidence that the need is not as real as many would suppose from the constant demand made upon Congress to simply increase the volume of the currency. Moreover, if that argument, which is based solely upon the demand for more money, were in any large measure sound, it would amount merely to a demand for an increase in the use of credit, since the purpose served by bank notes in the majority of instances could be equally well served by bank discounts and credit deposits; in other words, by the use of checks.

There are certain other items of interesting information furnished by the investigation. One is the distribution of the different kinds of money in the country. It is a commonly observed fact that gold coin in ordinary daily transactions is common in some parts of the country and scarce in others; that silver and silver certificates are used to a relatively much larger extent in some sections than in others, and finally that Treasury notes and national bank notes also have a pretty well defined area of circulation. Thus we find gold used in retail transactions more largely, for example, in California, Colorado, South Dakota, Oregon, Minnesota, Missouri, Nebraska, Texas, Washington, and Wyoming than in the other States. Silver and silver certificates constitute a larger part of the paying medium in retail business in Alabama, Arkansas, North Carolina, Connecticut, Delaware, Florida, Georgia, Kentucky, Maryland, Ohio, and Texas than in other States. Treasury and bank notes enter more largely in Massachusetts, New York, Maine, Michigan, Indiana, Illinois, North Dakota, Kansas, and Iowa, but the data are not very satisfactory.

The distribution of money in a country is a matter of no little interest and importance, concerning which information is very desirable.

The returns do not throw any new light on the length of the period of credit in retail transactions. It varies from a few days to six or nine months, and in some cases a year, the longer period being in the agricultural districts. Moreover, there is no uniformity among retail tradesmen even in the same locality. In the 23 largest cities of the country the average period of credit varies from one and one-tenth to one and four-tenths months. The returns are therefore too meager to furnish any satisfactory conclusion of a general nature in so complex a matter.

As to the method of payment of wages, the custom varies greatly in different States. So far as the results show in those States whose population may be roughly described as being of medium density, wages are paid more largely by checks than by cash. In the most

thickly settled States, however, the opposite is true. Cash is used, of course, more largely than checks for this purpose in States which have a considerable number of large cities and whose industrial character is manufacturing. As illustrating these points, the following table is given, showing the ratio between the number of banks which report that wages are paid by checks to the number which report payment by cash:

| States.             | Ratio.    | States.                | Ratio.    |
|---------------------|-----------|------------------------|-----------|
| Arizona .....       | 3. to 1   | Indian Territory ..... | 0.25 to 1 |
| Alabama .....       | 0.4 to 1  | Kansas .....           | 1.7 to 1  |
| California .....    | 0.5 to 1  | Kentucky .....         | 0.44 to 1 |
| Colorado .....      | 9.7 to 1  | Maryland .....         | 0.07 to 1 |
| Florida .....       | 0.3 to 1  | Massachusetts .....    | 0.15 to 1 |
| Idaho .....         | 0.75 to 1 | Michigan .....         | 1.3 to 1  |
| Illinois .....      | 1.5 to 1  | Minnesota .....        | 2 to 1    |
| Indiana .....       | 0.22 to 1 | Missouri .....         | 1.7 to 1  |
| Iowa .....          | 1.2 to 1  | Montana .....          | 6 to 1    |
| Nebraska .....      | 4 to 1    | South Dakota .....     | 1.8 to 1  |
| New Hampshire ..... | 0.2 to 1  | Tennessee .....        | 0.5 to 1  |
| New Jersey .....    | 0.3 to 1  | Texas .....            | 1.2 to 1  |
| New Mexico .....    | 6 to 1    | Utah .....             | 1.5 to 1  |
| New York .....      | 0.17 to 1 | Vermont .....          | 0.07 to 1 |
| Ohio .....          | 0.2 to 1  | Virginia .....         | 0.7 to 1  |
| Oklahoma .....      | 0.7 to 1  | Washington .....       | 2.5 to 1  |
| Pennsylvania .....  | 0.43 to 1 | Wisconsin .....        | 0.8 to 1  |
| Rhode Island .....  | 0.09 to 1 | Wyoming .....          | 8 to 1    |

The figures in the above table show the proportion of those banks reporting that it is the custom in their community to pay wages by checks. Besides these a considerable number of banks report that in their localities wages are paid about equally by checks and by cash. This is true principally of New York and Pennsylvania. One or two banks note the interesting fact that since the currency dearth in 1893 the custom of paying wages by checks has grown in their localities. On the other hand, one or two report that they discourage the practice of payment by checks.

A question was inserted in the blanks sent out asking whether in the places in which wages are paid by checks the employés, as a rule, present their checks for payment at the banks or have them cashed by the merchants. The purpose of this question was to get some information as to how far wage payment by check diminished the amount of money which the banks have to carry to meet drafts for pay rolls. Evidently if the employés immediately carry their checks to the banks the situation is not different from what it would be if the employers draw the amount of their pay rolls from the banks and pay the wages in cash.

If, however, the employés paid part of their bills with the checks by presenting them to the merchants, obviously they would entail a smaller draft on the cash in the banks. The returns, so far as they indicate anything, show that about half the pay checks are cashed by the banks and half by the merchants, the proportions, according to 650 replies, being 327 by the banks and 300 by the merchants.

There are several interesting facts of minor importance given in the returns.

A fact, noted by several banks, was the influence of the railroad strike of last summer. In some cases the receipts of the banks had fallen off almost entirely for several days, including that selected for securing the statistics asked for. Still another fact brought out clearly, although, of course, it was known with more or less certainty before, is that a considerable number of banks, especially in the large cities, have no depositors in retail business at all. In New York City, for example,

24 banks report that they have no such deposits or only an exceedingly small amount of them.

This fact has an important bearing on the apparent discrepancy between the percentage of checks reported in the returns of this investigation and those secured by the Comptroller of the Currency in previous investigations. The present inquiry has to do with the checks used in retail transactions only. Previous inquiries have dealt with the amount used in all transactions. It has been pretty generally agreed among economists that the percentage (between 90 and 92 per cent) of instruments of credit shown by previous investigations to be used in the business of the country was so large because it represented, to a great extent, wholesale as well as retail operations.

The advocates of a large volume of money, not inherently sound money, have used this belief to offset the statement that credit is a more important determining cause of prices in modern business than money. The results of the present inquiry, however, are, on the whole, in the line of the former conclusions as to the importance of credit instruments in payments and exchanges generally, and against the necessity of any additional provisions for simply an increase in the volume of money without taking into consideration the other and more important elements which should characterize our currency circulation.

#### THE NUMBER OF DEPOSITORS IN THE NATIONAL BANKS.

The office having obtained such information as it could relative to the subject just treated of, it seemed that facts showing the use of the national banks by the general public as banks of deposit would be of interest. Such facts would not only show the great numbers of the people who were making use of them as a means of safe-keeping for their cash assets and the importance to them of having them properly dealt with, but would further tend to show why so many credit instruments, such as checks, were in daily use.

It is fair to presume that as a person becomes a depositor in a bank he is more given to the use of checks upon his bank of deposit in making payment of indebtedness than to the use of actual money. As the number of depositors in banks increase such method of payment will correspondingly increase, and the need of the enlargement of the volume of the circulating medium of the country fall away. The depositing of money in bank and the checking against it makes every dollar of the currency an efficient one, in that each dollar is made to support many transactions each day instead of but a single one, as is the case where each transaction is carried on by the payment of actual cash.

In the appendix will be found the statement showing in detail the number of depositors in national banks on July 18, 1894, together with aggregate amounts to their credit. It is so arranged as to show—

Depositors having less than \$1,000 to their credit,  
Depositors having more than \$1,000 and less than \$2,000,  
Depositors having \$2,000 and less than \$10,000; and  
Depositors having \$10,000 and over.

The statement is made up by geographical divisions, giving the number of banks and the number of depositors in each class and aggregate of deposits to the credit of each class, together with a grand aggregate of the number of depositors and the total amount of their deposits, as follows:

| States, reserve cities, and Territories.                                                                                                                               | Total number of banks. | Number of banks reporting. | Under \$1,000. |              | \$1,000 and less than \$2,000. |              | \$2,000 and less than \$10,000. |              | \$10,000 and over. |               | Total.    |               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------|----------------|--------------|--------------------------------|--------------|---------------------------------|--------------|--------------------|---------------|-----------|---------------|
|                                                                                                                                                                        |                        |                            | Number.        | Amount.      | Number.                        | Amount.      | Number.                         | Amount.      | Number.            | Amount.       | Number.   | Amount.       |
| Division 1:<br>Maine, New Hampshire, Vermont, Massachusetts (Boston), Rhode Island, Connecticut.....                                                                   | 593                    | 588                        | 175,916        | \$35,978,041 | 14,585                         | \$20,324,691 | 14,933                          | \$64,080,653 | 4,571              | \$154,559,628 | 210,005   | \$274,943,013 |
| Division 2:<br>New York (New York City, Albany, Brooklyn), New Jersey, Pennsylvania (Philadelphia, Pittsburg).....                                                     | 837                    | 805                        | 576,030        | 102,252,901  | 33,901                         | 47,181,891   | 31,920                          | 132,064,045  | 9,777              | 458,189,199   | 651,628   | 739,688,036   |
| Division 3:<br>Delaware, Maryland (Baltimore), District of Columbia (Washington City), Virginia, West Virginia.....                                                    | 166                    | 162                        | 114,246        | 17,375,228   | 5,538                          | 7,724,277    | 4,607                           | 17,607,444   | 790                | 20,653,792    | 125,181   | 63,360,741    |
| Division 4:<br>North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana (New Orleans), Texas, Arkansas, Kentucky (Louisville), Tennessee..... | 497                    | 483                        | 135,522        | 18,245,336   | 5,679                          | 7,768,100    | 4,867                           | 18,829,317   | 828                | 24,407,726    | 146,896   | 69,250,479    |
| Division 5:<br>Ohio (Cincinnati, Cleveland), Indiana, Illinois (Chicago), Michigan (Detroit), Wisconsin (Milwaukee).....                                               | 754                    | 733                        | 381,314        | 66,609,567   | 20,709                         | 28,038,260   | 16,601                          | 66,628,376   | 4,240              | 146,213,465   | 422,864   | 307,489,668   |

| United States.....                                                                                                                                                     | 3,770                  | 3,650                      | 1,724,077      | 293,269,861  | 97,439                         | 132,526,870  | 85,066                          | 346,873,145  | 22,738             | 874,347,253   | 1,929,340 | 1,647,017,129 |

The information above set forth was procured from the banks reporting at the same date as their report of condition made to the Comptroller for July 18, 1894, and is complete as to all the 3,770 doing business on the date named, except as to 120, which failed to make any report. The failure of these 120 banks to furnish this information, taken in connection with the fact that some of the banks reporting failed to include certificates of deposit, which are included in the item of individual deposits shown in the aggregate of their liabilities, will account for the difference of \$30,784,071 between the aggregate of individual deposits shown by this statement, and the aggregate of this item shown in the statement of resources and liabilities of the banks on July 18, 1894.

Considering the aggregates shown by this statement, it is found that 3,650 banks held deposits to the amount of \$1,647,017,129, deposited by 1,929,340 depositors, or an average of 528.5 depositors to each bank.

The following table indicates by geographical divisions the average number of depositors, and the average amount for each depositor of each class:

| Geographical divisions. | Under \$1,000.                |                                    | \$1,000 and less than \$2,000. |                                    | \$2,000 and less than \$10,000. |                                    | \$10,000 and over.            |                                    | Total.                        |                                    |

| Division 5 .....        | 520.2                         | 175                                | 28.2                           | 1,354                              | 22.6                            | 4,014                              | 5.8                           | 34,484                             | 576.8                         | 727                                |
| Division 6 .....        | 386.5                         | 156                                | 19.1                           | 1,204                              | 13.5                            | 3,990                              | 3                             | 28,119                             | 422.1                         | 526                                |
| Division 7 .....        | 560.2                         | 149                                | 30.9                           | 1,357                              | 22.2                            | 3,784                              | 4.2                           | 29,521                             | 617.5                         | 542                                |
| Division 8 .....        | 285.9                         | 158                                | 13                             | 1,363                              | 9.5                             | 3,878                              | 1.6                           | 23,188                             | 310                           | 443                                |
| United States .....     | 472.3                         | 170                                | 26.7                           | 1,360                              | 23.3                            | 4,077                              | 6.2                           | 38,453                             | 528.5                         | 853                                |

An analysis of the table shows that in the class under \$1,000 the average amount for each depositor varied in different sections of the country from \$135 to \$205; in the class \$1,000 and less than \$2,000, from \$1,204 to \$1,395; in the class \$2,000 and less than \$10,000, from \$3,784 to \$4,291; in the class \$10,000 and over, from \$23,188 to \$46,864.

It will be seen from these figures that, with the exception of the class of \$10,000 and over, which has the smallest number of depositors, the variation as to the average amount for each depositor in the different sections of the country is but slight. A comparison of the average number of depositors in the different geographical divisions shows the variations to be much greater. The average of the total number of depositors is lowest in division No. 4, viz, 304.1, and highest in division No. 2, where it was 809.4. These wide variations are largely accounted for by the extensive banking facilities furnished by banking institutions outside of the national system.

For instance, in division No. 1, comprising six Eastern States, the average number of depositors in 588 national banks is only 357.1, but from tables appearing elsewhere in this report it will be seen that there

are also in this division 540 State banks, loan and trust companies, and savings banks.

Taking divisions Nos. 2 and 3 together, having the highest average total number of depositors in 1,003 national banks, viz, 809.4 and 772.7, respectively, it is found that in the States comprising these two divisions there also are 811 State banks, loan and trust companies, savings and private banks. In division No. 4, comprising 11 Southern States, we find the lowest average total number of depositors in 497 national banks, viz, 304.1, there being also in these 11 States 606 State, etc., banks. In division No. 5 the average total number of depositors in 754 national banks is 576.8, there being also in this division 966 State, etc., banks. In division No. 6 the average total number of depositors in 582 national banks is 422.1, there being also 2,155 State, etc., banks. In division No. 7 the average total number of depositors in 128 national banks is 617.5, there being also 313 State, etc., banks. In division No. 8 the average total number of depositors in 213 national banks is 310, there being also 347 State and other banks.

In conclusion, it is shown by the table referred to that 3,650 national banks held \$1,647,017,129, deposited by 1,929,340 depositors, or an average of 528.5 depositors to each bank. Applying this average to \$1,225,452,821 of deposits held by the banking institutions other than savings banks operating outside of the national system, it is found that such banking institutions held deposits made by 1,436,638 depositors. The latest returns to this office made by savings banks show that they held \$1,747,961,280, deposited by 4,777,687 depositors.

A tabulation of this information is shown herewith:

|                                                         | Deposits.          | Number of depositors. |
|---------------------------------------------------------|--------------------|-----------------------|
| National banks .....                                    | \$1, 647, 017, 129 | 1, 929, 340           |
| State and private banks, loan and trust companies ..... | 1, 225, 452, 821   | 1, 436, 638           |
| Savings banks .....                                     | 1, 747, 961, 280   | 4, 777, 687           |
| Total .....                                             | 4, 620, 431, 230   | 8, 143, 665           |

It is found that all the banks and banking institutions in the country, from which figures were obtainable at the latest dates, held deposits to the enormous sum of \$4,620,431,230 deposited by no less than 8,143,665 depositors. After making due allowance for the fact that the same person may have deposits in more than one bank; further, that 120 national banks doing business on July 18, 1894, failed to make any report; that the number of depositors in State and private banks and loan and trust companies was estimated from the average number of those in national banks, it is not unreasonable to conclude that the banking institutions of the country are patronized and used by no less than about 9,000,000 depositors, or about 1 person out of every 7 or 8 persons in the total population of the United States.

No better evidence of the valuable and generally diffused service rendered to the public by banks in general can be deduced than that shown by the figures here presented, and no stronger argument could be adduced to warrant the most careful and statesmanlike consideration of any measure affecting them. The facts as they are demonstrate how many people have a material interest in them and how many branches of trade and commerce are touched by any banking legislation which is placed upon the statute books.

## REVENUE TO THE GOVERNMENT.

The interest awakened by a discussion of a general revision of the present national banking system makes it proper to consider in this report how far the national banks have been a source of revenue to the Government. Congress has considered the capital, deposits, and circulation of these banks as legitimate subjects of taxation. The act of March 3, 1883, relieved the banks of further taxes on the first two items, but left the 1 per cent annual duty on circulation undisturbed. No subsequent changes have been made affecting this law.

The total tax collected on capital amounted to \$7,885,887.74. The banks have paid taxes on their deposits to the amount of \$60,940,067.16. Up to June 30, 1894, the end of the last fiscal year, the national-bank circulation had yielded a revenue amounting to \$75,834,997.17. Estimated at the same rate as for the year prior, the taxes on circulation from June 30 to October 31 would yield an additional revenue of \$573,698.39.

National banks are also assessed for a sufficient amount to cover the redemption of their circulating notes by the United States Treasurer, the preparation of the plates from which these notes are printed, and the fees of the national-bank examiners. These items amounted to \$367,836.93 during the past fiscal year, but they should not be regarded in this calculation, as no part of this amount is retained in the public treasury.

Whatever amount of bank notes remain eventually unredeemed will be an additional source of profit, as the banks are required to pay into the Treasury lawful money to the full amount of their circulation before they are allowed to withdraw their deposits of United States bonds. From the best obtainable figures, it appears reasonable to suppose that a small amount of notes will not be presented for redemption. Although some of the national banks ceased doing business over thirty years ago, each bank still has currency that has not been presented. Something like 2 per cent of the old State-bank circulation was not redeemed.

A careful examination of the currency accounts of the liquidated national banks shows that the percentage of national-bank currency probable to be unredeemed will be very much smaller. From present indications, it seems probable that about two-fifths of 1 per cent of the national-bank notes that have been in actual circulation will remain unredeemed. On October 31, 1894, this amount was \$691,706,231. At the average rate of redemption there will remain as profit to the Government from this source \$2,766,824.92. The average cost of redemption has been about \$1.37 per thousand.

On October 31, 1894, the amount in the Treasury to the credit of the national-bank redemption account was \$35,883,967.73. Hence it will be seen that the profits from unredeemed circulation are already available.

The revenue from these banks was as follows:

|                                   |                    |
|-----------------------------------|--------------------|
| From taxation .....               | \$145, 234, 650. 4 |
| From unredeemed circulation ..... | 2, 770, 615. 4     |
| Total .....                       | 148, 005, 265. 93  |

From this should be deducted the Government expense of this office, including the additional expense, which has been carefully estimated on the basis established by former Comptrollers, and the total brought down to the close of the report year, amounting to \$15,365,963.75. This leaves the net profit derived from the national banks at \$132,639,302.19.

As Government depositories, the national banks have received, stored in their vaults, and accounted for \$5,356,625,891, without expense to the Government. Allowing the rate of three-eighths of 1 per cent as a reasonable compensation for such services, which is the same as that fixed by the act of March 3, 1875, as the compensation of disbursing officers for public buildings, it would amount to \$20,087,347.

No attempt has been made to compute the expense for transportation charges during the thirty years, had it been necessary to transfer the moneys to the various subtreasuries instead of depositing them in these national banks, owing to the impossibility of obtaining the necessary information upon which to base an estimate. A casual investigation shows that this item would have amounted to a very large sum. The saving in expense, irrespective of transportation charges, added to the net profits detailed above, makes a total of \$168,092,616 as the measure of the direct benefit the United States Treasury has actually received from the national banks.

#### SERVICE TO THE PUBLIC.

The amount of revenue received directly by the Government from the tax imposed by it upon the banks, and the savings to it, as stated, have been but a part of the benefits conferred upon the people through a well organized, uniform, and carefully conducted banking system. The aid rendered the individual in the carrying on of his business undertakings has been far greater than any revenue paid to the Government or service given it. The indisputable facts are that since the inauguration of the present system four great points of advantage and saving have been gained to the general public.

First. The saving in heavy discounts on the bank currency prevalent before the establishing of the national bank system.

Second. The saving in rates of interest on loans and discounts.

Third. The saving in the making of exchange.

Fourth. The saving to customers in charges for making collections.

It is unnecessary to elaborate at any great length either of the above enumerated propositions, and yet something pertinent to each may be said that will give a clearer understanding of just what has been gained by a system under the general supervision and control of the Government.

It is not impossible, and it may be not improbable, that the same results might have followed, with improved business methods and keener watchfulness, the conduct of systems of note issue and banking not uniform and not under the same supervision, but the facts are that so far as the experiment has been tried, the one system has been wholly successful in its operation, and the other, at the best, was but partially so, and at its worst highly disastrous to all concerned.

The saving of loss from discounts on circulating notes of banks not uniform was quickly realized by the public at large. Prior to the issuing of national bank notes there were as a part of our circulating medium approximately \$200,000,000 of State bank notes. The loss in discount upon these varied in different sections of the country, and was in a large measure controlled by what was known of the financial standing of the issuing bank. The loss to the note holder, however, was from 1 to 5 per cent, and not infrequently 10 per cent. In many cases it was an entire loss. Whatever may be the defects of the present note issue of the national banks, it is at least uniform in appearance and value, and by law the note issued by every bank in the

system is receivable at par by every other bank in it, and redeemable in lawful money at the bank of issue or at its designated redemption agency.

The saving in rates of interest on loans and discounts has been brought especially to the South, the West, and the Northwest, where the necessary capital for banking purposes was very scarce and at the same time very greatly needed to develop the great natural resources of these sections of the country. The provisions for the same governmental supervision of the national banks and uniformity of method with which the capitalists in the East and North were familiar undoubtedly was an important factor in engaging their capital, which, owing to its plentifulness at home was bringing to them either no interest or very low rates in banking enterprises in the sections named.

The evidence of the extent of this investment is found in the fact that in 1889 nearly one-third of the capital stock of 520 national banks in Iowa, Minnesota, Missouri, Kansas, and Nebraska, was contributed by Northern and Eastern shareholders, while in Dakota, Idaho, Montana, New Mexico, Utah, Washington, Wyoming, and Arizona more than one-half of the capital stock of 144 national banks was held by nonresident shareholders. In the States of Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, Kentucky, and Tennessee, of the shares of 410 national banks a little more than one-sixth of the total was held by nonresident shareholders. The investments of this character made by nonresidents since the dates given has been at least as large, if not larger, than prior thereto, but the figures are not now at hand to state with accuracy the proportion. The facts gathered, however, form of themselves such data upon the point made as to make it worthy of consideration.

The increase in the supply of loanable funds thus furnished necessarily had the effect of lowering the rates of interest on loans and discounts below the level of those previously prevailing. The general confidence inspired by a central and uniform governmental supervision and examination, the frequent publication of sworn reports of condition, the double liability of shareholders, the percentage of reserve to be held against deposits required, and the necessity of having the bank's funds invested in quick assets, rather than tied up in real estate investments, operated to attract all over the country to these banks, the deposit of funds in large and small amounts, upon the greater portion of which no interest is paid for temporary safe-keeping. To the extent that these deposits were made was the loaning capacity of the banks added to and the idle capital in each community brought into use. It can be easily calculated what the effect of rendering available so much imported and home capital was toward lowering rates of interest, when it is known that on October 2 last the individual deposits held by national banks amounted to \$1,728,418,819.

As banking methods have improved and safety made more certain, under the effects of uniformity and general supervision, the lessening of the rates of exchange has steadily gone on, thus giving business interests the benefit of saving in an item in the transfer of funds that prior to 1860 assumed very large proportions. At present, to transmit \$1,000 from New Orleans to New York it is but necessary to purchase from the bank at New Orleans its check payable to the purchaser's order on its correspondent bank in the latter city, and this may with perfect safety be transmitted to New York or any other point in the Union. At certain seasons of the year the purchaser will procure the

draft at par, at others at a slight premium of one-tenth or one-eighth of 1 per cent.

In 1859 the average rate of exchange on New York from points in the South and West is reported as from 1 to 1½ per cent, while the current rate in the State of New York in 1860 was one-half of 1 per cent. The exact figures which represent the grand total of exchange between national banks alone are not to be secured, but figures obtained by the Comptroller in the year 1878 showed an estimate at that time of nearly \$3,000,000,000 as the amount of exchange drawn annually upon New York alone by Southern and Western States, and not less than \$4,000,000,000 as the amount drawn annually by the same States upon points in the East, including New York.

The volume of business done by the national banks has greatly increased since 1878, and a corresponding increase must be made in the estimate then given for the purpose of approximating the measure of saving to the public effected merely through exchanges. As a very large proportion of clearing-house exchanges consist of checks drawn by banks located at a distance from the clearing houses, an examination of the volume of these clearing-house transactions will convey some idea of the great volume of exchange effected between banks at distant points. The clearings in New York city alone for the thirty years ended in 1894 aggregated the sum of \$949,000,000,000, while the clearings for all the clearing houses in the United States for the single year 1894, and that a year far below the average, were \$45,000,000,000.

It is impossible to ascertain in exact figures the saving to bank customers in the collections made for them free of charge, of notes, drafts, and other evidences of indebtedness. No statistics showing the money value of these services have ever been gathered, but the continual presence of these collection items in the files of every bank in the country furnishes abundant proof upon this point.

#### AMENDMENTS RECOMMENDED.

The act enumerating the duties of the Comptroller of the Currency specifically requires that in his annual report to Congress at the commencement of its sessions he shall suggest "any amendment to the laws relative to banking by which the system may be improved and the security of the holders of its notes and other creditors may be increased."

In compliance with the foregoing there were submitted at the last session of Congress certain recommendations looking to the amendment of existing laws. As yet the suggestions then made remain unacted upon, and therefore they are resubmitted. It is unnecessary to here set them forth in detail or again give the reasons then assigned in support of them. In a general way it may, however, be stated they cover the following points:

That associations, if the present law is not changed as to a bond deposit, be authorized to issue circulating notes equal to the par value of the bonds deposited; that the semiannual duty on circulation be so reduced as to equal one-fourth of 1 per cent per annum; that the Comptroller, with the approval of the Secretary of the Treasury, be empowered to remove officers and directors of national banks for violations of law; that loans of any bank to its executive officers or employes be restricted; that the assistant cashier under certain conditions be authorized to sign circulating notes; that some class of public officers be empowered to administer the general oaths required by the national

bank act; that bank examiners be required to take an oath of office; that the Comptroller be empowered to fix their compensation, and that provision be made for supervising examiners.

It is believed the taking of proper legislative action upon these proposed amendments would be for the betterment of the system and promotive of the public good.

The amendments thus suggested, however, affect in the largest degree only the administrative features of the present national-bank act, and are of less relative importance than the remedying of any defects which may exist in the note-issuing power vested by it in the banks. No section of the law should be disturbed which can not be materially improved upon and no amendment engrafted unless such amendment will work out better results than flow from the existing order of things.

The present law, it must be conceded, has been successful in every material feature, excepting in the matter of bank-note issue, and here the failure has been but a partial one. The notes issued by the banks under governmental supervision have been uniform in appearance and under any and all circumstances of the full face value which they purport to carry. They have possessed the first requisite of a good bank-note issue—immediate convertibility into coin upon presentation.

It is probable that there could be no better plan for simply insuring the note holder against loss than the present requirement of a deposit of bonds to secure a bank's circulation, but it is equally certain, however, that a method could be devised not less safe in this respect and in addition thereto possessing that which is as essential and is now wholly wanting—elasticity of issue. The complaint therefore made against the present system is that lacking in elasticity of issue it fails to meet as fully as it ought the varying wants of the country's trade and commerce. This defect must attach to every scheme for currency issued by the banks against a deposit of bonds, the market value of which fluctuates while the percentage of issue, less than the value of the bonds, granted the banks remains unchanged. It must also be wanting in such a method because of the delay, in the face of a pressing need, occasioned by a tight money market or other reason, in securing and depositing the bonds required and taking out the circulation thereon.

But serious as is this fault, and retardful as it is to the business interests of the country, any attempt to remedy it which should lose sight of or in anywise make less certain the present unquestioned credit and convertibility of the bank issues of the country could not be justified. It is a duty of governments to see that the currency which circulates among the people ought always to be of the very highest character, and the soundness of which should never be a subject of inquiry. For thirty years the American people have had such a bank currency, and having seen the value of it, both here and abroad, they will not be content to have any innovation made unless such new departure insures not only equal but better results.

It is respectfully suggested that not only as good but better results would be obtained if the present banking act were amended by repealing the provision thereof requiring each bank, as a prerequisite to entering the system and issuing bank-note currency, to deposit Government bonds.

In lieu of such provision should be substituted one permitting the banks to issue circulating notes against their assets to an amount equal to at least 50 per cent of their paid-up unimpaired capital. In order to guarantee the note holder against loss on account of the issue of any insolvent bank, a safety fund should be provided by graduated

taxation upon the outstanding circulation of the banks until the same should equal not less than 5 per cent of the total of such outstanding circulation, such fund to be held by the Government as an agent only and for the purpose of immediately redeeming the notes of such insolvent bank. It should be as speedily as possible replenished by a first and a paramount lien out of the assets of the bank and the shareholders' double liability. The redemption of such notes should be immediate upon presentation. Whatever other changes, if any, it would be necessary to make in the present system relative to current redemption of bank notes, and the Government's position relative to the same and kindred matters, it is unnecessary to here set forth. If the recommendation here made, together with that which will follow, should receive consideration at the hands of Congress, a bill drawn after careful study and investigation of the whole subject would necessarily embody all the details incident to a change from a bond to a safety-fund security as a basis for bank circulation.

Before presenting what seems to the Comptroller to be as important a phase of the question under discussion, and one which, if properly worked out, would be of great benefit to the General Government, it is pertinent to state that the change in the form of security for bank-note issues proposed was sanctioned not only by the American Bankers' Association, which recently met in Baltimore, but is indorsed by many of the leading financiers and students of political economy in this and other countries. It is embodied in the Canadian bank system and, in part at least in the Scotch, English, and German systems. It is safe to say that a note-issuing bank's best assets are its good business notes falling due and paid each day, and that the loss attendant upon notes issued and circulated against such assets under systems permitting it has been comparatively nothing. Only by issuing against them instead of against a bond security can any degree of elasticity in the note-issuing function be attained. It certainly can not be reached in the present hard and fast line fixed by existing law.

As an aid in arriving at the proper per cent of taxation necessary to raise a fund sufficient to redeem the notes of failed banks and the expense incident to the conduct of the office of the Comptroller of the Currency the following, taken from official records, is submitted:

|                                                                                                                  |                 |
|------------------------------------------------------------------------------------------------------------------|-----------------|
| Average annual circulation of national banks, 1864 to 1894.....                                                  | \$282, 801, 252 |
| Outstanding circulation of failed banks .....                                                                    | 17, 819, 541    |
| <hr/>                                                                                                            |                 |
| Cost to General Government on account of national banks, as shown by the books of the Comptroller's office ..... | 7, 610, 169     |
| Additional estimated cost .....                                                                                  | 7, 732, 914     |
| <hr/>                                                                                                            |                 |
|                                                                                                                  | 15, 343, 083    |
| Tax of one-fourth of 1 per cent for thirty-one years.....                                                        | 21, 917, 073    |
| Tax of one-fifth of 1 per cent for thirty-one years .....                                                        | 17, 533, 674    |

It will thus be seen that a tax on national banking circulation of one-fifth of 1 per cent would have repaid the cost of the national banks to the General Government, and also that a tax of one-fourth of 1 per cent would have redeemed the notes of all failed national banks; in fact, a tax of two-fifths of 1 per cent would have been ample to meet both the cost of that system and the redemption of the notes of failed national banks. Under the existing laws, the Government standing responsible for the redemption of the circulation of failed national banks, up to January 1 last, had there been no bond deposit whatever, the loss to it would have been but \$1,139,253, and of this amount

\$958,247 represents the loss by banks whose trusts are still open and will pay further dividends, thus reducing the amount last named.

In considering the question of the benefits to the public of a bond deposit on the part of the banks it is well to remember that the comparatively few failures on the part of national banks have not been because of any security given by them for their circulation, but because of prudent and honest management on the part of those in charge of them, and the careful supervision and examination of them by the officers of the Government. Under the same character of management and the same superintendency and watchfulness on the part of the Government, failures will be not more numerous under a change in the respect named, and therefore the deductions made from the facts of the past are a safe basis for calculations as to the future.

The changes thus outlined will upon investigation, it is believed, prove to be safe in affording complete security to the note holder and give to the business interests of the country a note issue responsive to their needs. Within the measure of percentage of issue against assets granted the banks will be such range as will enable them to keep out sufficient currency to meet the ordinary demands of business and to speedily take out whatever extra amount is necessary to meet extraordinary occasions. It will not permit of an overissue if the notes issued under such system are convertible in coin on demand and the proper and speedy redemption of them is afforded. The business world will use just such amount of them as is necessary to carry on trade, and the remaining ones, it being unprofitable to have them in circulation, will at once return for redemption.

The profit upon the issue of circulation to the banks by such change would be so augmented that it is giving to them a franchise for which it is suggested they should be called upon to make proper return to the General Government. This return should not, however, be of such a character as to defeat the ends sought in the privilege given.

For a long time the chief source of embarrassment to the General Government and the cause of so great uncertainty in the business conditions of the country is the continual danger threatened by the use made of the currency issues of the Government, and the inability, when the revenues of the Government are inadequate, to maintain, except through bond issues, such a reserve of gold coin as is required by law. The current redemption of the legal tender issues and the Treasury issues under the act of 1890, and the reissuing instead of cancellation of the same, must always create distrust of the Government's credit abroad and at home, so long as the laws now upon the statute book remain unchanged.

The General Government ought to be wholly free from direct issuing and redeeming of notes to pass as money among the people. No Government yet has ever successfully engaged in so doing, and the experience of the United States has proven no exception to the rule. The general cost and loss entailed upon the Government, the repeated periods of uncertainty as to its credit, and the stability of our monetary system have been so great as to make the legal tender and Treasury issues of 1890 one of the extraordinary burdens placed upon the people. The relief given in increasing the volume of the circulating medium has been as nothing compared with the expense incident to maintaining the reserve in gold at all hazards necessary to keep intact the Government's credit and provide for their current redemption.

These issues ought to be redeemed and canceled, and the Government thus enabled to retire from the banking business—a business for which it is so poorly adapted and equipped. The intention of those

who first authorized the legal-tender issues was that it should so do at the earliest practicable moment, and the discussion then carried on in Congress is replete with such protestations. The first Congressional enactment signed by President Grant after his inauguration as Chief Executive was one reasserting the determination of the Government to preserve unquestioned the public faith, and the closing clause of it was "And the United States also solemnly pledges its faith to make provision at the earliest practicable period for the redemption of the United States notes in coin."

In the light of the present condition of the Government's finances, that which ought to have been done when there was a surplus in the Treasury can not now be undertaken, and the same conditions must continue to weaken the country's credit and plague the lines of business unless a means is devised for removing these issues from the channel of current redemption until such time as the Government finds itself in position to do that which at first was the intent of all—gradually redeem and cancel them.

If the franchise is granted the banks of issuing circulating notes against their assets instead of against a bond security, it is suggested that the banks in return should recompense the Government by relieving the Treasury Department of the current redemption in coin of the present Treasury issues. The ultimate redemption, of course, must fall upon the Government, but the embarrassment does not arise from their ultimate redemption but from their current.

It is therefore suggested that if Congress shall repeal the provisions of the present act requiring the national banks to make a deposit of Government bonds in order to secure circulating notes, and substitute therefor a provision giving them instead the right to issue the same against their assets, it incorporate therein and as a part thereof that as a prerequisite to so doing the banks be compelled to deposit with the Treasurer of the United States legal-tender issues, or issues under the act of 1890, equal in amount to the difference between the percentage of their capital stock of issues granted against their assets and the total of such capital stock. The deposit thus made ought to remain with the Treasurer until the bank ceased either through voluntary or involuntary liquidation to do business, and in either case the Government ought to then redeem and cancel such Treasury issues deposited. It is only by such permanent deposit during the life of the bank that the issues named can be removed from current presentation for redemption.

As against this deposit of legal tenders and Treasury notes so made there should be issued to the banks dollar for dollar of national-bank notes, either of the same or different design, as might be deemed best, that thus fixed the volume of the currency, as it is now contributed to by the issues of the Government, would not be contracted so long at least as the banks making such deposits are in existence. The bank notes issued under the plan suggested should be exempt from any tax levied on circulation to the same per cent that legal tender notes and Treasury issues, under the act of 1890, are deposited against circulation. If 50 per cent of the circulation is so based then 50 per cent of the circulation should be exempt from circulation tax. To an equitable percentage the bank should be permitted to hold these notes as a part of their reserve against deposit as they in part, would be based upon a deposit of lawful money, which, under the present system, is the money which must constitute such reserves.

The law should make it incumbent upon the banks to deposit in the Treasury for the current redemption of such notes gold coin to an

amount necessary to make sure the current redemption of them. The Government should not undertake or in anywise become responsible for the current redemption of these notes. Its responsibility should end with its redemption of the notes deposited to secure such circulation, when the bank ceased to exist. At present a current redemption fund of 5 per cent of the outstanding circulation is found sufficient, and it is probable that in the future no greater amount would be required.

As already suggested, it is not deemed necessary to here enter into a discussion of details. The principle, if correct, can be incorporated into a law framed in such a manner as to meet any objections, be just and equitable to all concerned, and while placing upon the banks a daily burden now borne by the Government, give them just compensation in making circulation a source of legitimate and fair profit instead of of loss. The elasticity of issue in national bank circulation will be found in the percentage of issue against assets, subject to the necessary rate of taxation and secured by an adequate safety fund to guarantee the note holder against loss on account of the notes of insolvent banks and in a current redemption fund maintained for daily redemption. The Government will be aided, the bank given in exchange a dollar for every dollar deposited, and thus relieved of the loss incident to depositing an amount of its capital stock in excess of the return in notes granted it. No violent contraction of the currency would follow such a course, but whenever contraction would occur it would be not less gradual than would at other times the expansion incident thereto.

It is respectfully suggested that as a necessary element to the securing of proper elasticity of issue in our bank-note currency, section 9 of the act of July 12, 1882, regulating the retirement and issuing of circulation to banks within a fixed period of time, should be repealed, and also that such amendment should be made to the law as will necessitate the banks keeping in the office of the Comptroller of the Currency a sufficient amount of blank notes as will enable them to secure circulation at once, instead of after a period of delay, frequently of sufficient duration as to make the issue unavailable to relieve the pressure existing at the time of ordering the same.

It has been suggested from many eminent financial sources that the whole question of a banking and currency system ought to be referred by Congress to a commission, created by the proper act, appointed by the President, and clothed with proper authority. A commission, non-partisan in its character, composed of men of eminent abilities, could unquestionably devise a currency system sound in every part and one which would commend itself to every interest of the country. It could largely take the question out of politics and have it considered simply in its business aspects and upon merit alone; but if the present Congress is to enact a law upon the subject the appointment of a commission could avail nothing. If, however, nothing more definite can be accomplished, the question of the creation of such commission ought to be considered and acted upon.

#### CONCLUSION.

In concluding this report the Comptroller desires to again bear testimony to the character and general efficiency of the employes in the Bureau, to the examiners in the field, and to the work accomplished by the receivers in relation to the trusts in their charge. The record of the Bureau throughout the past year justifies these expressions of praise.

In the appendix will be found in detail the usual tables, together with a digest of legal decisions\* rendered by the various courts of the country involving questions affecting national banks.

In the second volume of this report will be found a detailed statement of the condition of all the national banks, as shown by the report of condition of October 2, 1894, alphabetically arranged by States and properly indexed.

JAMES H. ECKELS,  
*Comptroller of the Currency.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

\* See foot note, p. 402.

## APPENDIX.

NO. 1.—NAMES AND COMPENSATION OF OFFICERS AND CLERKS IN THE OFFICE OF THE  
COMPTROLLER OF THE CURRENCY, OCTOBER 31, 1894.

| Name.                        | Grade.                    | Salary. |
|------------------------------|---------------------------|---------|
| James H. Eckels.....         | Comptroller.....          | \$5,000 |
| Oliver P. Tucker.....        | Deputy Comptroller.....   | 2,800   |
| Joseph Y. Paige.....         | Chief clerk.....          | 2,500   |
| George M. Coffin.....        | Chief of division.....    | 2,200   |
| Watson W. Eldridge.....      | do.....                   | 2,200   |
| Abram R. Serven.....         | do.....                   | 2,200   |
| George S. Anthony.....       | Superintendent.....       | 2,200   |
| Amos Webster.....            | Teller.....               | 2,000   |
| Theodore O. Ebaugh.....      | Bookkeeper.....           | 2,000   |
| Willis J. Fowler.....        | Assistant bookkeeper..... | 2,000   |
| Edward A. Demaray.....       | Clerk, class 4.....       | 1,800   |
| John A. Hebrew.....          | do.....                   | 1,800   |
| Endicott King.....           | do.....                   | 1,800   |
| George T. May.....           | do.....                   | 1,800   |
| Edmund E. Schreiner.....     | do.....                   | 1,800   |
| Charles A. Stewart.....      | do.....                   | 1,800   |
| Charles McC. Taylor.....     | do.....                   | 1,800   |
| Walter Taylor.....           | do.....                   | 1,800   |
| Thomas P. Kane.....          | Stenographer.....         | 1,600   |

NOTE 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.

NOTE 3.—The coinage of standard silver dollars began in 1878 under the act of February 28, 1878.

NOTE 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

NO. 38.—STATEMENT SHOWING THE AMOUNT AND KINDS OF UNITED STATES BONDS HELD TO SECURE CIRCULATING NOTES OF NATIONAL BANKS ON JUNE 30 OF EACH YEAR FROM 1865 TO 1894, AND THE AMOUNT OWNED AND HELD BY THE BANKS FOR OTHER PURPOSES, INCLUDING THOSE DEPOSITED WITH THE TREASURER TO SECURE PUBLIC DEPOSITS.
